

# Contents

<b>1</b>	<b>Engineering Risk . . . . .</b>	<b>1</b>
1.1	Risks and Uncertainty Everywhere . . . . .	1
1.2	Many Risks . . . . .	4
1.2.1	Globalization and Risk . . . . .	4
1.2.2	Space and Risk . . . . .	5
1.2.3	Catastrophic Risks . . . . .	5
1.2.4	Debt, Credit and Counter-Party Risk . . . . .	8
1.3	Industry and Other Risks: Deviant or Money . . . . .	11
1.3.1	Technology and Risks . . . . .	11
1.3.2	Technology and Networking . . . . .	12
1.3.3	Technology and Cyber Risks . . . . .	13
1.3.4	Example: Technology Risks, Simplicity and Complexity Risk Mitigation . . . . .	13
1.4	Quality, Statistical Controls and the Management of Quality . . . . .	14
1.5	Health and Safety Risks . . . . .	16
1.6	Finance and Risk . . . . .	18
1.6.1	The Risks of Certainty . . . . .	18
1.6.2	The Risks of Complexity . . . . .	19
1.6.3	The Risks of Regulation (and Non Regulation) . . . . .	19
1.6.4	Micro-Macro Mismatch Risks and Politics . . . . .	19
1.6.5	Risk and Incomplete Markets . . . . .	21
1.6.6	Risk Models and Uncertainty . . . . .	22
1.7	Corporate Risks . . . . .	23
1.8	Risk and Networked Firms . . . . .	26
1.8.1	Information Asymmetry . . . . .	27
1.9	Risks—Many Reasons, Many Origins . . . . .	28
<b>2</b>	<b>Risk Management Everywhere . . . . .</b>	<b>33</b>
2.1	Elements of Applied Risk Management: A Summary . . . . .	33
2.2	Risk Management, Value and Money . . . . .	34

2.2.1	Insurance Actuarial Risk . . . . .	36
2.2.2	Finance and Risk . . . . .	37
2.3	Industry Processes and Risk Management . . . . .	40
2.4	Marketing and Risk Management . . . . .	44
2.4.1	Reputation Risks . . . . .	44
2.4.2	Advertising Claims and Branding Risks . . . . .	45
2.4.3	IPO, Reputation and Risks . . . . .	46
2.5	Externalities and Risks Management . . . . .	49
2.6	Networks and Risks . . . . .	50
<b>3</b>	<b>Probability Elements: An Applied Refresher . . . . .</b>	<b>57</b>
3.1	Introduction . . . . .	57
3.2	Risk and Probability Moments . . . . .	58
3.2.1	Expectations, Variance and Other Moments . . . . .	58
3.2.2	The Expectation . . . . .	58
3.2.3	The Variance/Volatility: A measure of “Deviation” . . . . .	59
3.2.4	Skewness, Kurtosis and Filtration . . . . .	59
3.2.5	Range and Extreme Statistics . . . . .	60
3.3	Applications . . . . .	61
3.3.1	Skewness in Standardized Stocks Rates of Returns . . . . .	61
3.3.2	Reliability, Probability Risk Constraints and Deviations’ Risks . . . . .	62
3.3.3	The Hazard Rate and Finance . . . . .	64
3.3.4	Risk Variance and Valuation . . . . .	65
3.3.5	VaR or Value at Risk . . . . .	67
3.3.6	Chance Constraints . . . . .	68
3.3.7	Type I and Type II Statistical Risks . . . . .	69
3.3.8	Quality Assurance and Chance Constraints Risks . . . . .	70
3.3.9	Credit and Credit Granting and Estimation of Default Probabilities . . . . .	71
3.3.10	Chance Constrained Programming . . . . .	73
3.3.11	Chance Constraint Moments Approximations . . . . .	75
3.3.12	Transformation of Random Variables into Normally Distributed Random Variables . . . . .	75
3.4	Generating Functions . . . . .	76
3.4.1	The Convolution Theorem for Moment and Probability Functions . . . . .	77
3.4.2	The Probability Generating Function of the Bernoulli Experiment . . . . .	79
3.4.3	Additional Examples . . . . .	81
3.4.4	The PGF of the Compound Poisson Process . . . . .	82
3.5	Probability Distributions . . . . .	83
3.5.1	The Bernoulli Family . . . . .	84

