Section I General Principles of Mitochondria and the Heart

1 Introduction to Mitochondria in the Heart	3
The Energy-Consuming Heart	3
The Mitochondrion: Origin, Morphology, Composition, and Dynamics	3
Cardiac Energy Metabolism.....	4
Mitochondrial Biogenesis	6
Cardiac Mitochondria and Cell Death	7
Mitochondria and Ca ²⁺ Signaling: Link Between Myocardial Contraction and Cell Death.....	7
Mitochondrial Dysfunction Related to Cardiovascular Disorders	8
References.....	9
2 Methods to Study Mitochondrial Structure and Function	13
Introduction.....	13
High-Resolution Imaging of Mitochondria in Live Cells.....	13
High-Resolution Electron Microscopy and Electron Tomography.....	14
Molecular Biological and Biochemical Methods	15
mtDNA Analysis.....	15
In Vitro Assessment of Mitochondrial Function.....	15
In Vivo Assessment of Mitochondrial Function	16
Electrophoretic Techniques to Study Mitochondria.....	18
Mitochondrial Proteomics.....	19
Transgenic Models for Assessing Mitochondrial Function in the Heart	20
Conclusion and Future Progress	20
Summary	22
References.....	23
3 Mitochondrial Structure, Composition, and Dynamics	29
Introduction.....	29
Mitochondrial Arrangement in Cardiomyocytes	29
Internal Structure of Mitochondria	30
Mitochondrial Outer and Inner Membranes.....	31
Cardiolipin.....	32
Mitochondrial Permeability Transition Pore.....	33
Voltage-Dependent Anion Channel.....	34
Adenine Nucleotide Translocase.....	34
Cyclophilin-D.....	35
Mitochondrial Phosphate Carrier (PiC)	35

Mitochondrial Channels	36
Mitochondrial Ca ²⁺ Channels	36
Mitochondrial K ⁺ Channels	36
mitoK _{ATP} Channel	37
mitoBK _{Ca} Channel	38
mitoK _v 1.3 Channel	38
Mitochondrial Protein Import Channels	38
TOM	39
Presequence Translocase in the MIM (TIM23)	39
Carrier Translocase in the MIM (TIM22)	40
Mitochondrial Matrix and Intermembrane Space	40
Mitochondrial Dynamics	40
The Molecular Machinery and Mechanisms of Mitochondrial Fusion	40
The Molecular Machinery and Mechanisms of Mitochondrial Fission	42
Mitochondrial Trafficking	43
Regulation of Mitochondrial Dynamics	43
Conclusions	45
Summary	46
References	49
4 Mitochondrial Biogenesis	59
Introduction	59
Mitochondrial Genome: Structure and Dynamics	59
Mitochondrial DNA	59
Mitochondrial Nucleoid	60
Replication of Mitochondrial DNA	62
Transcription of Mitochondrial DNA	65
Translation in Mitochondria	67
Mitochondrial DNA Repair	69
Mitochondrial Protein Biogenesis	70
Presequence Pathway	70
Carrier Pathway	72
Redox-Regulated Import Pathway	73
Biogenesis of the MOM Proteins	73
Mitochondrial Lipid Biogenesis	75
Mitochondrial Phospholipids	75
Mitochondrial Phospholipid Biosynthesis	75
Mitochondrial Phospholipid Traffic	77
PGC-1 α : A Central Regulator of Mitochondrial Biogenesis	77
PGC-1 Family	77
Regulation of PGC-1 α	78
Transcriptional Regulation	78
Posttranscriptional Regulation	79
In Vivo Functions of PGC-1 Family Members	80
PGC-1-Mediated Regulatory Circuitry in the Heart	81
Conclusion	81
Summary	83
References	86
5 Mechanisms of Bioenergy Production in Mitochondria	99
Introduction	99
Pyruvate Dehydrogenase Complex	99
Fatty Acid Oxidation (β -Oxidation Spiral)	101

