

Contents

- 1 Introduction to Thermal Management in Microelectronics Packaging** 1
 - 1.1 Basics of Thermal Management in Microelectronics Packaging 1
 - 1.1.1 Heat Flux 2
 - 1.1.2 Thermal Resistance..... 2
 - 1.1.3 Thermal Management Examples with a Heat Sink and Without a Heat Sink 3
 - 1.2 Heat Generation and the Purpose of Thermal Management in Microelectronics Packaging 3
 - 1.3 Introduction to Electronic Packaging 5
 - 1.3.1 Classification of Electronic Packaging 5
 - 1.3.2 Functions of Electronic Packaging 6
 - 1.4 Development Trends of Electronic Packaging Technology..... 6
 - 1.5 Development Stages of Thermal Management Materials 7
 - 1.5.1 Low-power-device Thermal Management Materials..... 7
 - 1.5.2 High-power-device Thermal Management Materials..... 7
 - 1.5.3 Ultra-high-power-device Thermal Management Materials 9
 - References 10
- 2 Requirements of Thermal Management Materials**..... 11
 - 2.1 Thermal Conductivity Requirements of Thermal Management Materials 11
 - 2.1.1 Heat-Conducting Mechanism 12
 - 2.1.2 Factors Affecting Thermal Conductivity 19
 - 2.1.3 Methods of Measuring Thermal Conductivity..... 21
 - 2.2 Coefficient of Thermal Expansion Requirement of Thermal Management Materials 23
 - 2.2.1 Definition of Coefficient of Thermal Expansion 23
 - 2.2.2 Methods for Measuring the Coefficient of Thermal Expansion..... 25

2.3	Hermeticity Requirement of Thermal Management Materials.....	25
2.4	Other Performance Requirements of Thermal Management Materials	27
2.5	Appearance Quality Requirements of Thermal Management Materials	27
2.5.1	Surface Layer of Nickel and Gold Plating Performance Requirements	27
2.5.2	Quality Requirements of Surface Appearance.....	27
	References	28
3	Overview of Traditional Thermal Management Materials.....	29
3.1	Ceramic Matrix Conventional Thermal Management Materials....	30
3.1.1	Al ₂ O ₃ Thermal Management Materials	31
3.1.2	BeO Thermal Management Materials.....	32
3.1.3	AlN Thermal Management Materials	34
3.1.4	SiC Thermal Management Material	35
3.1.5	Mullite Thermal Management Materials	36
3.1.6	Multilayer Cofired Ceramics	36
3.2	Traditional Plastic-based Thermal Management Materials	37
3.3	Pure Metal or Alloy Traditional Thermal Management Materials.....	39
3.3.1	Pure Copper and Aluminum Metal Thermal Management Materials.....	39
3.3.2	Refractory Metals Tungsten and Molybdenum as Thermal Management Materials.....	40
3.3.3	Kovar Alloy	42
3.3.4	#10 Steel	43
	References	44
4	Development of Advanced Thermal Management Materials	45
4.1	Introduction	45
4.2	Development of Advanced Thermal Management Materials.....	50
4.3	Particle-enhanced Thermal Management Materials	51
4.3.1	W-Cu Thermal Management Material	52
4.3.2	Mo-Cu Thermal Management Material.....	53
4.3.3	Comparison Between Mo-Cu and W-Cu Packaging Materials.....	54
4.3.4	AlSiC and AlSi Thermal Management Materials	56
4.3.5	Cu/SiC and Cu/Si Thermal Management Materials	58
4.3.6	Negative Thermal Expansion Materials, Thermal Management Materials.....	60
4.4	Fiber-reinforced Thermal Management Materials.....	61
4.4.1	Introduction to Reinforced Fibers.....	62
4.5	Sandwich Structure of Composite Materials	67

4.5.1	Copper/molybdenum/copper (CMC) and Copper/molybdenum-copper/copper (CPC) Materials.....	68
	References	70
5	Properties of WCu, MoCu, Cu/MoCu/Cu High-performance Heat Sink Materials and Manufacturing Technologies	73
5.1	Properties of WCu, MoCu, and Cu/MoCu/Cu	74
5.1.1	W-Cu Thermal Management Material	74
5.1.2	Copper Molybdenum (MoCu) Thermal Management Materials	74
5.1.3	CMC	76
5.1.4	CPC.....	76
5.2	WCu Composite Manufacturing Technologies	76
5.2.1	High-temperature Liquid-phase Sintering	76
5.2.2	Reactive Sintering.....	77
5.2.3	Infiltration	77
5.3	MoCu Composite Manufacturing Technologies.....	79
5.4	CMC/CPC Composite Manufacturing Technologies	81
5.4.1	Hot Rolling Lamination.....	81
5.4.2	Explosive Forming.....	81
5.4.3	Laser Cladding.....	82
5.4.4	WCu and MoCu Microelectronics Packaging Material Manufacturing Technologies Research Diagram.....	82