3.5.2	The Binomial and Other Distributions . . . . .	85
3.5.3	The Poisson Distribution . . . . .	90
3.5.4	The Conditional Sum Poisson and the Binomial Distribution . . . . .	91
3.5.5	Super and Hyper Poisson Distributions . . . . .	92
3.5.6	The Negative Binomial Distribution (NBD) . . . . .	92
3.6	The Normal Probability Distribution . . . . .	93
3.6.1	The Lognormal Probability Distribution . . . . .	94
3.6.2	The Exponential Distribution . . . . .	95
3.6.3	The Gamma Probability Distribution . . . . .	95
3.6.4	The Beta Probability Distribution . . . . .	96
3.6.5	Binomial Default with Learning . . . . .	97
3.6.6	The Logistic Distribution . . . . .	97
3.6.7	The Linear Exponential Family of Distribution . . . . .	98
3.7	Extreme Distributions and Tail Risks . . . . .	98
3.7.1	Approximation by a Generalized Pareto Distribution . . . . .	100
3.7.2	The Weibull Distribution . . . . .	100
3.7.3	The Burr Distribution . . . . .	101
3.8	Simulation . . . . .	104
<b>4</b>	<b>Multivariate Probability Distributions:</b>	
	<b>Applications and Risk Models . . . . .</b>	<b>109</b>
4.1	Introduction . . . . .	109
4.2	Measures of Co-variation and Dependence . . . . .	110
4.2.1	Statistical and Causal Dependence: An Oil Example . . . . .	110
4.2.2	Statistical Measures of Co-dependence . . . . .	112
4.3	Multivariate Discrete Distributions . . . . .	117
4.3.1	Estimating the Bi-variate Bernoulli Parameters . . . . .	124
4.3.2	The Bivariate Binomial Distribution . . . . .	126
4.3.3	The Multivariate Poisson Probability Distribution . . . . .	127
4.4	The Multivariate Normal Probability Distribution . . . . .	128
4.5	Other Multivariate Probability Distributions ( <i>Statistics and Probability Letters</i> , 62, 203, 47–412) . . . . .	128
4.6	Dependence and Copulas . . . . .	130
4.6.1	Copulas and Dependence Measures . . . . .	135
4.6.2	Copulas and Conditional Dependence . . . . .	136
<b>5</b>	<b>Temporal Risk Processes . . . . .</b>	<b>139</b>
5.1	Time, Memory and Causal Dependence . . . . .	139
5.2	Time and Change: Modeling (Markov) Random Walk . . . . .	141
5.2.1	Modeling Random Walks . . . . .	142
5.2.2	Stochastic and Independent Processes . . . . .	143
5.2.3	The Bernoulli-Random Walk: A Technical Definition . . . . .	143

5.2.4	The Trinomial Random Walk . . . . .	145
5.2.5	Random Walk as a Difference Equation . . . . .	145
5.2.6	The Random-Poisson Continuous Time Walk . . . . .	146
5.2.7	The Continuous Time Continuous State Approximation . . . . .	148
5.2.8	The Poisson-Jump Process and its Approximation as a Brownian Model . . . . .	149
5.2.9	The Multiplicative Bernoulli-Random Walk Model . . . . .	150
5.2.10	The BD Model in Continuous Time with Distributed Times Between Jumps . . . . .	151
5.3	Inter-Event Times and Run Time Stochastic Models . . . . .	153
5.4	Randomized Random Walks and Related Processes . . . . .	154
5.4.1	The Randomized Random Walk Distribution . . . . .	154
5.4.2	Binomial-Lognormal Process . . . . .	155
5.5	Markov Chains . . . . .	156
5.6	Applications . . . . .	159
5.6.1	The Sums of Poisson Distributed Events Is Also Poisson . . . . .	159
5.6.2	Collective Risk and the Compound Poisson Process . . . . .	159
5.6.3	Time VaR . . . . .	161
5.6.4	A Portfolio Trinomial Process . . . . .	163
5.7	Risk Uncertainty, Rare Events and Extreme Risk Processes . . . . .	166
5.7.1	Hurst Index, Fractals and the Range Process . . . . .	169
5.7.2	R/S and Outliers Risks . . . . .	172
5.7.3	RVaR, TRVaR and Volatility at Risk . . . . .	173
5.7.4	The Generalized Pareto Distribution (GPD) . . . . .	178
5.7.5	The Normal Distribution and Pareto Levy Stable Distributions . . . . .	180
5.8	Short Term Memory, Persistence, Anti-persistence and Contagion . . . . .	182
5.8.1	Mathematical Calculations . . . . .	183
5.8.2	Persistence and the Probability of Losses in a Contagion . . . . .	188
<b>6</b>	<b>Risk Measurement . . . . .</b>	<b>195</b>
6.1	Introduction . . . . .	195
6.2	Big Data and Risk Measurement . . . . .	199
6.3	Decision and Risk Objective Measurements . . . . .	201
6.4	Risk Measurement in Various Fields . . . . .	204
6.4.1	Medical Risk Measurement . . . . .	204
6.4.2	RAM as Performance and Risk Measures . . . . .	207
6.4.3	Quality and Statistical Tracking . . . . .	208
6.4.4	Operations and Services and Risk Measurements . . . . .	208

