## Part I The Immunogenicity of Stem Cells

<b>1</b>	<b>Mechanisms of Immune Rejection of Stem Cell-Derived Tissues: Insights from Organ Transplantation . . . . .</b>	<b>3</b>
	Eleanor M. Bolton and J. Andrew Bradley	
<b>2</b>	<b>The Immunogenicity of ES Cells and Their Differentiated Progeny . . . . .</b>	<b>37</b>
	Jeremy I. Pearl and Joseph C. Wu	
<b>3</b>	<b>Interaction of Embryonic Stem Cells with the Immune System . . .</b>	<b>49</b>
	Cody A. Koch and Jeffrey L. Platt	
<b>4</b>	<b>The Role of NK Cells and T Cells in the Rejection of Embryonic Stem Cell-Derived Tissues . . . . .</b>	<b>69</b>
	Bob Miyake and Nicholas Zavazava	
<b>5</b>	<b>Mitigating the Risk of Immunogenicity in the Pursuit of Induced Pluripotency . . . . .</b>	<b>77</b>
	Paul J. Fairchild and Naoki Ichiryu	
<b>6</b>	<b>Thymic Involution: A Barrier or Opportunity for Cell Replacement Therapy? . . . . .</b>	<b>95</b>
	Simon Hackett and Paul J. Fairchild	

## Part II Strategies for Overcoming Rejection of Stem Cell Grafts

<b>7</b>	<b>Construction of Human Embryonic Stem Cell Banks: Prospects for Tissue Matching . . . . .</b>	<b>111</b>
	Ge Lin, Qi Ou-Yang, Xiaobing Qian and Guangxiu Lu	

<b>8</b>	<b>Generation of Histocompatible Tissues via Parthenogenesis . . . . .</b>	<b>129</b>
	Paula W. Lampton, Judith A. Newmark and Ann A. Kiessling	
<b>9</b>	<b>Prospects for Designing ‘Universal’ Stem Cell Lines . . . . .</b>	<b>147</b>
	James C. Cicciarelli, Nathan A. Lemp and Noriyuki Kasahara	
<b>10</b>	<b>The Immunosuppressive Properties of Adult Stem Cells: Mesenchymal Stem Cells as a Case Study . . . . .</b>	<b>175</b>
	Francesco Dazzi and Ilaria Marigo	
 <b>Part III Induction of Immunological Tolerance</b>		
<b>11</b>	<b>The Immunogenicity of Stem Cells and Thymus-Based Strategies to Minimise Immune Rejection . . . . .</b>	<b>201</b>
	Jessica Morison, Tracy Heng, Ann Chidgey and Richard Boyd	
<b>12</b>	<b>The Induction of Mixed Chimerism Using ES Cell-Derived Hematopoietic Stem Cells . . . . .</b>	<b>225</b>
	Francesca Milanetti, You-Hong Cheng and Richard K. Burt	
<b>13</b>	<b>Prospects for the Induction of Transplant Tolerance Using Dendritic Cells . . . . .</b>	<b>257</b>
	Matthew Buckland, Lesley Smyth, Robert Lechler and Giovanna Lombardi	
<b>14</b>	<b>Strategies for the Induction of Tolerance with Monoclonal Antibodies . . . . .</b>	<b>279</b>
	Luis Graca	
<b>15</b>	<b>Induction of Immunological Tolerance to Transgene Products . . .</b>	<b>297</b>
	Brandon K. Sack, David M. Markusic and Roland W. Herzog	
<b>16</b>	<b>Addressing the Challenge of Autoimmunity in the Treatment of Diabetes with Stem Cells . . . . .</b>	<b>313</b>
	Karen English and Kathryn J. Wood	
	<b>About the Editor . . . . .</b>	<b>331</b>
	<b>Index . . . . .</b>	<b>333</b>
