|----------|-----------------------------------------------------------------------------------|----|
| <b>1</b> | <b>Notation and Synopsis of Main Results</b> .....                                | 1  |
| 1.1      | Definition of Resistance .....                                                    | 1  |
| 1.2      | Newton's Aerodynamic Problem.....                                                 | 4  |
| 1.3      | Problems of Least Resistance to Translational Motion<br>of Nonconvex Bodies ..... | 7  |
| 1.4      | Generalized Newton's Problem in Media with Positive<br>Temperature .....          | 8  |
| 1.5      | Scattering in Billiards .....                                                     | 11 |
| 1.6      | Problems of Optimal Mass Transportation .....                                     | 12 |
| 1.7      | Optimizing the Mean Resistance .....                                              | 15 |
| 1.8      | Dynamics of a Spinning Rough Disc .....                                           | 17 |
| 1.9      | Billiards Possessing Extremal Aerodynamic Properties .....                        | 19 |
| <b>2</b> | <b>Problem of Minimum Resistance to Translational Motion of Bodies</b> ..         | 21 |
| 2.1      | Bodies Inscribed in a Circular Cylinder.....                                      | 22 |
| 2.1.1    | The Class of Bodies with Fixed Horizontal Projection .....                        | 23 |
| 2.1.2    | The Class of Sets Containing a Section of the Cylinder .....                      | 26 |
| 2.2      | Bodies Inscribed in an Arbitrary Cylinder .....                                   | 28 |
| 2.3      | Bodies Modified in a Neighborhood of Their Boundary .....                         | 30 |
| 2.3.1    | Preliminary Constructions.....                                                    | 32 |
| 2.3.2    | Proof of Theorem 2.3.....                                                         | 37 |
| 2.3.3    | Proof of Theorem 2.2.....                                                         | 40 |
| 2.4      | Two-Dimensional Problem .....                                                     | 43 |
| 2.4.1    | Minimum Resistance of Convex Bodies.....                                          | 43 |
| 2.4.2    | Minimum Resistance of Nonconvex Bodies.....                                       | 44 |
| 2.5      | Minimum Specific Resistance of Unbounded Bodies .....                             | 49 |
| <b>3</b> | <b>Newton's Problem in Media with Positive Temperature</b> .....                  | 55 |
| 3.1      | Calculation of Resistance and Statement of Minimization Problem..                 | 55 |
| 3.1.1    | Description of the Medium .....                                                   | 55 |
| 3.1.2    | Calculation of Resistance.....                                                    | 57 |
| 3.1.3    | Statement of Minimization Problem .....                                           | 59 |

|          |                                                                      |            |
|----------|----------------------------------------------------------------------|------------|
| 3.2      | Auxiliary Minimization Problems.....                                 | 59         |
| 3.2.1    | Two Lemmas on the Functions $p_{\pm}$ .....                          | 59         |
| 3.2.2    | Lemma of Reduction .....                                             | 61         |
| 3.2.3    | The Minimizing Function for $d = 2$ .....                            | 62         |
| 3.2.4    | The Minimizing Function for $d \geq 3$ .....                         | 64         |
| 3.3      | Solution of Minimum Resistance Problem .....                         | 68         |
| 3.3.1    | Two-Dimensional Problem .....                                        | 68         |
| 3.3.2    | The Problem in Three and More Dimensions .....                       | 72         |
| 3.3.3    | Limiting Cases .....                                                 | 74         |
| 3.4      | Gaussian Distribution of Velocities: Exact Solutions .....           | 77         |
| 3.4.1    | Two-Dimensional Case .....                                           | 78         |
| 3.4.2    | Three-Dimensional Case .....                                         | 79         |
| 3.5      | Proof of Auxiliary Statements .....                                  | 82         |
| 3.5.1    | Proof of Lemma 3.1 .....                                             | 82         |
| 3.5.2    | Proof of Lemma 3.2 .....                                             | 89         |
| 3.5.3    | Proof of Formula (3.41) .....                                        | 103        |
| <b>4</b> | <b>Scattering in Billiards</b> .....                                 | <b>105</b> |
| 4.1      | Scattering in the Two-Dimensional Case .....                         | 108        |
| 4.1.1    | Measures Associated with Hollows .....                               | 109        |
| 4.1.2    | Examples .....                                                       | 111        |
| 4.1.3    | Basic Theorem .....                                                  | 115        |
| 4.1.4    | Proof of Formula (4.20) .....                                        | 124        |
| 4.1.5    | Classification of Scattering Laws<br>on Two-Dimensional Bodies ..... | 126        |
| 4.2      | Scattering by the Surface of Rough Bodies .....                      | 130        |
| 4.2.1    | Proof of Theorem 4.4 .....                                           | 135        |
| 4.2.2    | Proof of Theorem 4.5 .....                                           | 141        |
| 4.2.3    | Proof of Lemma 4.2 .....                                             | 143        |
| 4.2.4    | Proof of Lemma 4.3 .....                                             | 145        |
| 4.2.5    | Resistance of Notched Arc .....                                      | 145        |
| <b>5</b> | <b>Problems of Optimal Mass Transportation</b> .....                 | <b>151</b> |
| 5.1      | Statement of the One-Dimensional Problem and the Results .....       | 152        |
| 5.2      | Proof of Theorem 5.1 .....                                           | 159        |
| 5.3      | Examples .....                                                       | 173        |
| 5.4      | The Problem of Mass Transfer on a Sphere .....                       | 177        |
| <b>6</b> | <b>Problems on Optimization of Mean Resistance</b> .....             | <b>183</b> |
| 6.1      | Two-Dimensional Case .....                                           | 183        |
| 6.1.1    | Resistance in a Medium with Temperature Zero .....                   | 184        |
| 6.1.2    | Media with Nonzero Temperature .....                                 | 189        |
| 6.2      | Case of Higher Dimension.....                                        | 192        |
| <b>7</b> | <b>The Magnus Effect and the Dynamics of a Rough Disc</b> .....      | <b>197</b> |
| 7.1      | Description of the Effect and Statement of the Problem .....         | 198        |
| 7.1.1    | Statement of the Problem for a Rough Disc .....                      | 198        |
| 7.1.2    | Summary of the Remainder of the Chapter.....                         | 200        |

