

# Contents

<b>1</b>	<b>Introduction</b>	<b>1</b>
1.1	Background: Definition and History	1
1.2	Relevance of Thermodiffusion	2
1.3	Studies in Thermodiffusion	2
1.4	Founding Principles of Thermodiffusion Formalisms	3
1.5	The Subtle Nature of Thermodiffusion: The Undesirable Convective Forces	5
1.6	Topics of This Book	6
	References	7
<b>2</b>	<b>Thermodiffusion Models</b>	<b>11</b>
2.1	Linear Nonequilibrium Thermodynamic Theory	11
2.1.1	Phenomenological Equations	12
2.2	Method 1: Thermodiffusion Models Based on LNET Theory	13
2.2.1	The Net Heat of Transport	15
2.2.2	Equation of State	15
2.2.3	Binary Liquid Mixtures	21
2.2.4	Ternary Liquid Mixtures	29
2.3	Method 2: Simple Algebraic Expressions to Quantify Thermodiffusion	32
2.3.1	Liquid Hydrocarbon Mixtures	32
2.3.2	Liquid Polymer Mixtures	38
2.3.3	Colloidal Mixtures	40
2.4	Method 3: Neurocomputing Models to Study Thermodiffusion	43
2.4.1	What are Neural Networks?	43
2.4.2	Why Artificial Neural Networks?	45
2.4.3	Theoretical Formalisms	45
	References	53

<b>3</b>	<b>Application of LNET Models to Study Thermodiffusion</b>	57
3.1	Liquid Hydrocarbon Mixtures	57
3.1.1	Binary Hydrocarbon Mixtures	57
3.1.2	Ternary Hydrocarbon Mixtures	58
3.2	Liquid Associating Mixtures	59
3.3	Dilute Polymer Mixtures	59
3.4	Molten Metal Mixtures	61
3.5	Effect of the Equation of State	62
	References	64
<b>4</b>	<b>CFD Studies in Thermodiffusion</b>	65
4.1	Introduction	65
4.2	Problem Setup and Governing Equations	66
4.2.1	Source Terms in Momentum Equation	68
4.3	Case Studies	70
4.3.1	Case A: Methane–n-Butane–n-Dodecane Mixture	70
4.3.2	Case B: Water–Isopropanol Mixture	71
4.4	Relevance of Accurate Density and Viscosity Models	73
4.4.1	Density Calculations	73
4.4.2	Viscosity Calculations	75
	References	76
<b>5</b>	<b>Application of Algebraic Correlations to Study Thermodiffusion</b>	77
5.1	Binary Liquid Mixtures	77
5.1.1	Binary n-Alkane Mixtures	77
5.1.2	Binary Polymer Mixtures	79
5.1.3	Binary Colloidal Mixtures	80
5.2	Ternary Mixtures	82
	References	85
<b>6</b>	<b>Application of Neurocomputing Models to Study Thermodiffusion</b>	87
6.1	Neural Network Studies in Thermodiffusion	87
6.1.1	Thermodiffusion in Binary Liquid Metals	87
6.1.2	Thermodiffusion in Binary Liquid Hydrocarbon Mixtures	92
6.2	Sensitivity and Diversity of the Parameters	97
6.3	Comparison with Other Approaches to Study Thermodiffusion	99
6.3.1	Binary Molten Metal Mixtures	99
6.3.2	Binary n-Alkane Mixtures	100
6.4	Concluding Remarks	101
6.4.1	Extension to Multicomponent Systems	101
6.4.2	Small Database Size	101
	References	102
	<b>Index</b>	105

Thermodiffusion in Multicomponent Mixtures  
Thermodynamic, Algebraic, and Neuro-Computing  
Models

Srinivasan, S.; Saghir, M.Z.

2013, XI, 106 p. 41 illus., 5 illus. in color., Softcover

ISBN: 978-1-4614-5598-1
