

# Contents

<b>1</b>	<b>The Sheffer A-Type 0 Orthogonal Polynomial Sequences and Related Results</b> .....	1
1.1	Preliminaries .....	1
1.2	Sheffer’s Analysis of the Type 0 Polynomial Sequences .....	3
1.3	The Type 0 Orthogonal Polynomials .....	14
1.4	An Overview of the Classification of Type .....	21
1.4.1	The Sheffer A-Type Classification .....	21
1.4.2	The Sheffer B-Type Classification .....	22
1.4.3	The Sheffer C-Type Classification .....	25
1.4.4	A Summary of the Rainville $\sigma$ -Type Classification .....	26
1.5	A Brief Discussion of Meixner’s Analysis .....	28
1.5.1	Al-Salam’s Extension of Meixner’s Characterization .....	32
	References .....	32
<b>2</b>	<b>Some Applications of the Sheffer A-Type 0 Orthogonal Polynomial Sequences</b> .....	35
2.1	Preliminaries .....	35
2.2	Differential Equations Part I: The “Inverse Method” .....	38
2.3	Differential Equations Part II .....	41
2.4	Difference Equations .....	56
2.5	Gaussian Quadrature .....	60
2.6	Problems .....	65
	References .....	66
<b>3</b>	<b>A Method for Analyzing a Special Case of the Sheffer B-Type 1 Polynomial Sequences</b> .....	67
3.1	Preliminaries .....	67
3.2	The Formulation of Our Main Problem .....	68
3.3	The B-Type 1 Recursion Coefficients .....	71
3.4	Lower-Order B-Type 1 Polynomials Obtained via Generating Function .....	77

3.5	Lower-Order B-Type 1 Polynomials Obtained via Three-Term Recurrence Relation.....	80
3.6	Managing the Complexity of the Sheffer B-Type 1 Class.....	88
3.7	The Solutions of the Simultaneous, Nonlinear, Algebraic System ...	95
3.8	On the Verification of Solutions via Computer Algebra .....	101
3.9	Conclusion and Future Considerations.....	104
	References .....	106
