1	The Ice Cream Industry	1
	Introduction.....	1
	The Changing Characteristics of the Industry	2
	Production and Consumption Trends.....	3
	A Brief History of Ice Cream.....	9
	Overview of Ice Cream Composition and Manufacture	14
	References.....	17
2	Composition and Formulations	19
	Introduction.....	19
	Descriptions of Commercial Frozen Desserts.....	22
	Ice Cream and Related Products	22
	Fermented Products	27
	Sherbets and Related Products.....	28
	Ices and Related Products	28
	Novelties	28
	Drinks.....	29
	Complexities of Composition	29
	Energy Value and Nutrients	31
	Energy (Caloric) Content	32
	Protein Content	35
	Fat Content.....	35
	Carbohydrate Content	36
	Mineral Content	37
	Vitamin Content	38
	Palatability and Digestability	38
	The Balanced Mix.....	38
	Nutrition Labeling Based on Composition	39
	Reference	44

3	Mix Ingredients	45
	Introduction	45
	Composition of Milk	45
	Fat Ingredients	51
	Milk Fat	52
	Nondairy Fats	54
	Fat Replacers	57
	Milk Solids-Not-Fat/Protein Ingredients	60
	Concentrated Milks	61
	Dried Skim and Whole Milk	62
	Whey Products	62
	Milk Powder Blends	63
	Other Milk Solids-Not-Fat Ingredients	64
	Nondairy Protein Ingredients	65
	Sources of Water	65
	Potable Water	65
	Milk, Skim Milk, and Buttermilk	66
	Sweeteners	66
	Sucrose: Crystalline and Liquid	68
	Corn Sweeteners	69
	Maple and Brown Sugars	71
	Honey	71
	Sugar Alcohols	72
	Nonnutritive Sweeteners	73
	Stabilizers	75
	Characteristics of Individual Stabilizer Ingredients	78
	Ice Structuring Proteins	80
	Propylene Glycol Monoesters	81
	Emulsifiers	82
	Characteristics of Individual Emulsifier Ingredients	83
	Mineral Salts	84
	References	85
4	Flavoring and Coloring Materials	89
	Introduction	89
	Vanilla	93
	Natural Vanilla Flavor	93
	Consistency in Vanilla Quality	94
	Artificial Vanilla Flavor	95
	Vanilla Ice Cream	95
	Chocolate and Cocoa	96
	Processing Cocoa Beans	97
	Chocolate Ice Cream	99
	Preparing Chocolate Syrup	101
	Chocolate Confections	102

Flavoring Ingredients	103
Color in Frozen Desserts.....	105
Particulate Inclusions	106
Fruits	106
Nuts	112
Bakery Pieces.....	114
Candy Pieces	114
Variegates.....	115
Ice Cream with Complex Flavors	115
Defects in Flavoring Systems	118
References.....	119
5 Mix Processing and Properties	121
Introduction.....	121
Mix Processing.....	121
Combining the Ingredients.....	122
Pasteurization.....	126
Homogenization.....	134
Aging.....	139
Packaging for Sale	140
Flavoring	140
Physical Properties of Mixes.....	141
Mix Stability	142
Density	143
Acidity of Mixes	143
Mix Viscosity	144
Interfacial Characteristics	145
Freezing Point	147
Specific Heat	149
Ice Cream Defects Originating from Mix Composition	149
References.....	153
6 Calculation of Ice Cream Mixes	155
Introduction.....	155
Mix Formulation Software.....	155
Mathematical Processes most Frequently Used.....	156
Standardizing Milk and Cream	157
Algebraic Mass Balance	157
Use of the Pearson Square for Standardizing Cream and Other Milk Products.....	158
Mix Formulation Calculations	159
Mix Decisions	160
Simple Mixes	161
Complex Mixes	162
Restandardizing Ice Cream Mixes	178

Freezing Point Depression Calculations	179
Freezing Point Depression of a Mix	181
Freezing Curves	183
Overrun Calculations	184
Determining Manufacturing Overrun by Volume, no Particulates	185
Determining Manufacturing Overrun by Volume, with Particulates	187
Determining Package Overrun by Weight, no Particulates	187
Determining Mix Density	189
Determining Target Package Weights, no Particulates	189
Determining Target Package Weights, with Particulates	190
References	191
7 Freezing and Refrigeration	193
