

Contents

1	Development of Oligodendrocytes in the Vertebrate CNS	1
	Robert H. Miller	
2	Demyelination and Remyelination in Multiple Sclerosis.....	23
	Lars Bø, Margaret Esiri, Nikos Evangelou, and Tanja Kuhlmann	
3	Microglial Function in MS Pathology	47
	Trevor J. Kilpatrick and Vilija G. Jokubaitis	
4	Endogenous Remyelination in the CNS	71
	Robin J.M. Franklin, Chao Zhao, Catherine Lubetzki, and Charles ffrench-Constant	
5	Exogenous Cell Myelin Repair and Neuroprotection in Multiple Sclerosis.....	93
	Ian D. Duncan and Yoichi Kondo	
6	A Peripheral Alternative to Central Nervous System Myelin Repair.....	129
	V. Zujovic and A. Baron Van Evercooren	
7	Immune Modulation and Repair Following Neural Stem Cell Transplantation.....	153
	Tamir Ben-Hur, Stefano Pluchino, and Gianvito Martino	
8	Axonal Protection with Sodium Channel Blocking Agents in Models of Multiple Sclerosis	179
	Joel A. Black, Kenneth J. Smith, and Stephen G. Waxman	
9	Effects of Current Medical Therapies on Reparative and Neuroprotective Functions in Multiple Sclerosis.....	203
	Jack P. Antel and Veronique E. Miron	

10 Imaging of Demyelination and Remyelination in Multiple Sclerosis.....	233
Douglas L. Arnold, Catherine M. Dalton, Klaus Schmierer, G. Bruce Pike, and David H. Miller	
11 Designing Clinical Trials to Test Neuroprotective Therapies in Multiple Sclerosis.....	255
P. Connick, M. Kolappan, A. Compston, and S. Chandran	
Index.....	277

Myelin Repair and Neuroprotection in Multiple Sclerosis

Duncan, I.D.; Franklin, R.J.M. (Eds.)

2013, XIV, 290 p., Hardcover

ISBN: 978-1-4614-2217-4