6.5	Bayesian Decision Making: EMV and Information . . . . .	209
6.6	Multi Criteria and Ad-Hoc Objectives . . . . .	211
6.6.1	Perron-Froebenius Theorem and AHP . . . . .	212
6.6.2	The Data Envelopment Analysis and Benchmarking . . . . .	212
6.7	Risk Measurement Models: Axiomatic Foundations . . . . .	213
6.7.1	Coherent Risk Measures . . . . .	213
6.7.2	Axiomatic Models for Deviation Risk Measurements . . . . .	215
6.7.3	Absolute Deviations . . . . .	215
6.7.4	Inequality Measures . . . . .	216
6.7.5	The Variance and the VaR . . . . .	216
6.7.6	Entropy and Divergence (Distance) Metrics . . . . .	216
6.8	Functional and Generalized Risk Measurement Models . . . . .	218
6.9	Examples and Expectations . . . . .	219
6.9.1	Models Based on Ordered Distributions' Measurement . . . . .	220
<b>7</b>	<b>Risk Valuation . . . . .</b>	<b>223</b>
7.1	Value and Price . . . . .	223
7.2	Rational Expectations, Martingales and the Arrow-Debreu Complete States Preferences . . . . .	224
7.2.1	Rational Expectations Models: A Simple Quantitative Definition . . . . .	227
7.2.2	The Inverse Kernel Problem and Risk Pricing . . . . .	229
7.3	Utility Models and Valuation . . . . .	232
7.3.1	Critique of Expected Utility Theory in Measuring Preferences . . . . .	234
7.3.2	Examples and Problems . . . . .	235
7.4	Risk Prudence and Background Risk . . . . .	242
7.4.1	Risk, Uncertainty and Insurance . . . . .	244
7.5	Expected Utility Bounds . . . . .	246
7.6	VaR Valuation . . . . .	246
7.7	Valuation of Operations by Lagrange Multipliers . . . . .	248
<b>8</b>	<b>Risk Economics and Multi-Agent CCAPM . . . . .</b>	<b>251</b>
8.1	Introduction . . . . .	251
8.2	Economic Valuation and Pricing: Supply, Demand and Scarcity . . . . .	255
8.2.1	Valuation, Risk, and Utility Pricing: One Period Models . . . . .	256
8.2.2	Aggregate and Competing Consumption and Pricing Risks . . . . .	259
8.2.3	Two Products and Derived Consumption . . . . .	260
8.3	The CAPM and the CCAPM . . . . .	265
8.3.1	The CCAPM Model . . . . .	266

