

# Contents

<b>1</b>	<b>Introduction</b>	1
1.1	Motivation	1
1.2	Background	2
1.3	Objectives of this Book	4
1.4	Book Outline	5
<b>2</b>	<b>Basic Concepts</b>	7
2.1	Receiver System Basics	7
2.1.1	Noise	7
2.1.2	Non-Linearity	9
2.1.3	Dynamic Range	11
2.2	Phase Modulation Basics	12
2.3	Phased-Array Basics	15
<b>3</b>	<b>Single and Multipath Receiver: A System Approach</b>	21
3.1	Translating ADC Parameters to RF Domain	21
3.1.1	ADC Model	22
3.1.2	ADC Noise	22
3.1.3	ADC Non-Linearity	24
3.2	Mapping ADC Parameters to System Design	26
3.3	Receiver System Optimization Method	29
3.3.1	Receiver Signal Flow Diagram	29
3.3.2	Optimization Method	31
3.4	Analog Beam-Forming	32
3.5	Digital Beam-Forming	37
3.6	General Case of Beam-Forming	40
3.7	Conclusion	42

<b>4</b>	<b>Two-Step Beam-Forming: Multiplexing Architecture. . . . .</b>	<b>45</b>
4.1	Multiplexing Architecture Introduction. . . . .	45
4.2	Spatial to Frequency Mapping. . . . .	48
4.3	Two Steps of Spatial Filtering. . . . .	48
4.4	Phased-Array Analog and Digital Co-Design . . . . .	49
4.5	Generalized Phased-Array System Design . . . . .	49
<b>5</b>	<b>Multiplexing Architecture, Ideal Behavior . . . . .</b>	<b>51</b>
5.1	Analog Multiplexing . . . . .	51
5.1.1	Properties of the Switching Signal . . . . .	52
5.1.2	Pulse Modulation . . . . .	53
5.1.3	Combination in the Analog Domain . . . . .	56
5.2	Spatial to Frequency Mapping. . . . .	57
5.2.1	Space to Frequency Mapping Coefficient $D_n$ . . . . .	57
5.2.2	Translation from Voltage to Power Domain, $D_n$ to $Px_n$ . .	61
5.2.3	Coarse Beam Pattern $Rx_N$ by Frequency Selectivity . . .	63
5.3	Digital De-multiplexing and Phase-Shifting . . . . .	65
5.4	Array Pattern . . . . .	69
5.5	Conclusion . . . . .	71
<b>6</b>	<b>Multiplexing Architecture, Non-Ideal Behavior . . . . .</b>	<b>73</b>
6.1	Angle Deviation . . . . .	73
6.2	Non-Ideal Switches . . . . .	74
6.3	Noise in a Multiplexing System . . . . .	77
6.4	Frequency Mixing . . . . .	78
6.5	System Simulations . . . . .	79
6.6	Power Flow Diagram for a Multiplexed Architecture. . . . .	80
6.7	Conclusion . . . . .	83
<b>7</b>	<b>Designs for the 30 GHz Components . . . . .</b>	<b>85</b>
7.1	Design Requirements . . . . .	85
7.2	LNA and Multiplexer. . . . .	86
7.2.1	Circuit Design . . . . .	86
7.2.2	Measurements. . . . .	87
7.3	LNA-Multiplexer-Mixer Combination . . . . .	90
7.3.1	Circuit Design . . . . .	90
7.3.2	Measurements. . . . .	91
7.4	Clock Generator . . . . .	93
7.4.1	Circuit Design . . . . .	93
7.4.2	Measurements. . . . .	94
7.5	Input Delay Line . . . . .	97
7.5.1	Circuit Design . . . . .	97
7.5.2	Measurements. . . . .	99

7.6	Power Amplifier . . . . .	100
7.6.1	Circuit Design . . . . .	100
7.6.2	Measurements. . . . .	102
7.6.3	Trouble Shooting . . . . .	103
7.7	Conclusion . . . . .	106
<b>8</b>	<b>System Integration and Verification . . . . .</b>	<b>107</b>
8.1	System with One Channel . . . . .	107
8.2	System with Four Channels . . . . .	109
8.2.1	Demonstration with One Input Signal . . . . .	110
8.2.2	Demonstration with Two Input Signals . . . . .	111
8.3	Conclusion . . . . .	115
<b>9</b>	<b>Conclusions . . . . .</b>	<b>117</b>
	<b>Summary . . . . .</b>	<b>121</b>
	<b>References . . . . .</b>	<b>123</b>

Time Multiplexed Beam-Forming with Space-Frequency  
Transformation

Deng, W.; Mahmoudi, R.; van Roermund, A.H.M.

2013, X, 126 p., Hardcover

ISBN: 978-1-4614-5045-0