|          |                                                                      |     |
|----------|----------------------------------------------------------------------|-----|
| 7.2      | Resistance of a Rough Disc .....                                     | 202 |
| 7.3      | Magnus Effect .....                                                  | 208 |
| 7.3.1    | Vector-Valued Monge–Kantorovich Problem .....                        | 209 |
| 7.3.2    | Special Cases of Rough Discs .....                                   | 211 |
| 7.4      | Dynamics of a Rough Disc .....                                       | 213 |
| 7.5      | Conclusions and Comparison with Previous Works .....                 | 216 |
| <b>8</b> | <b>Invisible Bodies</b> .....                                        | 219 |
| 8.1      | Main Constructions .....                                             | 220 |
| 8.1.1    | Definitions and Statement of Main Result .....                       | 220 |
| 8.1.2    | Proof of Theorem 8.1 .....                                           | 221 |
| 8.2      | Other Constructions of Bodies of Zero Resistance .....               | 224 |
| 8.3      | Properties of Bodies of Zero Resistance .....                        | 228 |
| 8.4      | Invisibility in Several Directions .....                             | 231 |
| 8.4.1    | Bodies Invisible in Two Directions .....                             | 231 |
| 8.4.2    | Nonexistence of Bodies Invisible in All Directions .....             | 233 |
| 8.5      | Bodies Invisible from One Point .....                                | 236 |
| 8.6      | Possible Applications of Invisible Bodies and Open Questions .....   | 241 |
| <b>9</b> | <b>Retroreflectors</b> .....                                         | 243 |
| 9.1      | Preliminaries .....                                                  | 243 |
| 9.1.1    | Unbounded Bodies .....                                               | 244 |
| 9.1.2    | Basic Definitions .....                                              | 246 |
| 9.2      | Mushroom .....                                                       | 250 |
| 9.3      | Tube .....                                                           | 250 |
| 9.4      | Notched Angle .....                                                  | 254 |
| 9.5      | Helmet .....                                                         | 261 |
| 9.6      | Collection of Retroreflectors .....                                  | 262 |
| 9.7      | Proofs of Auxiliary Statements .....                                 | 264 |
| 9.7.1    | Convergence of Measures Associated with Rectangular<br>Hollows ..... | 264 |
| 9.7.2    | Convergence of Measures Associated with Triangular<br>Hollows .....  | 265 |
| 9.7.3    | Size of the Smallest Hollows in a Mushroom Body .....                | 267 |
|          | <b>Bibliography</b> .....                                            | 279 |
|          | <b>Index</b> .....                                                   | 283 |

Exterior Billiards

Systems with Impacts Outside Bounded Domains

Plakov, A.

2013, XIV, 286 p., Hardcover

ISBN: 978-1-4614-4480-0
