

# Contents

<b>1</b>	<b>Introduction . . . . .</b>	<b>1</b>
1.1	Sensors and Transducers . . . . .	1
1.2	Sensors Qualities . . . . .	2
1.3	Types of Transducers . . . . .	3
1.4	Sensors Applications . . . . .	6
1.5	About this Book . . . . .	9
<b>2</b>	<b>Sensors Characteristics . . . . .</b>	<b>11</b>
2.1	Introduction . . . . .	11
2.2	Static Characteristics . . . . .	12
2.2.1	Accuracy . . . . .	12
2.2.2	Precision . . . . .	12
2.2.3	Repeatability . . . . .	13
2.2.4	Reproducibility . . . . .	13
2.2.5	Stability . . . . .	13
2.2.6	Error . . . . .	14
2.2.7	Noise . . . . .	14
2.2.8	Drift . . . . .	16
2.2.9	Resolution . . . . .	17
2.2.10	Minimum Detectable Signal . . . . .	17
2.2.11	Calibration Curve . . . . .	17
2.2.12	Sensitivity . . . . .	17
2.2.13	Linearity . . . . .	18
2.2.14	Selectivity . . . . .	18
2.2.15	Hysteresis . . . . .	18
2.2.16	Measurement Range . . . . .	19
2.2.17	Response and Recovery Time . . . . .	19

2.3	Dynamic Characteristics . . . . .	19
2.3.1	Zero-Order Systems . . . . .	21
2.3.2	First-Order Systems . . . . .	21
2.3.3	Second-Order Systems . . . . .	26
2.4	Summary . . . . .	27
<b>3</b>	<b>Physical Transduction Effects . . . . .</b>	<b>29</b>
3.1	Introduction . . . . .	29
3.2	Electromagnetic Effects . . . . .	29
3.2.1	Electromagnetic Wave Spectrum . . . . .	33
3.3	Dielectric Effect . . . . .	35
3.4	Permeability Effect . . . . .	36
3.5	Photoelectric Effect . . . . .	37
3.6	Photoconductive Effect . . . . .	38
3.7	Photovoltaic Effect . . . . .	38
3.8	Photodielectric Effect . . . . .	40
3.9	Photoluminescence Effect . . . . .	41
3.9.1	Fluorescence and Phosphorescence . . . . .	41
3.9.2	Electroluminescence . . . . .	43
3.10	Hall Effect . . . . .	45
3.11	Thermoelectric (Seebeck/Peltier and Thomson) Effect . . . . .	47
3.12	Thermoresistive Effect . . . . .	49
3.13	Piezoresistive Effect . . . . .	50
3.14	Piezoelectric Effect . . . . .	51
3.15	Pyroelectric Effect . . . . .	52
3.16	Magnetostriction Effect . . . . .	54
3.17	Magnetoresistance Effect . . . . .	55
3.18	Doppler Effect . . . . .	57
3.19	Barkhausen Effect . . . . .	58
3.20	Nernst/Ettingshausen Effect . . . . .	58
3.21	Faraday and Voigt Rotation Effects . . . . .	59
3.22	Magneto-Optic Kerr Effect . . . . .	60
3.23	Kerr Effect . . . . .	61
3.24	Pockels Effect . . . . .	62
3.25	Summary . . . . .	62
	References . . . . .	62
<b>4</b>	<b>Transduction Platforms . . . . .</b>	<b>63</b>
4.1	Introduction . . . . .	63
4.2	Conductometric and Capacitive Transducers . . . . .	63
4.2.1	Conductometric Sensors . . . . .	64
4.2.2	Capacitive Sensors . . . . .	66

