

# Contents

<b>1</b>	<b>Electroencephalography</b>	<b>1</b>
1.1	Introduction	1
1.2	Brief History of EEG	2
1.3	Recording of EEG Signals	5
1.3.1	Scalp EEG Recordings	5
1.3.2	Artifacts	6
1.3.3	Intracranial Recordings	7
1.3.4	Electrocorticography	8
1.3.5	Local Field Potentials	9
1.4	Evoked Potentials	9
1.4.1	Visual Evoked Potentials	10
1.4.2	Auditory Evoked Potentials	11
1.4.3	Somatosensory Evoked Potentials	11
1.5	Evoked Potentials and Cognition	11
1.5.1	Oddball Paradigm and the P300	12
1.5.2	Mismatch Negativity (MMN)	13
1.5.3	Omitted Evoked Potentials	13
1.5.4	Contingent Negative Variation (CNV)	14
1.5.5	N400	14
1.5.6	Error-related Negativity (ERN)	14
1.6	Basic Analysis of Evoked Potentials	14
1.6.1	Topography and Source Localization	16
1.6.2	Event-Related Oscillations	16
	References	17
<b>2</b>	<b>Frequency Analysis</b>	<b>21</b>
2.1	Introduction	21
2.2	The Continuous Fourier Transform	22
2.3	The Discrete Fourier Transform	23
2.4	Aliasing	24

2.5	Fast Fourier Transform .....	25
2.6	Power Spectrum .....	26
2.7	Leakage and Windowing.....	27
2.8	Variance of the Power Spectrum: Periodogram Averaging.....	29
2.9	Practical Remarks for Estimating the Power Spectrum of EEG Signals.....	29
2.10	Applications of EEG Frequency Analysis .....	31
2.10.1	EEG Frequency Bands .....	31
2.10.2	Topographic Analysis.....	33
2.11	Summary .....	34
	References.....	35
<b>3</b>	<b>Time-Frequency Analysis</b> .....	37
3.1	Introduction.....	37
3.2	Short-Time Fourier Transform.....	39
3.3	Uncertainty Principle .....	40
3.4	Measures Derived from the Spectrograms: Spectral Entropies .....	42
3.5	Time-Frequency Analysis of Grand Mal Seizures.....	44
3.5.1	Summary .....	47
	References.....	48
<b>4</b>	<b>Wavelets</b> .....	49
4.1	Introduction: Brief History .....	49
4.2	Basic Idea.....	50
4.3	Two Common Misconceptions .....	51
4.4	Choice of the Mother Wavelet .....	53
4.5	Wavelet Transform in the Analysis of Evoked Potentials.....	54
4.6	Summary: Cautionary Note .....	58
4.7	Appendices.....	59
4.7.1	Continuous and Dyadic Wavelet Transforms.....	59
4.7.2	Multiresolution Decomposition .....	62
	References.....	63
<b>5</b>	<b>Single-Trial Evoked Potentials: Wavelet Denoising</b> .....	65
5.1	Introduction: Single-Trial Evoked Potentials.....	65
5.2	Previous Approaches.....	67
5.3	Wavelet Denoising .....	68
5.4	Application to Auditory Evoked Potentials: Selective and Latency-Corrected Averages.....	72
5.5	Habituation and Sensitization .....	74
5.6	Single-Trial Correlates of Learning in Rats.....	76
5.7	The Learning Oddball Paradigm.....	78
5.8	Simultaneous EEG and fMRI Recordings: Role of Single-Trial Analysis .....	79