Production of Reducing Equivalents: Tricarboxylic Acid Cycle.....	104
Citrate Synthase	105
Aconitase.....	106
Isocitrate Dehydrogenase	106
2-Oxoglutarate Dehydrogenase (α -Ketoglutarate Dehydrogenase).....	106
Succinate Dehydrogenase	107
Fumarase	107
Malate Dehydrogenase.....	108
Oxidative Phosphorylation.....	108
NADH: Ubiquinone Oxidoreductase (Complex I).....	108
Succinate: Ubiquinone Oxidoreductase (Complex II)	109
Ubiquinol–Cytochrome <i>c</i> Oxidoreductase (Complex III, or Cytochrome bc1 Complex, or CIII).....	110
Cytochrome <i>c</i> Oxidase (CIV or COX).....	111
ATP Synthase (Complex V).....	112
Role of Mitochondrial Kinases in Energy and Nucleotide Homeostasis.....	112
Creatine Kinase	113
Nucleoside Diphosphate Kinase	113
Adenylate Kinase	113
Conclusions.....	114
Summary.....	115
References.....	116
6 Bioenergetics Interplay Between Cardiac Mitochondria and Other Subcellular Compartments.....	123
Introduction.....	123
Mitochondria/Nucleus Interactions.....	123
Mitochondria/Cytosol Interactions.....	127
Hormonal Regulation.....	131
Mitochondria and Peroxisomes Interactions.....	134
Role of Ca^{2+} Ions	134
Conclusions.....	137
Summary.....	137
References.....	139
Section II Heart Mitochondria Signal Transduction: Stem Cells	
7 Endothelial Mitochondria: Contribution to Cardiovascular Function and Disease	147
Introduction.....	147
Release of Vasodilators: Role of OXPHOS and $[\text{Ca}^{2+}]_m$	147
Role of Endothelial Mitochondria in the Generation of Reactive Oxygen Species	148
Role of Endothelial Mitochondria in the Generation of NO.....	150
Endothelial Mitochondria and Apoptosis	151
Conclusions.....	152
Summary.....	153
References.....	153
8 Heart Mitochondria: Receivers and Transmitters of Signals	157
Introduction.....	157
Mitochondria Signaling	157
Mitochondrial Bioenergetics	157
Mitochondrial Biogenesis	158

Signaling at the Mitochondria.....	159
Reactive Oxygen Species Generation and Signaling	159
Mitochondrial Receptors.....	159
Translocation of Proteins into Mitochondria	159
Mitochondrial Retrograde Signaling.....	159
Role of Calcium in Nuclear-Mitochondrial Cross Talk	160
Endoplasmic Reticulum	160
Key Players in Mitochondrial Signaling.....	160
Nuclear Gene Activation.....	160
Protein Kinases.....	161
Calcium Signaling.....	162
Mitochondrial K _{ATP} Channel	163
Mitochondrial Permeability Transition Pore.....	164
Survival and Stress Signals Impact Heart Mitochondria	165
Survival Signals.....	165
Stress Signals	167
Metabolic Signals and UCPs	167
Cardiomyopathy and Mitochondrial Signaling Defects	170
Mitochondrial Signaling in Myocardial Ischemia and Cardioprotection	170
Mitochondrial Signaling and Myocardial Hypertrophy.....	173
Survival Signals/Apoptosis	174
Future Prospects: Therapeutic Targets and Directions.....	174
Conclusions.....	175
Summary.....	175
References.....	176
9 Stem Cells and Mitochondria	183
Introduction.....	183
Stem Cell Types and Delivery Techniques	183
Allogenic Cell Types.....	184
Mechanisms of Stem Cell Self-Renewal and Pluripotency	187
Cell Cycle Regulation and Self-Renewal of Stem Cells	187
Molecular Circuit of Pluripotency	188
Mitochondrial Metabolism in Stem Cells.....	190
Mitochondria Number and Morphology	190
Mitochondrial DNA Dynamics	190
Mitochondrial Metabolism.....	190
Oxidative Stress in Stem Cells.....	191
Mitochondria-Mediated Apoptosis of Stem Cells.....	191
Conclusions.....	192
Summary.....	193
References.....	195
 Section III Stress and Cell Death	
10 Heart Mitochondrial ROS and Oxidative Stress.....	205
Introduction.....	205
Mitochondrial ROS Production	205
Effects of ROS on Cardiomyocytes	207
ROS and Cell Signaling	207
ROS and Cardiac Pathology.....	207
Oxidative Stress in Myocardial Ischemia and HF	210
ROS in the Aging Heart.....	211

Oxidative Stress and Apoptosis	214
Mitochondrial Nitric Oxide.....	214
Antioxidant Defenses.....	215
Antioxidant Therapy	216
Conclusions and Future Directions	218
Summary	218
References.....	219
11 Cell-Death Pathways and Mitochondria.....	225
Introduction.....	225
Apoptosis	225
Intrinsic (Mitochondrial) Pathway	225
Extrinsic Pathway.....	229
Necrosis.....	230
Autophagy.....	231
Cell Death in the Pathogenesis of Myocardial Disorders	233
Conclusions.....	234
Summary	235
References.....	237