4.3	Optical Waveguide Based Transducers . . . . .	67
4.3.1	Propagation in an Optical Waveguide . . . . .	68
4.3.2	Sensitivity of Optical Waveguides . . . . .	71
4.3.3	Optical Fiber Based Transducers . . . . .	73
4.3.4	Interferometric Optical Transducers . . . . .	73
4.3.5	Surface Plasmon Resonance Transducers . . . . .	76
4.4	Spectroscopy Systems . . . . .	81
4.4.1	Ultraviolet–Visible and Infrared Spectroscopy . . . . .	82
4.4.2	UV–Visible Spectroscopy . . . . .	83
4.4.3	Photoluminescence Spectroscopy . . . . .	87
4.4.4	Infrared Spectroscopy . . . . .	89
4.4.5	Raman Spectroscopy . . . . .	93
4.4.6	Nuclear Magnetic Resonance Spectroscopy . . . . .	95
4.5	Electrochemical Transducers . . . . .	99
4.5.1	Chemical Reactions . . . . .	100
4.5.2	Chemical Thermodynamics . . . . .	101
4.5.3	Nernst Equation . . . . .	102
4.5.4	Reference Electrodes . . . . .	108
4.5.5	Membrane Electrodes . . . . .	110
4.5.6	An Example: Electrochemical pH Sensor . . . . .	112
4.5.7	An Example: Electrochemical-Based Gas Sensor . . . . .	112
4.5.8	Voltammetry . . . . .	113
4.6	Diffusion Current . . . . .	115
4.7	Capacitive Current . . . . .	118
4.7.1	Chronoamperometry (or Potential Step Voltammetry) . . . . .	118
4.8	Linear Sweep Voltammetry . . . . .	118
4.8.1	Cyclic Voltammetry . . . . .	122
4.8.2	An Example: Stripping Analysis . . . . .	124
4.9	Solid State Transducers . . . . .	124
4.9.1	p–n Diodes and Bipolar Junction Based Transducers . . . . .	125
4.9.2	Schottky Diode Based Transducers . . . . .	128
4.9.3	Field Effect Transistor Based Transducers . . . . .	129
4.10	Acoustic Wave Transducers . . . . .	133
4.10.1	Quartz Crystal Microbalance . . . . .	133
4.10.2	Film Bulk Acoustic Wave Resonator . . . . .	135
4.10.3	Cantilever-Based Transducers . . . . .	137
4.10.4	Interdigitally Launched SAW Devices . . . . .	140
4.11	Gyroscopes . . . . .	143
4.12	Summary . . . . .	146
	References . . . . .	148

<b>5 Organic Sensors</b> . . . . .	149
5.1 Introduction . . . . .	149
5.2 Surface Interactions . . . . .	150
5.2.1 Targeting and Anchoring Organic Molecules . . . . .	150
5.2.2 Self-Assembly . . . . .	153
5.3 Surface Modification for Biosensing . . . . .	155
5.3.1 Gold and Other Metallic Surfaces . . . . .	155
5.3.2 Silicon, Silicon Dioxide, and Metal Oxides Surfaces . . . . .	156
5.3.3 Carbon Surfaces . . . . .	158
5.3.4 Conductive and Nonconductive Polymeric Surfaces . . . . .	160
5.4 Proteins Incorporated in Sensing Platforms . . . . .	161
5.4.1 Structure of Proteins . . . . .	162
5.4.2 Proteins Functions . . . . .	166
5.4.3 Proteins in Sensing Applications . . . . .	167
5.4.4 Antibodies in Sensing Applications . . . . .	168
5.4.5 Enzymes in Sensing Applications . . . . .	172
5.4.6 Transmembrane Sensors . . . . .	174
5.5 Sensors Based on Nucleotides and DNA . . . . .	178
5.5.1 The Structure of DNA . . . . .	179
5.5.2 The Structure of RNA . . . . .	182
5.5.3 DNA Decoders and Microarrays . . . . .	182
5.6 Summary . . . . .	189
References . . . . .	189
<b>Index</b> . . . . .	191

Sensors

An Introductory Course

Kalantar-zadeh, K.

2013, XII, 196 p., Hardcover

ISBN: 978-1-4614-5051-1
