## Part I    Vibration Fundamentals

<b>1</b>	<b>Vibration Kinematics</b> . . . . .	3
1.1	Mechanical Vibration Elements . . . . .	3
1.2	Kinematics of Vibrations . . . . .	17
1.3	Fourier Series . . . . .	33
1.4	Key Symbols . . . . .	40
1.5	Exercises . . . . .	42
<b>2</b>	<b>Vibration Dynamics</b> . . . . .	51
2.1	Newton–Euler Method . . . . .	51
2.2	★ Energy . . . . .	59
2.3	★ Rigid Body Dynamics . . . . .	73
2.3.1	★ Coordinate Frame Transformation . . . . .	73
2.3.2	★ Velocity Kinematics . . . . .	80
2.3.3	★ Acceleration Kinematics . . . . .	87
2.3.4	★ Translational Dynamics . . . . .	100
2.3.5	★ Rotational Dynamics . . . . .	103
2.3.6	★ Mass Moment Matrix . . . . .	109
2.4	Lagrange Method . . . . .	120
2.4.1	★ Lagrange Form of Newton Equation . . . . .	120
2.4.2	Lagrangian Mechanics . . . . .	126
2.5	Dissipation Function . . . . .	135
2.6	★ Quadratures . . . . .	140
2.7	★ Variational Dynamics . . . . .	151
2.8	Key Symbols . . . . .	161
2.9	Exercises . . . . .	162

## Part II    Frequency Response

<b>3</b>	<b>One Degree of Freedom Systems, Frequency Response</b> . . . . .	175
3.1	Forced Excitation . . . . .	176

3.2	Base Excitation . . . . .	197
3.3	Eccentric Excitation . . . . .	209
3.4	★ Eccentric Base Excitation . . . . .	216
3.5	Classification for the Frequency Responses of One <i>DOF</i> Forced Vibration Systems . . . . .	221
3.6	Key Symbols . . . . .	226
3.7	Exercises . . . . .	228
<b>4</b>	<b>Multi Degree of Freedom Systems, Frequency Response . . . . .</b>	<b>233</b>
4.1	Natural Frequency and Mode Shape . . . . .	233
4.2	Coupling and Decoupling . . . . .	273
4.3	Harmonic Excitation . . . . .	308
4.4	Key Symbols . . . . .	330
4.5	Exercises . . . . .	332
<b>5</b>	<b>Two Degree of Freedom Systems, Frequency Response . . . . .</b>	<b>343</b>
5.1	Forced Excitation . . . . .	344
5.2	Base Excitation . . . . .	360
5.3	Eccentric Excitation . . . . .	373
5.4	★ Eccentric Base Excitation . . . . .	386
5.5	★ Comparison for the Frequency Responses of Two <i>DOF</i> Forced Vibration Systems . . . . .	398
5.5.1	★ Position of Excitation . . . . .	398
5.5.2	★ Nodes . . . . .	403
5.6	Key Symbols . . . . .	408
5.7	Exercises . . . . .	410
 <b>Part III Time Response</b>		
<b>6</b>	<b>First-Order Systems, Time Response . . . . .</b>	<b>417</b>
6.1	Natural Motion . . . . .	417
6.2	General Motion . . . . .	428
6.3	★ Coupled Systems . . . . .	449
6.4	Key Symbols . . . . .	464
6.5	Exercises . . . . .	465
<b>7</b>	<b>One Degree of Freedom, Time Response . . . . .</b>	<b>473</b>
7.1	Free Vibrations . . . . .	474
7.2	Forced Vibrations . . . . .	493
7.3	Transient Vibrations . . . . .	510
7.4	Measurement . . . . .	527
7.5	Key Symbols . . . . .	532
7.6	Exercises . . . . .	533

**Part IV Application**

<b>8</b>	<b>Vibration Optimization</b>	545
8.1	Vibration Absorption	545
8.2	Vibration Isolation	556
8.2.1	Mathematical Model	556
8.2.2	Frequency Response	559
8.2.3	RMS Optimization	564
8.3	★ Time Response Optimization	583
8.4	Key Symbols	587
8.5	Exercises	588
<b>9</b>	<b>Vehicle Vibrations</b>	591
9.1	Bicycle Car and Body Pitch Mode	592
9.2	Half Car and Body Roll Mode	616
9.3	★ Full Car Vibrating Model	622
9.4	★ Quarter Car	629
9.4.1	Mathematical Model	629
9.4.2	Frequency Response	632
9.4.3	★ Natural and Invariant Frequencies	637
9.4.4	★ RMS Optimization	647
9.4.5	★ Optimization Based on Natural Frequency and Wheel Travel	656
9.5	Key Symbols	660
9.6	Exercises	662
	<b>Appendix A Frequency Response Curves</b>	667
	<b>Appendix B Trigonometric Formulas</b>	673
	<b>Appendix C Unit Conversions</b>	679
	<b>References</b>	683
	<b>Index</b>	685
