

Contents

1	Nanomechanics of Proteins, Both Folded and Disordered	1
	Rubén Hervás, Albert Galera-Prat, Àngel Gómez-Sicilia, Fernando Losada-Urzáiz, María del Carmen Fernández, Débora Fernández-Bravo, Elena Santana, Clara Barrio-García, Carolina Melero, and Mariano Carrión-Vázquez	
2	Force Spectroscopy and Recognition Imaging of Cells from the Immune System	49
	Bianca L. Bozna, Memed Duman, and Peter Hinterdorfer	
3	Catch Bonds of Integrin/Ligand Interactions	77
	Cheng Zhu and Wei Chen	
4	AFM Visualization of Protein–DNA Interactions	97
	Yuri L. Lyubchenko	
5	Nanovisualization of Proteins in Action Using High-Speed AFM	119
	Takayuki Uchihashi, Noriyuki Kodera, and Toshio Ando	
6	Enzyme Catalysis at the Single-Molecule Level	149
	Raul Perez-Jimenez and Jorge Alegre-Cebollada	
7	Single-Molecule Studies of Amyloidogenic Proteins	169
	Miklós S.Z. Kellermayer, Árpád Karsai, Ünige Murvai, Szilvia Erdélyi-Bótor, József Kardos, and Ricardo H. Pires	
8	Stretching and Imaging Individual Proteins on Live Cells Using Atomic Force Microscopy	211
	David Alsteens and Yves F. Dufrêne	
9	Individual Proteins Under Mechanical Stress: Lessons from Theory and Computer Simulations	235
	Dmitrii E. Makarov	
	Index	269

Single-molecule Studies of Proteins

Oberhauser, A.F. (Ed.)

2013, XIV, 274 p., Hardcover

ISBN: 978-1-4614-4920-1
