

Contents

1	Introduction to Neurophysiology	1
	Paul A. Iaizzo	
2	Brain–Computer Interfaces	87
	Bin He, Shangkai Gao, Han Yuan, and Jonathan R. Wolpaw	
3	Neurorobotics: Opening Novel Lines of Communication Between Populations of Single Neurons and External Devices	153
	Karen A. Moxon	
4	Decoding Algorithms for Brain–Machine Interfaces	223
	Austin J. Brockmeier and José C. Príncipe	
5	EEG Signal Processing: Theory and Applications	259
	Nitish V. Thakor and David L. Sherman	
6	Neural Modeling	305
	Michael N. Economo, Joan J. Martinez, and John A. White	
7	Neural Modelling: Neural Information Processing and Selected Applications	349
	Carmen C.Y. Poon, Yali Zheng, and Yuan-Ting Zhang	
8	Bidomain Modeling of Neural Tissue	389
	S. Yin, S. Dokos, and N.H. Lovell	
9	Transcranial Magnetic Stimulation	405
	Todd Krieg and David J. Mogul	
10	Managing Neurological Disorders Using Neuromodulation	455
	Chima O. Oluigbo, Mariel Szapiel, and Ali R. Rezai	
11	Functional Magnetic Resonance Imaging	473
	John A. Sexton, Gopikrishna Deshpande, Zhihao Li, Christopher B. Glielmi, and Xiaoping P. Hu	

12	Electrophysiological Mapping and Neuroimaging	499
	Bin He and Lei Ding	
13	Exploring Functional and Causal Connectivity in the Brain	545
	Mingzhou Ding and Bin He	
14	Retinal Bioengineering	565
	Robert A. Linsenmeier and John B. Troy	
15	Retinal Prosthesis	635
	James Weiland and Mark Humayun	
16	Neural Interfacing with the Peripheral Nervous System: A FINE Approach	657
	Dominique M. Durand, Brian Wodlinger, and HyunJoo Park	
17	Seizure Prediction	685
	Hyong C. Lee, Michael H. Kohrman, Kurt E. Hecox Wim van Drongelen	
18	Reverse Engineering the Brain: A Hippocampal Cognitive Prosthesis for Repair and Enhancement of Memory Function	725
	Theodore W. Berger, Dong Song, Vasilis Z. Marmarelis, Jeff LaCoss, Jack Wills, Greg A. Gerhardt, John J. Granacki, Robert E. Hampson, and Sam A. Deadwyler	
19	Neural Tissue Engineering	765
	Lohitash Karumbaiah and Ravi Bellamkonda	
	Index	795
