1	Introduction	1
1.1	Fundamentals of Data Acquisition Systems	1
1.2	Sensors and Transducers	3
1.2.1	Temperature Sensors	3
1.2.2	Magnetic Field Sensors	4
1.2.3	Potentiometers	4
1.2.4	Light Detection	6
1.3	DAQ Hardware	6
1.4	DAQ Software	7
1.5	Communications Cabling	8
1.5.1	Noise	8
1.6	Parameters of a DAQ System	9
1.6.1	Accuracy and Precision	9
1.6.2	Noise	9
1.6.3	Settling Time	9
1.6.4	Acquisition Time	9
1.6.5	DC Input Characteristics	10
	References	10
2	Data Acquisition Systems: Hardware	11
2.1	Introduction	11
2.2	Plug-in DAQ Systems	12
2.3	Signal Conditioning	14
2.3.1	Example of Design of a Signal Conditioning Circuit	15
2.4	Converters A/D	17
2.4.1	Parameters	22
2.4.2	Successive-Approximation ADC	24
2.4.3	Flash ADC	26
2.4.4	8-Bit, 500 Msps Flash ADC of Maxim	28

2.5	Converters D/A	29
2.5.1	Parameters	30
2.5.2	Binary-Weighted-Input DAC	34
2.5.3	The R-2R DAC	34
2.5.4	8-Bit DACs with 2-Wire Serial Interface of Maxim	35
2.5.5	MAX5893 High Speed A/D	38
2.6	Digital Signal Processing	41
2.6.1	Architecture of a DSP	42
2.7	Microprocessor and Microcontrollers	43
2.7.1	CPU Structure	43
2.7.2	Microcontrollers	44
2.7.3	Microcontroller MAXQ612/622	45
2.8	Amplifier	47
2.8.1	Design of Low-Noise Pre-amplifier	47
2.8.2	Low Noise Amplifier of the Maxim Integrated, MAX9632	54
2.9	Multiplexer/Demultiplexer	56
2.9.1	Multiplexer/Demultiplexer of Maxim Integrated, MAX4638/4639	57
2.10	Power Management	60
2.10.1	Automotive Power-Management MAX16920	62
2.10.2	Power-Management ICs for Single-Cell, MAX8662/MAX8663	62
2.11	Timing System	64
2.11.1	Timing Parameters for Combinational Logic	65
2.11.2	Timing Parameters for Sequential Logic	65
2.11.3	Clock Skew and Clock Jitter	66
2.11.4	MAX9155-Clock	67
2.12	Filtering	67
2.12.1	Digitally Programmed, Dual Second-Order Continuous Low-Pass Filter, MAX270/271	70
2.13	Memory Board	72
2.13.1	1024-Bit, 1-Wire EEPROM of Maxim Integrated	74
2.14	Bus Interface	75
2.14.1	MAX3421E, USB Peripheral/Host Controller with SPI Interface	77
	References	78
3	Communication Bus	81
3.1	Bus USB and FireWire	81
3.1.1	Standardization and Technical Details	81
3.1.2	USB Connectors	83
3.1.3	Power Supply	83

3.1.4	USB Packet and Format	84
3.1.5	FireWire	86
3.1.6	USB Peripheral Controller with SPI Interface, MAX3420E	86
3.2	Serial Communications	87
3.2.1	Signal Description	88
3.2.2	Limitation of RS232	89
3.2.3	MAX220-MAX249 for Serial Applications	89
3.3	Wireless, Ethernet, and Bluetooth	89
3.4	GSM for Data Acquisition Systems	91
3.4.1	GPS Receiver, MAX2769	93
3.5	PCI and PCI Express	93
3.6	Standard VME	95
	References	97
4	Design of Data Acquisition Systems	99
4.1	Introduction to the Design	99
4.2	Functional Design of High Speed Computer-Based DAS	99
4.2.1	Requirements	100
4.2.2	Analysis of Accuracy (Static)	101
4.2.3	Analysis of Accuracy (Dynamic)	102
4.3	Portable DAS	109
4.4	Design Guidelines for High-Performance, Multichannel	110
	References	113
5	Software for Data Acquisition Systems	115
5.1	Introduction	115
5.2	LabView	116
5.3	Android for DAQ	116
5.4	Design of Firmware	117
5.5	Example of Implementation of a Software for Data Acquisition System via VME Bus	118
	References	121
6	Smart Data Acquisition System	123
6.1	General Description of MAX1329	123
6.1.1	Circuit Application	126
6.2	Complete DAQ	128
