Contents

1 First and Famous: Criteria and Qualifiers

2 The First Neurointensive Care Units
The Early Days of the Intensive Care Unit 6
The Early Days of the Neurosciences ICU 6
References 9

3 The First Descriptions of Clinical Signs
Short Historical Note 1: Fixed Dilated Pupil 12
Short Historical Note 2: Decerebrate Rigidity 16
Short Historical Note 3: Cushing Reflex 20
Short Historical Note 4: False Localizing Signs 24
Short Historical Note 5: Brain Herniation 28
Short Historical Note 6: Neurogenic Hyperventilation 34
Short Historical Note 7: Biot Breathing 38
Short Historical Note 8: Cheyne–Stokes Breathing 42
Short Historical Note 9: Ondine's Curse 46
Short Historical Note 10: Asterixis 48
Short Historical Note 11: Neurogenic Pulmonary Edema 52
Short Historical Note 12: Cerebral T Waves 56
Short Historical Note 13: Neurogenic Cardiac Injury 60
Short Historical Note 14: Cushing Ulcer 64
Short Historical Note 15: Cerebral Salt-wasting Syndrome 68
Short Historical Note 16: Neuroleptic Malignant Syndrome 72
Short Historical Note 17: Diencephalic Seizures 76
Short Historical Note 18: Thunderclap Headache 80
References 82

4 First Descriptions of Clinical Syndromes
Short Historical Note 19: Minimally Conscious State 92
Short Historical Note 20: Persistent Vegetative State 96
Short Historical Note 21: Brain Death 100
Short Historical Note 22: Locked-in Syndrome 106
Short Historical Note 23: Anoxic Encephalopathy After Cardiopulmonary Resuscitation 110
Short Historical Note 24: Perimesencephalic Hemorrhage 114
Short Historical Note 25: Basilar Artery Occlusion 118

Short Historical Note 26: Delayed Traumatic Cerebral Hematoma. 122
Short Historical Note 27: Guillain-Barré Syndrome. 126
Short Historical Note 28: Myasthenic Crisis. 130
Short Historical Note 29: Acute Bacterial Meningitis 134
Short Historical Note 30: Pituitary Apoplexy. 138
Short Historical Note 31: Critical Illness Polyneuropathy 142
Short Historical Note 32: Cyclosporine Neurotoxicity. 146
Short Historical Note 33: Cerebral Edema and Fulminant Hepatic Failure 150
References. 152

5 First Descriptions of Initial Management
Short Historical Note 34: Increased Intracranial Pressure and Hyperventilation. 160
Short Historical Note 35: Increased Intracranial Pressure and Osmotic Agents 164
Short Historical Note 36: Care of the Comatose Patient. 168
Short Historical Note 37: Mechanical Ventilation in Neurologic Disease 172
Short Historical Note 38: Therapeutic Hypothermia 176
Short Historical Note 39: Acute Spinal Cord Injury and Spinal Shock. 180
References. 183

6 First Clinical Studies and Trials
Short Historical Note 40: Triple H: Hypertension–Hypervolemia–Hemodilution Therapy 188
Short Historical Note 41: Treatment of Status Epilepticus. 194
Short Historical Note 42: Hemicraniectomy. 198
Short Historical Note 43: Factor VII for Cerebral Hemorrhage. 202
Short Historical Note 44: Corticosteroids in Cerebral Hemorrhage 206
Short Historical Note 45: Surgery in Cerebral Hemorrhage. 210
Short Historical Note 46: Therapeutic Hypothermia After Cardiopulmonary Resuscitation. 214
Short Historical Note 47: Nimodipine in Aneurysmal Subarachnoid Hemorrhage 218
Short Historical Note 48: Antifibrinolytic Treatment in Subarachnoid Hemorrhage 222
Short Historical Note 49: Intra-arterial Thrombolysis in Stroke. 226
Short Historical Note 50: Corticosteroids in Spinal Cord Injury. 230
Short Historical Note 51: Plasmapheresis and Immunoglobulin in Guillain-Barré Syndrome 234
References. 237

7 First Studies on Outcome
Short Historical Note 52: The Glasgow Coma scale and Glasgow Outcome Scale 244
Short Historical Note 53: Outcome After Nontraumatic Coma 248
Short Historical Note 54: Outcome After Traumatic Brain Injury 252
Short Historical Note 55: Outcome After Cerebral Hemorrhage 256
Short Historical Note 56: Outcome After Aneurysmal Subarachnoid Hemorrhage 260
Short Historical Note 57: Outcome of Catastrophic Neurologic Injury: Persistent Vegetative State 264
Short Historical Note 58: Outcome of Catastrophic Neurologic Injury: Brain Death 268
References 271

8 First Studies in Bioethics
Short Historical Note 59: Living Will 276
Short Historical Note 60: Limiting the Level of Care 280
References 283

Famous First Papers for the Neurointensivist
Wijdicks, E.F.M.
2013, XI, 289 p. 120 illus., 110 illus. in color., Hardcover
ISBN: 978-1-4614-3181-7
