

Contents

1	Introduction	1
1.1	Diabetes	1
1.2	Insulin	3
1.3	Glucagon-Likepeptide 1 (GLP 1).	5
1.4	Prodrug	9
	References	11
2	Application of Prodrug Chemistry to GLP-1.	15
2.1	Introduction	15
	References	21
3	Experimental Procedures	23
3.1	Peptide Synthesis (Boc Amino Acids/HF Cleavage)	24
3.2	Peptide Synthesis (Fmoc Amino Acids/HF Cleavage)	25
3.3	Depsipeptide Synthesis (Amino Ester Formation)	25
3.4	N-Terminal Hydroxyl Peptide Synthesis (α -Hydroxyl-N Terminal Extension).	26
3.5	HF Treatment of the Peptidyl-Resin.	27
3.6	Analysis Using Mass Spectrometry	28
3.7	High Pressure Liquid Chromatography (HPLC) Analysis	28
3.8	Preparative Purification Using HPLC.	29
3.9	Bioassay Experimental Design: Luciferase-Based Reporter Gene Assay for cAMP Detection	29
	References	29
4	Characterization of Prodrugs	31
4.1	GLP-Oxyntomodulin	31
4.2	Adding Dipeptides to the N-Terminus	33
4.3	Adding Dipeptides to the N-Terminus of F ⁷ , GLP(8-36)-CEX	36

4.4	Depsipeptides and Esters	39
4.5	Adding Dipeptides to the OH Terminus of HO-F ⁷ , GLP(8-36)-CEX	39
4.6	Bioassays of Selected Longer Acting Prodrug Candidates	50
	References	51
5	Conclusion.	53
	References	59
	Appendix I: Schematic Synthesis of Longer Acting Prodrugs	61
	Appendix II: Structure of Peptides in Table A.1.	65
	Appendix III: Structure of Peptides in Table A.2	69
	Appendix IV: Structure of Peptides in Table A.3	71
	Appendix V: Structure of Peptides in Table A.4.	73
	Appendix VI: Structure of Peptides in Table A.5	75
	Appendix VII: Structure of Peptides in Table A.6	79
	Appendix VIII: Acylation of HO-His⁷, GLP(8-37)	83
	Appendix IX: A Note on Nomenclature	87
	About the Author	89

Application of Peptide-Based Prodrug Chemistry in Drug
Development

De, A.

2013, XII, 89 p. 74 illus., 23 illus. in color., Softcover

ISBN: 978-1-4614-4874-7
