

CONTENTS

1. Introduction	1
Part 1. Elliptic Moduli	9
2. Elliptic Modules: Analytic Definition	11
3. Elliptic Modules: Algebraic Definition	17
4. Elliptic Modules: Geometric Definition	27
5. Covering Schemes	37
Part 2. Hecke Correspondences	43
6. Deligne's Conjecture and Congruence Relations	45
6.1. ℓ -Adic Cohomology	45
6.2. Congruence Relations	55
Part 3. Trace Formulae	65
7. Isogeny Classes	67
8. Counting Points	73
9. Spherical Functions	79
Part 4. Higher Reciprocity Laws	91
10. Purity Theorem	93
11. Existence Theorem	105
12. Representations of a Weil Group	113
12.1. Weil Groups	113
12.2. ℓ -Adic Representations	115
12.3. ε -Factors	117
12.4. Product L -Functions of Generic Representations of $GL(n)$	119
12.5. Correspondence	123
12.6. Smooth Sheaves	126
12.7. Local and Global Correspondence	131
13. Simple Converse Theorem	139
13.1. Introduction	139
13.2. Generic Representations	140
13.3. The Global Functions U and V	142
13.4. The Integrals I and Ψ	144
13.5. Proof of the Simple Converse Theorem	146
References	149
Index	153
