

Contents

- 1 Introduction** 1
 - 1.1 Scope 3
 - 1.2 Summary 4
 - 1.3 Notational Conventions 7
- 2 Architecture of the World Wide Web** 9
 - 2.1 The History of the Web 10
 - 2.1.1 The Man-Machine Symbiosis Project 10
 - 2.1.2 The Internet 12
 - 2.1.3 The Modern World Wide Web 14
 - 2.2 The Terminology of the Web 16
 - 2.2.1 Protocols 18
 - 2.2.2 Information Encoding and Content 21
 - 2.2.3 Uniform Resource Identifiers 26
 - 2.2.4 Resources 29
 - 2.2.5 Digitality 35
 - 2.2.6 Representations 37
 - 2.3 The Principles of Web Architecture 42
 - 2.3.1 Principle of Universality 42
 - 2.3.2 Principle of Linking 45
 - 2.3.3 Principle of Self-description 47
 - 2.3.4 The Open World Principle 48
 - 2.3.5 Principle of Least Power 49
 - 2.4 Conclusions 50
- 3 The Semantic Web** 51
 - 3.1 A Brief History of Knowledge Representation 52
 - 3.2 The Resource Description Framework (RDF) 56
 - 3.2.1 RDF and the Principle of Universality 57
 - 3.2.2 RDF and the Principle of Linking 58
 - 3.2.3 RDF and the Principle of Self-description 60

3.2.4	RDF and the Open World Principle	61
3.2.5	RDF and the Principle of Least Power	63
3.3	Information and Non-information Resources	65
3.4	An Ontology of Web Architecture	68
3.4.1	Resources and URIs	69
3.4.2	Information Resources	71
3.4.3	Web Resources and Web Representations	73
3.4.4	Media Types	75
3.4.5	Hypertext Web Transactions	77
3.4.6	Modeling the Semantic Web and Linked Data	79
3.5	The Semantic Web: Good Old Fashioned AI Redux?	81
4	Theories of Semantics on the Web	87
4.1	The Identity Crisis	87
4.2	Sense and Reference	91
4.3	The Logicist Position and the Descriptivist Theory of Reference ...	93
4.3.1	Logical Atomism	96
4.3.2	Tarski's Formal Semantics	98
4.3.3	Logical Descriptions Unbound on the Web	100
4.4	The Direct Reference Position and the Causal Theory of Reference	103
4.4.1	Kripke's Causal Theory of Proper Names	103
4.4.2	Putnam's Theory of Natural Kinds	104
4.4.3	Direct Reference on the Web	105
4.5	Sense and Reference on the Web	107
5	The Semantics of Tagging	109
5.1	Making Sense of Tagging	109
5.1.1	Related Work	112
5.1.2	The Tripartite Structure of Tagging	113
5.2	Detecting Power Laws in Tags	114
5.2.1	Power Law Distributions: Definition	114
5.2.2	Empirical Results for Power Law Regression for Individual Sites	115
5.2.3	Empirical Results for Power-Law Regression Using Relative Frequencies	117
5.2.4	The Dynamics of Tag Distributions	118
5.3	The Effect of Suggestions on Tagging	122
5.3.1	Models of Collaborative Tag Behavior	123
5.3.2	Experimental Design	126
5.3.3	Results	127
5.3.4	Influence of Tag Suggestions on the Tag Distribution	130
5.4	Constructing Tag Correlation Graphs	134
5.4.1	Methodology	135
5.4.2	Constructing the Tag Correlation (Folksonomy) Graphs	136

5.5	Identifying Tag Vocabularies in Folksonomies Using Community Detection Algorithms	138
5.5.1	Using Community Detection Algorithms to Partition Tag Graphs	139
5.5.2	Edge Filtering Step	140
5.5.3	Normalized vs. Non-normalized Edge Weights	140
5.5.4	The Graph Partitioning Algorithm	141
5.5.5	Experimental Results	142
5.6	Comparing Tags to Search Keywords	145
5.6.1	Data Set and Methodology Employed	146
5.6.2	Discussion of the Results from the Query Log Data and Comparison	147
5.7	Conclusions	149
6	The Semantics of Search	151
6.1	Introduction	151
6.2	Is There Anything Worth Finding on the Semantic Web?	154
6.2.1	Inspecting the Semantic Web	154
6.2.2	Selecting Queries for Evaluation	157
6.2.3	Relevance Judgments	158
6.3	Information Retrieval for Web Search	163
6.3.1	Vector Space Models	164
6.3.2	Language Models	166
6.4	System Description	168
6.5	Feedback Evaluation	169
6.5.1	Hypertext to Semantic Web Feedback	170
6.5.2	Semantic Web to Hypertext Feedback	173
6.6	Pseudo-Feedback	176
6.7	Inference	177
6.8	Deployed Systems	179
6.8.1	Results	179
6.8.2	Discussion	181
6.9	Future Work on Relevance Feedback	183
6.9.1	Experimental Conclusions	184
6.9.2	The Equivalence of Sense and Content	185
6.10	The Representational Nexus	187
7	Social Semantics	189
7.1	Introducing Social Semantics	189
7.1.1	The Hidden History of Search Engines	191
7.1.2	Against Private Language	193
7.2	Representations as Dynamic Ontology	195
7.3	A Statistical Semantic Web	199
7.4	Towards Collective Intelligence	202

Social Semantics

The Search for Meaning on the Web

Halpin, H.

2013, XVI, 220 p., Hardcover

ISBN: 978-1-4614-1884-9
