

Contents

1	Forecasting: Its Purpose and Accuracy	1
	Forecast Rationality	3
	Absolute and Relative Forecast Accuracy	8
	Appendix	14
	Exponential Smoothing	14
	References	17
2	Regression Analysis and Forecasting Models	19
	Examples of Financial Economic Data	25
	Autocorrelation	28
	Multiple Regression	32
	The Conference Board Composite Index of Leading Economic Indicators and Real US GDP Growth:	
	A Regression Example	36
	Summary	42
	Appendix	42
	Leading Index Components	43
	References	44
3	An Introduction to Time Series Modeling and Forecasting	47
	Basic Statistical Properties of Economic Series	48
	The Autoregressive and Moving Average Processes	51
	ARMA Model Identification in Practice	57
	Modeling Real GDP: An Example	61
	Leading Economic Indicators and Real GDP Analysis:	
	The Statistical Evidence, 1970–2002	63
	US and G7 Post-sample Real GDP Forecasting Analysis	69
	Summary	71
	References	71

4	Regression Analysis and Multicollinearity: Two Case Studies	73
	The First Example: Combining GNP Forecasts	78
	The Second Example: Modeling the Returns of the US Equities	82
	Summary and Conclusions	91
	References	92
5	Transfer Function Modeling and Granger Causality Testing	97
	Testing for Causality: The Ashley et al. (1980) Test	97
	Quarterly Mergers, 1992–2011: Automatic Time Series Modeling and an Application of the Ashley et al. (1980) Test	102
	Causality Testing: An Alternative Approach by Chen and Lee	111
	Causality Analysis of Quarterly Mergers, 1992–2011: An Application of the Chen and Lee Test	117
	Money Supply and Stock Prices, 1967–2011	139
	References	142
6	A Case Study of Portfolio Construction Using the USER Data and the Barra Aegis System	145
	The BARRA Model: The Primary Institutional Risk Model	148
	Stock Selection Modeling	162
	Efficient Portfolio Construction Using the Barra Aegis System	163
	DMC Model III Calculation	170
	Conclusions	171
	References	171
7	More Markowitz Efficient Portfolios Featuring the USER Data and an Extension to Global Data and Investment Universes	175
	Constructing Efficient Portfolios	177
	Extensions to the Traditional Mean–Variance Model	179
	Portfolio Construction, Management, and Analysis: An Introduction to Tracking Error at Risk	179
	Portfolio Construction, Management, and Analysis: An Introduction to Systematic Tracking Error Optimization	186
	Markowitz Restored: The Alpha Alignment Factor Approach	191