Section IV Mitochondria in Pediatric Cardiology

12 Mitochondria in Pediatric Cardiovascular Diseases.....	245
Introduction.....	245
General Aspects of Mitochondria	245
Mitochondrial Cardiomyopathy.....	247
Cardioneuropathies and Mitochondrial Phenotype.....	250
Diagnosis.....	252
Clinical and Laboratory Findings in MCM.....	252
Histological and Electron Microscopic (EM) Analysis	252
Mitochondrial tRNA Mutations	256
Mitochondrial Structural Gene Mutations	257
ATP Synthase (ATPase6)	257
Cytochrome <i>b</i>	258
Mutations in COX and ND Subunits.....	258
MtDNA Depletion.....	258
Mitochondrial Changes in Congenital Heart Defects	259
Structural and Functional Cardiac Defects	259
Cardiac Dysrhythmias.....	259
Other Congenital Cardiomyopathies with Mitochondrial Defects.....	260
Congenital Heart Defects and Mitochondrial Function	262
Conclusions and Future Directions	262
Summary	263
References.....	265

Section V The Aging Heart and Mitochondria

13 Mitochondria in the Aging Heart	273
Introduction.....	273
Oxidative Stress and Aging.....	273
Oxidative Damage of Mitochondrial Proteins in Aging Heart	275
Role of Lipids in Age-Related Changes of Cardiac Mitochondria.....	275
Involvement of DNA Damage in Age-Related Mitochondrial Dysfunction	278

Loss of Cardiac Cells due to Chronic Exposure to Free Radicals in the Senescent Myocardium	279
Aging and Biogenesis of Mitochondria	280
Mitochondrial Dynamics in Aging	281
Telomeres	281
Cardiac Channelopathies	282
Conclusions	284
Summary	284
References	286

Section VI Mitochondria in Atherosclerosis, Hypertension and Ischemia

14 The Role of Mitochondria in Atherosclerosis	295
Introduction	295
Mitochondrial Dysfunction in Atherosclerosis	295
Oxidative Dysfunction	295
Oxidative Damage	297
Mitochondrial Dysfunction in Conditions Associated with Atherosclerosis	298
Diabetes Mellitus	298
Dyslipidemia	299
Conclusions	299
Summary	300
References	301
15 The Role of Mitochondria in Hypertension	305
Introduction	305
Mechanisms of ROS Generation and Mitochondrial Dysfunction	305
The Role of Mitochondrial Uncoupling Proteins	307
The Mitochondrial DNA and Oxidative Damage	308
Conclusions and Future Prospects	309
Summary	309
References	310
16 Role of Mitochondria in Ischemia and Cardioprotection	313
Introduction	313
Mitochondria in Ischemia and Reperfusion in the Heart	313
Impairment of Energy Metabolism	313
Impairment of Oxidative Metabolism	314
Alterations in Mitochondrial Calcium Homeostasis	315
Increased Generation of Reactive Oxygen Species	315
Mitochondrial Permeability Transition Pore Opening	315
ATP-Binding Cassette Mitochondrial Erythroid	317
Mitochondria and Cardioprotection	317
Mitochondria Self-Defense Mechanisms	317
Mitochondria-Directed Cardioprotection Strategies	318
MPTP Inhibition	318
Antioxidant and Inhibition of Monoamine Oxidase	319
Metabolic Approaches	319
Thioredoxin/Thioredoxin Reductase System	320
Conclusions	320
Summary	321
References	322

Section VII Mitochondria in Heart Failure and Dysrhythmias

17 Mitochondrial Dynamics in Health and Disease	329
Introduction	329
Mitochondrial Dynamics in Human Pathology	329
Autosomal Dominant Optic Atrophy	330
Charcot-Marie-Tooth Neuropathy	330
Charcot-Marie-Tooth Neuropathy Type 2A	330
Charcot-Marie-Tooth Neuropathy Type 4A	330
Abnormal Brain Development	330
The Wolf-Hirschhorn Syndrome	331
Obesity and Type 2 Diabetes	332
Mitochondrial Dynamics in the Normal and Failing Heart	332
Ischemia/Reperfusion Injury	333
Cardiomyopathies	334
Heart Failure	334
Diabetic Heart	335
Conclusions	336
Summary	336
References	339
18 Mitochondria Play an Essential Role in Heart Failure	343
Introduction	343
Mitochondrial Bioenergetics in HF	343
ATP Generation	343
Mitochondrial ROS Generation and Antioxidant Response	346
Critical Role of Mitochondrial Bioenergetic Enzymes and ROS in Animal Models of HF	348
Electron Transport Chain Respirasome in HF	350
Transgenic Models in the Study of Mitochondria	
Alterations in Heart Failure	354
Mitochondrial DNA and HF in Transgenic Mice	356
Peroxisome Proliferator-Activated Receptors- γ Coactivator 1 (PGC-1 α)	357
Peroxisome Proliferator-Activated Receptors	359
Defects in Cytosolic Proteins Can Cause HF with Mitochondrial Dysfunction	361
Calcium Signaling and Mitochondrial Function in HF	361
Mitochondrial Function and Apoptosis in HF	362
Mitochondrial Dynamics Function and Dysfunction in HF	362
Conclusions and Future Prospect	362
Summary	364
References	366
19 Mitochondria and Cardiac Dysrhythmias	371
Introduction	371
The Role of Sarcolemmal K _{ATP} Channels in Dysrhythmia	371
Metabolic Alterations	372
Permeability Transitional Pore	373
The Inner Membrane Anion Channel	374
The Mitochondrial K _{ATP} Channels	375
The Mitochondrial Calcium Uniporter	376
Mitochondrial Redox Status	377
Conclusions	378
Summary	378
References	379

