Foreword	ix
Introduction	xi
October 21, 2011	xiii
 Part One – Soyuz in the East	1
by Christian Lardier	
 Chapter 1 – The V-2’s heir	3
Taking over the V-2 missiles	5
The gunners learn to use rockets	6
The Soviets in Germany	10
The Berlin and Nordhausen institutes	11
The Germans in the Soviet Union	16
The decree of May 13, 1946.	18
Institute N°88	20
The first ballistic rockets	22
Korolev’s rockets.	25
The first strategic missile	29
Constructing Baikonur	37
The construction army.	40
The decree of April 14, 1955	41
 Chapter 2 – Designing the Semyorka	43
The Semyorka launch platform	48
The launch	53
The tracking network	55
Development of the Semyorka.	56
The R-7A	61
The first “Sputnik”	65

Chapter 3 – The council of Chief Designers	71
The father of the Semyorka	71
Taming the fire	82
The upper stage engines	86
Father of the “Beep-Beep”	88
Telemetry and trajectography	92
Guidance systems	94
Gyroscopes	96
Launch platforms	99
Chapter 4 – Korolev’s subsidiaries	105
Dmitri Kozlov	106
“Progress” plant N ^o 1	111
Plant N ^o 24 “Motorostroitel”	118
TsSKB satellites	119
Chapter 5 – The various versions	137
The R-7/R-7A ICBM	137
The three-stage 8K72	140
The four-stage 8K78 “Molniya”	146
8K78M	153
8A91	157
8A92	157
8A92M	157
11A55 and 11A56	159
11A57	160
11A58	163
11A59	163
11A510	165
11A511	165
Soyuz-2 “Rus”	175
Yamal	178
Aurora	179
Onega	181
Soyuz-2-3	182
Soyuz-1	184
Conclusion	184
Chapter 6 – The launch bases	187
Baikonur	187
Plesetsk	196

Part Two – Soyuz in the West	205
by Stefan Barensky	
Chapter 7 – A fantasy launcher	207
Wave of panic	211
Phantom threat	213
Misleading displays	216
Missiles on Red Square	219
CIA seeking intelligence	221
Paranoia in Washington	224
The great revelation	229
What's that rocket called?	232
From fantasy to icon	235
Chapter 8 – East meets West	237
Commercial efforts in the West	240
One world ends, another begins	243
Blossoming of the constellations market	246
Launchers to complement Ariane	249
Powder fizzles out	252
Chapter 9 – The genesis of Starsem	257
New deal in Samara	260
A French proposal	263
From Irene to Ikar	265
Breaking out of the circle	267
New rules of the game	270
Objective Globalstar	272
The politicians come on stage	276
Arianespace faced with a dilemma	278
Starsem is born	280
Chapter 10 – Europeans on the steppe	285
Accommodating satellites and teams	286
Seeking new customers	289
A resurrection and a death	290
“One man's loss is another man's gain”	293
Fregat makes its appearance	296
Market collapse	303
Time for a change	304
Chapter 11 – Russians in the jungle	317
Glut of launch sites	318
Kourou in sight	320
A tropical, cryogenic Soyuz	321

Political games and stakes	323
Aussie poker	326
From Elysée to Edinburgh.	328
The tables are turned.	329
Meeting in Paris	330
Money makes the world go round.	332
A construction site in Guiana	335
 Chapter 12 – Soyuz, launcher of the future	 349
From the Soyuz launcher to the Soyuz spacecraft in Guiana	352
Towards the 2,000th flight?	365
3, 2-3, 1: the final countdown?	367
The mirage of a Euro-Russian spacecraft.	368
Post-Soyuz in Russia	370
Post-Soyuz in Europe	372
 Annexes	 377
Chapter notes.	389
Semyorka launches.	405
Bibliography.	465
Index of names.	473
Photo credits	485

The Soyuz Launch Vehicle

The Two Lives of an Engineering Triumph

Lardier, C.; Barensky, S.

2013, XII, 500 p. 233 illus., 111 illus. in color., Softcover

ISBN: 978-1-4614-5458-8
