

Contents

1 Scaffold Design for Bone Tissue Engineering: From Micrometric to Nanometric Level.....	1
Vincenzo Guarino, Maria Grazia Raucci, Marco A. Alvarez-Perez, Valentina Cirillo, Alfredo Ronca, and Luigi Ambrosio	
2 Molecular Scissors: From Biomaterials Implant to Tissue Remodeling.....	17
Tudor Petreus, Iulian Antoniac, Paul Sirbu, and Carmen Elena Cotrutz	
3 Synthetic Morphogens and Pro-morphogens for Aided Tissue Regeneration.....	43
Matteo Santin	
4 The Role of Oxidative Stress in the Response of Endothelial Cells to Metals.....	65
Roman Tsaryk, Kirsten Peters, Ronald E. Unger, Dieter Scharnweber, and C. James Kirkpatrick	
5 Comparative Properties of Ethyl, <i>n</i>-Butyl, and <i>n</i>-Octyl Cyanoacrylate Bioadhesives Intended for Wound Closure.....	89
Ana María Villarreal-Gómez, Rafael Torregrosa-Coque, and José Miguel Martín-Martínez	
6 Development of Bioabsorbable Interference Screws: How Biomaterials Composition, Clinical and Retrieval Studies Influence the Innovative Screw Design and Manufacturing Processes.....	107
Iulian Antoniac, Dan Laptoiu, Diana Popescu, Cosmin Cotrut, and Radu Parpala	
7 Modeling and Numerical Analysis of a Cervical Spine Unit.....	137
Mirela Toth-Tascau and Dan Ioan Stoia	

8 Carbon Nanotubes in Acrylic Bone Cement	173
Nicholas Dunne, Ross Ormsby, and Christina A. Mitchell	
9 Exploring the Future of Hydrogels in Rapid Prototyping: A Review on Current Trends and Limitations	201
Thomas Billiet, Mieke Vandenhaute, Jorg Schelfhout, Sandra Van Vlierberghe, and Peter Dubrue	
Index.....	251

Biologically Responsive Biomaterials for Tissue
Engineering

Antoniou, I.V. (Ed.)

2013, X, 254 p., Hardcover

ISBN: 978-1-4614-4327-8