Section VIII Mitochondria in Heart Metabolism

20 Diabetes and Cardiac Mitochondria	387
Introduction.....	387
Diabetes-Related Alterations in the Mitochondrial Metabolic Milieu	387
Role of Mitochondria-Derived ROS in Diabetic Myocardium.....	390
Apoptosis	391
Mitochondria and Activation of Metabolic Damaging Pathways.....	391
Diabetes and Cardiac Mitochondrial Calcium Handling	393
Maternally Inherited Diabetes and Deafness	393
Conclusions.....	393
Summary	395
References.....	396
21 The Role of Mitochondria in the Metabolic Syndrome and Insulin Resistance	401
Introduction.....	401
Mechanistic Development of Insulin Resistance:	
The Role of Mitochondria.....	401
Oxidative Stress and Mitochondrial Function	403
Insulin Resistance and Mitochondrial Biogenesis	403
Aging and Mitochondrial Function.....	405
Genetic Factors and Mitochondrial Function	405
Cardiovascular Metabolic Syndrome: Mitochondrial	
Bioenergetics and Biogenesis Defects	406
Conclusions.....	408
Summary	408
References.....	409
22 Thyroid Hormone and Myocardial Mitochondria.....	413
Introduction.....	413
Thyroid Hormone: Mechanisms of Regulation	
of Cardiac Mitochondria.....	413
Genomic Actions of Thyroid Hormone: Regulation of Expression	
of Nuclear-Encoded Mitochondrial Proteins.....	413
Thyroid Hormone Regulates Expression	
of Mitochondria-Encoded Proteins	415
Thyroid Hormone as a Nongenomic Regulator	
of Mitochondrial Protein/Enzyme Activities	416
Thyroid Hormone and Bioenergetics: Regulation of Mitochondrial	
Energy Production.....	416
Thyroid Hormone and Mitochondrial Biogenesis	419
Thyroid Hormone-Dependent Myocardial	
Hypertrophy and Mitochondria.....	421
Mitochondria Dynamics and Thyroid Hormones	421
Conclusions.....	422
Summary	422
References.....	423

Section IX Mitochondrial Therapy

23 Targeting the Mitochondria in Cardiovascular Diseases	431
Introduction.....	431
Treatment of Mitochondrial Respiratory and Metabolic Defects	431
Treatment with Antioxidants.....	432

Antioxidant Defense in Heart Failure/ROS Regulation of Signaling Pathways	434
Mitochondrial-Based Therapy of FAO Disorders, Dysrhythmias, and CHF	437
Cardioprotective Agents	438
Animal Models of Mitochondrial-Based Heart Disease	439
Mitochondrial Defects and Gene Therapy	441
Identification of Genetic Defects	441
Gene Therapy	441
Targeting the Mitochondria Using Nucleic Acids	443
Alternative Methods to Target Mitochondria with Bioactive Compounds	444
Stem Cells and Mitochondrial Defects	444
Conclusions and Future Perspectives	444
Summary	445
References	447

Section X Looking to the Future of Mitochondria and the Heart

24 Current Progress and Future Perspectives:	
Toward Mitochondrial Medicine	455
Introduction	455
mtDNA Mutations	455
nDNA Mutations	457
Defects in mtDNA Dynamics	457
Defects in mtDNA Translation	457
Defects in OXPHOS Complexes	457
Defects in Mitochondrial Dynamics	458
Defects in Other Nuclear Genes Controlling Mitochondrial Functions	458
Models for Mitochondrial Disorders	458
Yeast Models	458
Cytoplasmic Hybrid (Cybrid) Models	458
Mouse Models	459
Transmitochondrial Mice	459
Mouse Models with Targeted Nuclear Mitochondrial Genes	460
Diagnosis of Mitochondrial Disorders	461
Histological and Biochemical Screening	461
Molecular Genetic Screening	461
Next-Generation Sequencing	463
Mitochondrial Gene Profiling: Microarray Technologies	463
Mitochondrial Proteome	464
Conclusions and Future Trends	465
Summary	465
References	468
Glossary	475
Index	485

Mitochondria and Their Role in Cardiovascular Disease

Marín-García, J.

2013, XX, 500 p., Hardcover

ISBN: 978-1-4614-4598-2
