
Contents

1	Introduction	1
1.1	Need for Treatment	2
1.2	Need for Maintenance	3
1.3	Maintenance Challenges and Limitations	4
1.4	Assessment Strategies	5
1.4.1	Visual Inspection, Testing, and Monitoring	6
1.5	Need for This Book	7
1.6	About This Book	8
2	Impacts and Composition of Urban Stormwater	11
2.1	Impacts of Urban Stormwater	11
2.1.1	Flow and Channel Alteration	12
2.1.2	Nutrients	12
2.1.3	Metals	13
2.1.4	Chloride	14
2.1.5	Bacteria and Viruses	15
2.1.6	Temperature	17
2.1.7	Oxygen-Demanding Substances	18
2.1.8	Hydrocarbons	20
2.2	Composition of Urban Stormwater	21
3	Stormwater Treatment Processes	23
3.1	Physical Processes	24
3.1.1	Sedimentation	24
3.1.2	Filtration	27
3.1.3	Infiltration	28
3.1.4	Thermal Processes	29
3.2	Biological Processes	30
3.2.1	Degradation of Organic Matter	30
3.2.2	Denitrification	30
3.2.3	Plant Growth and Nutrient Uptake	31
3.3	Chemical Processes	32
3.3.1	Metals	32
3.3.2	Phosphate	33

4	Stormwater Treatment Practices	35
4.1	Sedimentation Practices	36
4.1.1	Dry Ponds	36
4.1.2	Wet Ponds	37
4.1.3	Underground Sedimentation Devices	38
4.2	Filtration Practices	39
4.2.1	Surface Sand Filters	40
4.2.2	Underground Sand Filters	42
4.2.3	Soil Filters	43
4.2.4	Hybrid Filters	43
4.2.5	Enhanced Sand Filters	44
4.3	Infiltration Practices	45
4.3.1	Infiltration Basins	45
4.3.2	Infiltration Trenches	46
4.3.3	Permeable Pavements	46
4.4	Biologically Enhanced Practices	48
4.4.1	Bioretention Practices	48
4.4.2	Bioinfiltration Practices	49
4.4.3	Biofiltration Practices	49
4.4.4	Constructed Wetlands	50
4.4.5	Filter Strips and Swales	50
5	Visual Inspection of Stormwater Treatment Practices	53
5.1	What Is Visual Inspection?	53
5.2	Common Visual Inspection Items	55
5.2.1	History	55
5.2.2	Access	56
5.2.3	Inlet and Outlet Structures	56
5.2.4	Multicomponent Systems	58
5.2.5	Water in the Practice	59
5.2.6	Illicit Discharges	60
5.2.7	Erosion and Sediment Deposition	60
5.2.8	Soil and Vegetation	63
5.2.9	Litter and Debris	64
5.2.10	Banks or Sides of Practices	64
5.3	Visual Inspection for Sedimentation Practices	65
5.3.1	Water in the Practice	66
5.3.2	Erosion and Sediment Deposition	66
5.3.3	Soil and Vegetation	67
5.3.4	Downstream Conditions	68
5.3.5	Structural Integrity	68
5.4	Visual Inspection for Filtration Practices	69
5.4.1	Water in the Practice	69
5.4.2	Erosion and Sediment Deposition	69
5.4.3	Downstream Conditions	70
5.4.4	Soil and Vegetation	70

5.5	Visual Inspection for Infiltration Practices	71
5.5.1	Water in the Practice	71
5.5.2	Erosion and Sediment Deposition	72
5.5.3	Soil and Vegetation	72
5.6	Visual Inspection for Biological Practices	73
5.6.1	Inlet and Outlet Structures	73
5.6.2	Water in the Practice	74
5.6.3	Soil and Vegetation	74
6	Capacity Testing of Stormwater Treatment Practices	77
6.1	Measuring Sedimentation	78
6.1.1	Measuring Sediment Surface Elevations	78
6.1.2	Scheduling Maintenance	79
6.1.3	Dry Ponds	79
6.1.4	Wet Ponds	80
6.1.5	Underground Sedimentation Devices	80
6.1.6	Constructed Wetlands	80
6.2	Measuring Infiltration/Filtration	81
6.2.1	Measuring Saturated Hydraulic Conductivity	82
6.2.2	Dry Ponds	83
6.2.3	Filtration Practices	85
6.2.4	Infiltration Basins	85
6.2.5	Infiltration Trenches	86
6.2.6	Permeable Pavements	86
6.2.7	Bioretention Practices (Rain Gardens)	86
6.2.8	Filter Strips and Swales	87
6.3	Case Study: Capacity Testing of Infiltration Rates at a Bioinfiltration Practice	87
6.3.1	Assessment Goals	88
6.3.2	Assessment Techniques	88
6.3.3	Assessment Results	90
6.3.4	Scheduling Maintenance	91
7	Synthetic Runoff Testing of Stormwater Treatment Practices	93
7.1	Measuring Sediment Retention	94
7.2	Measuring Infiltration/Filtration Rate	95
7.3	Finding an Adequate Water Source	96
7.4	Dry Ponds	102
7.4.1	Determining Pollutant Removal Efficiency	102
7.5	Wet Ponds	103
7.6	Underground Sedimentation Devices	105
7.6.1	Case Study: Synthetic Runoff Testing of an Underground Sedimentation Device	105
7.7	Filtration Practices	114