5.9	A New Mechanism of Sleep-Induced Learning Revealed by Single-Trial Analysis .....	80
5.10	Summary .....	84
	References .....	84
<b>6</b>	<b>Basic Concepts for Spatial Analysis .....</b>	<b>87</b>
6.1	Introduction .....	87
6.2	State Variables and Their Interrelations: Gains .....	89
6.2.1	State Variables: Axon Pulses Versus Dendritic Waves .....	89
6.2.2	State Variables: Microscopic Bits Versus Macroscopic Densities .....	91
6.2.3	State Variables: The Order Parameter .....	93
6.3	Temporal and Spatial Textures: Gaussianity .....	94
6.4	Stationarity of Spatial Patterns .....	97
6.4.1	Invariance of Analytic Frequency: The Hilbert Transform .....	98
6.4.2	Spatial Pattern Invariance of Analytic Amplitude .....	99
6.4.3	Estimating Broad-Spectrum Coherence .....	100
6.4.4	Spatial AM Pattern Classification .....	102
6.5	Linearity: Additivity and Proportionality .....	103
6.6	Ergodicity, Wave-to-Pulse Conversion, and Static Nonlinearity .....	106
6.7	Positive Feedback, Stability, and Point Attractor .....	110
6.8	Negative Feedback, Conditional Stability, and Limit Cycle Attractor .....	113
6.9	Criticality: Choice by Means of an Attractor Landscape .....	115
6.10	Summary .....	118
	References .....	119
<b>7</b>	<b>Image Sampling Based on Spectral Analysis .....</b>	<b>125</b>
7.1	Introduction .....	125
7.2	Search for the Spatial Grain of ECoG .....	126
7.3	Use of Macroscopic $PSD_T$ and $PSD_X$ to Define the Rest State .....	130
7.4	Null Spikes Revealed by Probability Distribution Function (PDF) .....	132
7.5	Evaluating Spatial Resolution with the Point Spread Function (PSF) .....	135
7.6	Search for the Spatial Grain of EEG .....	138
7.7	$PSD_X$ of EEG Plus EMG: Spatial Autocorrelation Function (SAF) .....	142
7.8	Summary .....	144
	References .....	145

<b>8</b>	<b>Allocortical ECoG Images Formed by Learning</b>	147
8.1	Introduction	147
8.2	The Temporal Structure of the Bulbar and Prepyriform ECoG	151
8.3	Spatiotemporal Images of Averaged Evoked Potentials	153
8.4	Spatial Images of Amplitude Modulation (AM Patterns) of ECoG	156
8.5	Spatial Images of Phase Modulation (PM Patterns) of ECoG Bursts	160
8.6	Transmission of Macroscopic Patterns to Other Areas of Cortex	164
8.7	Summary	167
	References	168
<b>9</b>	<b>Neocortical ECoG Images Formed by Learning</b>	173
9.1	Introduction	173
9.2	Initial finding of Classifiable AM Patterns in Neocortical ECoGs	174
9.3	High-Resolution of ECoG Amplitudes with the Hilbert Transform	177
9.3.1	Derivation of the Analytic Power, $A^2(t)$	177
9.3.2	Use of $H_\epsilon(t)$ as a Scalar Index of the Order Parameter	178
9.4	High-Resolution Images of Neocortical Phase Patterns	182
9.4.1	Derivation of the Phase Cones of Classifiable Bursts	182
9.4.2	Phase Structure of the Background Activity	185
9.5	High-Resolution Images of Analytic Phase Between Bursts	187
9.6	Cinematic Display of Temporal Dynamics of AM and PM Patterns	190
9.6.1	Vortices	190
9.6.2	Null Spikes	192
9.7	Mechanisms of AM/PM Pattern Formation and Dissolution	194
9.7.1	Piecewise Linear Approximations for Attractor Dynamics	194
9.7.2	A Possible Role for Singularity in Perception	196
9.8	Summary	198
	References	199
<b>10</b>	<b>ECoG and EEG Images in Higher Cognition</b>	203
10.1	Introduction	203
10.2	Categorization Versus Generalization in Concept Formation	205
10.3	Convergence of Percepts into Multisensory Gestalts	207
10.4	Demonstration of Classifiable AM Patterns in Human ECoG	211

10.5	Demonstration of Classifiable AM Patterns in Human Scalp EEG .....	214
10.6	Summary .....	219
	References .....	220
<b>11</b>	<b>Synthesis</b> .....	223
11.1	Introduction .....	223
11.2	Sensation to Perception by Phase Transition .....	226
11.3	Neurodynamics and Thermodynamics: The Carnot (Rankine) Cycle .....	230
11.4	Criticality and Phase Transitions: The Carnot Vapor Cycle .....	233
11.5	Transmission, Reception, and Readout of Bursts .....	236
11.6	Future Developments in Cortical Thermodynamics of Perception .....	238
11.7	Summary .....	240
	References .....	241
	<b>Index</b> .....	245

Imaging Brain Function With EEG  
Advanced Temporal and Spatial Analysis of  
Electroencephalographic Signals

Freeman, W.; Quiroga, R.Q.

2013, XXII, 250 p., Hardcover

ISBN: 978-1-4614-4983-6
