|----------|-------------------------------------------------|-----------|
| <b>1</b> | <b>Probability Spaces</b>                       | <b>1</b>  |
| 1.1      | Introduction                                    | 1         |
| 1.2      | The Idea of Probability                         | 2         |
| 1.3      | Laws of Probability                             | 3         |
| 1.4      | Consequences                                    | 5         |
| 1.5      | Equally Likely Outcomes                         | 10        |
| 1.6      | The Continuous Version                          | 16        |
| 1.7      | Intellectual Honesty                            | 21        |
| <b>2</b> | <b>Conditional Probability and Independence</b> | <b>23</b> |
| 2.1      | Conditional Probability                         | 23        |
| 2.2      | Bayes' Theorem                                  | 31        |
| 2.3      | Independence                                    | 36        |
| 2.4      | The Borel–Cantelli Lemmas                       | 43        |
| <b>3</b> | <b>Common Probability Distributions</b>         | <b>47</b> |
| 3.1      | Common Discrete Probability Spaces              | 47        |
| 3.2      | Probability Generating Functions                | 55        |
| 3.3      | Common Continuous Probability Spaces            | 56        |
| 3.4      | Mixed Probability Spaces                        | 61        |
| <b>4</b> | <b>Random Variables</b>                         | <b>63</b> |
| 4.1      | The Definition                                  | 64        |
| 4.2      | Discrete Random Variables                       | 66        |