7.8	Infiltration Basins	117
7.9	Infiltration Trenches	118
7.10	Permeable Pavements	118
7.11	Scheduling Maintenance	119
8	Monitoring of Stormwater Treatment Practices	121
8.1	What Is Monitoring?	121
8.2	Monitoring Sedimentation Practices	122
8.2.1	Dry Ponds	123
8.2.2	Wet Ponds	123
8.2.3	Underground Sedimentation Devices	123
8.3	Monitoring Filtration Practices	124
8.4	Monitoring Infiltration Practices	125
8.4.1	Infiltration Basins	125
8.4.2	Infiltration Trenches	125
8.4.3	Permeable Pavements	126
8.5	Monitoring Biologically Enhanced Practices	126
8.5.1	Bioretention Practices (Rain Gardens)	127
8.5.2	Constructed Wetlands and Swales	127
8.5.3	Filter Strips	128
8.6	Case Study: Monitoring a Dry Detention Pond with Underdrains	128
8.6.1	Assessment Goals	130
8.6.2	Assessment Techniques	130
8.6.3	Assessment Results	132
8.6.4	Conclusions and Recommendations	133
8.7	Scheduling Maintenance	135
9	Water Budget Measurement	137
9.1	Water Budgets	138
9.2	Open Channel Flow	140
9.2.1	Weirs	143
9.2.2	Flumes	147
9.2.3	Recommendations for Open Channel Flow	148
9.3	Flow in Conduits	148
9.3.1	Closed Conduit Flow	148
9.3.2	Partially Full Conduits	149
9.4	Infiltration	153
9.4.1	Infiltration Measurement Devices	153
9.4.2	Comparison of Field Infiltrimeters	160
9.4.3	Recommendations for Measuring Infiltration	160
9.5	Rainfall	160
9.5.1	Recommendations for Measuring Rainfall	162

10	Water Sampling Methods	163
10.1	Representative Samples	166
10.2	Number of Storm Events	167
10.3	Samples Per Storm Events	169
10.3.1	Flow-Weighted, Time-Weighted, and User-Defined Sampling	170
10.3.2	Discrete and Composite Samples	175
10.4	In Situ, On-Site, and Grab, and Automatic Sampling	176
10.4.1	Temperature	177
10.4.2	pH or Hydrogen Ions	179
10.4.3	Conductivity	180
10.4.4	Turbidity	180
10.4.5	Dissolved Oxygen	181
10.4.6	Nutrients	181
10.5	Additional Considerations for Automatic Sampling	181
10.5.1	Automatic Sampling Equipment	181
10.5.2	Equipment Placement and Maintenance	182
10.5.3	Winter Sampling in Cold Climates	184
10.5.4	Automatic Sampling of Water Containing Suspended Solids	185
10.6	Sample Handling	191
10.7	Recommendations for Water Sampling Methods	192
11	Analysis of Water and Soils	193
11.1	Selecting Analytical Methods	193
11.2	Constituents in Water	194
11.2.1	Suspended Solids	195
11.2.2	Salinity-Related Variables	195
11.2.3	Natural Organic Matter	196
11.2.4	Phosphorus	196
11.2.5	Nitrogen	198
11.2.6	Algae Abundance	198
11.2.7	Metals	198
11.3	Soils	199
11.3.1	Soil Properties	200
11.3.2	Soil Constituents	205
11.4	Quality Assurance Program	207
11.4.1	Quality Control	207
11.4.2	Quality Assessment	208
11.4.3	Bias	209
11.4.4	Precision	210
11.4.5	Detection Limit	211
11.5	Implementation and Verification	212
11.6	Recommendations for Analysis of Water and Soils	214

12 Data Analysis	215
12.1 Data Analysis for Visual Inspection	215
12.2 Data Analysis for Capacity Testing	216
12.2.1 Assessment of Saturated Hydraulic Conductivity and Retention Time for Filtration Practices	216
12.2.2 Assessment of Saturated Hydraulic Conductivity and Retention Time for Infiltration Practices	220
12.2.3 Sediment Accumulation Testing	225
12.3 Data Analysis for Synthetic Runoff Testing	225
12.3.1 Assessment of Saturated Hydraulic Conductivity and Retention Time for Filtration Practices	226
12.3.2 Assessment of Saturated Hydraulic Conductivity and Retention Time for Infiltration Practices	229
12.3.3 Assessment of Volume Reduction for Infiltration Practices	233
12.3.4 Assessment of Pollutant Removal	234
12.4 Data Analysis for Monitoring	235
12.4.1 Assessment of Stormwater Volume Reduction	236
12.4.2 Assessment of Pollutant Removal	241
13 Maintenance of Stormwater Treatment Practices	265
13.1 Maintenance of Sedimentation Practices	267
13.1.1 Actions	267
13.1.2 Frequency, Effort, and Cost	270
13.1.3 Recommendations	272
13.2 Maintenance of Filtration Practices	272
13.2.1 Actions	272
13.2.2 Frequency, Effort, and Cost	274
13.2.3 Recommendations	275
13.3 Maintenance of Infiltration Practices	275
13.3.1 Actions	276
13.3.2 Frequency, Effort, and Cost	277
13.3.3 Recommendations	278
13.4 Maintenance of Biologically Enhanced Practices	279
13.4.1 Actions	279
13.4.2 Frequency, Effort, and Cost	281
13.4.3 Recommendations	283
Appendix A: Visual Inspection Checklists	285

Optimizing Stormwater Treatment Practices
A Handbook of Assessment and Maintenance
Erickson, A.J.; Weiss, P.T.; Gulliver, J.S.
2013, XII, 337 p., Hardcover
ISBN: 978-1-4614-4623-1
