

Contents

1	Analysis, Design and Optimization of Active Devices	1
	I. Guerra-Gómez, E. Tlelo-Cuautle, M.A. Duarte-Villaseñor, and C. Sánchez-López	
2	Nullors, Their Bipolar and CMOS Implementations and Applications in Analog Circuit Synthesis and Design	31
	Raj Senani, A.K. Singh, Pragati Kumar, and R.K. Sharma	
3	Current-Feedback Op-Amps, Their Applications, Bipolar/CMOS Implementations and Their Variants	61
	R. Senani, D.R. Bhaskar, S.S. Gupta, and V.K. Singh	
4	Generation of Grounded Capacitors Minimum Component Oscillators.....	85
	Ahmed M. Soliman	
5	Active Filter Design Using a Two-Graph Based Transformation Technique	107
	Mourad Fakhfakh and Marian Pierzchała	
6	Analog Baseband Filter Design Considerations for Wireless Receivers	121
	Jose Silva-Martinez and Raghavendra Kulkarni	
7	Flexible Nanometer CMOS Low-Noise Amplifiers for the Next-Generation Software-Defined-Radio Mobile Systems ...	145
	Edwin C. Becerra-Alvarez, F. Sandoval-Ibarra, and J.M. de la Rosa	
8	Clocked Nanometer CMOS Comparators	171
	Bernhard Goll and Horst Zimmermann	

9	Low-Power Electronics for Biomedical Sensors	193
	Syed Kamrul Islam, Fahmida Shaheen Tulip, Kai Zhu, and Melika Roknsharifi	
10	Sensor Conditioning Circuits	223
	Julia Hsin-Lin Lu and Byunghoo Jung	
11	Steady State Simulation of Mixed Analog/Digital Circuits	243
	Federico Bizzarri, Angelo Brambilla, Giambattista Gruosso, and Giancarlo Storti Gajani	
12	Variability-Aware Optimization of RF Integrated Inductors in Nanometer-Scale Technologies	271
	Fernando Coito, Helena Fino, and Pedro Pereira	
13	A Survey on the Static and Dynamic Translinear Paradigm	289
	Rafael Vargas-Bernal and Carlos A. De La Cruz Blas	
	Index	307

Integrated Circuits for Analog Signal Processing

Tlelo-Cuautle, E. (Ed.)

2013, X, 322 p., Hardcover

ISBN: 978-1-4614-1382-0
