

# Contents

<b>1</b>	<b>Introduction</b>	1
1.1	Small-Scale Versus Large-Scale Attacks	1
1.1.1	Small-Scale Attacks	1
1.1.2	Large-Scale Attacks	2
1.2	Physical Versus Logical Attacks	2
1.2.1	Physical Attacks	2
1.2.2	Logical Attacks	2
1.3	Random Versus Targeted Attacks	3
1.4	Geographically Concentrated Versus Distributed Attacks	3
1.5	Robustness Measure for Area Attacks	4
<b>2</b>	<b>System Models</b>	7
2.1	Network Models	7
2.2	Attack Model	7
<b>3</b>	<b>Link-Level Network Robustness to Area Attacks</b>	9
3.1	Average Probability of an Arbitrary Link being Attacked	9
3.1.1	The LCR Random Network Case	9
3.1.2	The Traditional Random Network Case	11
3.2	The Expected Number of Destroyed Links	11
3.2.1	The LCR Random Network Case	11
3.2.2	The Traditional Random Network Case	14
3.2.3	The Fixed Network Case	14
<b>4</b>	<b>Network-Wide Robustness to Area Attacks</b>	17
4.1	Properties of a Good Robustness Measure	17
4.2	The Percentage of Surviving Communication Pairs	18
4.3	Comparison Against Existing Measures	19
4.4	Robustness Study	21
<b>5</b>	<b>Simulation Results</b>	25
<b>6</b>	<b>Conclusion</b>	33