8.3.2	The Beta Model and Inflation Risk . . . . .	269
8.4	The Multi-Agent CCAPM Model: A Two Periods Model . . . .	270
8.4.1	The CCAPM with Independent Prices . . . . .	270
8.4.2	Endogenous-Aggregate Consumption and the CCAPM . . . . .	272
8.4.3	The General Case with Independent Rates of Returns . . . . .	273
<b>9</b>	<b>Risk Pricing Models: Applications . . . . .</b>	<b>283</b>
9.1	Debt and Risk Models . . . . .	283
9.1.1	Market Risk Pricing Models for Credit Risk and Collaterals . . . . .	284
9.1.2	The Structural-Endogenous Model and the Price of Credit Relative to its Collateral . . . . .	285
9.1.3	Credit Risk and Swaps: A Reduced Form or Exogenous Models . . . . .	287
9.1.4	Pricing by Replication: Credit Default Spread . . . . .	289
9.2	A Debt Multi-Agent CCAPM Model . . . . .	290
9.3	Global Finance and Risks . . . . .	297
9.3.1	Pricing International Assets and Foreign Exchange Risk . . . . .	300
9.3.2	International Credit, Debt Leverage and the Investment Portfolio . . . . .	310
9.3.3	FX Rates Risk, Bonds and Equity . . . . .	317
9.4	Additional Applications . . . . .	323
9.4.1	Finance and Insurance: Pricing Contrasts and Similarities . . . . .	323
9.4.2	Insurance and Finance: Pricing Examples . . . . .	325
9.4.3	Contrasts of Actuarial and the Financial Approaches . . . . .	325
9.4.4	Franchises . . . . .	326
9.4.5	Outsourcing and Risks . . . . .	327
9.5	Subjective Kernel Distributions . . . . .	328
9.5.1	The HARA Utility . . . . .	329
<b>10</b>	<b>Uncertainty Economics . . . . .</b>	<b>333</b>
10.1	Introduction . . . . .	334
10.2	Risk and Uncertainty, Time and Pricing . . . . .	334
10.3	Assets Pricing with Countable and Non-countable States . . . .	336
10.4	Maximization of Boltzmann Entropy . . . . .	338
10.5	The Subjective, the Q Distributions and BG Entropy . . . . .	342
10.6	The Tsallis Maximum Entropy and Incomplete States Preferences . . . . .	344

10.6.1	Tsallis Entropy and the Power Law . . . . .	345
10.6.2	A Mathematical Note: (Abe 1997; Borges and Roditi 1998) . . . . .	346
10.6.3	The Maximum Tsallis Entropy and the Power Law Distribution . . . . .	348
10.6.4	The Tsallis Entropy and Subjective Estimate of the M-Distribution . . . . .	349
10.6.5	Maximum Tsallis Entropy with Escort Probabilities . . . . .	351
10.7	Choice, Rationality, Bounded Rationality and Making Decision Under Uncertainty . . . . .	356
10.7.1	Models Sensitivity and Robustness . . . . .	357
10.7.2	Ex-Post Decisions and Recovery . . . . .	362
10.8	Uncertainty Economics, Risk Externalities and Regulation . . . . .	364
10.8.1	Risk Externalities, Industry and the Environmental: Energy and Pollution . . . . .	366
10.8.2	Networks and Externalities . . . . .	368
10.8.3	Infrastructure and Externalities . . . . .	369
10.8.4	Economics and Externalities: Pigou and Coase . . . . .	370
<b>11</b>	<b>Strategic Risk Control and Regulation . . . . .</b>	<b>375</b>
11.1	Introduction . . . . .	375
11.2	Statistical Risk Control: Inspection and Acceptance Sampling . . . . .	377
11.2.1	Elements Statistical Sampling . . . . .	378
11.2.2	Bayesian Controls—A Medical Care Case . . . . .	382
11.2.3	Temporal Bayesian Controls . . . . .	385
11.3	Risk Control with Control Charts . . . . .	387
11.3.1	Interpreting Charts . . . . .	389
11.3.2	6 Sigma and Process Capability . . . . .	392
11.4	Queue Control . . . . .	394
11.4.1	The Simple M/M/1 Queue . . . . .	395
11.4.2	The Simple M/M/1 Queue and Non-compliance . . . . .	396
11.4.3	The Continuous CSP-1 Control of Queues and Banking . . . . .	398
11.4.4	Networks and Queues . . . . .	400
11.5	Strategic Inspections and Controls (See Also Chap. 12 for a Review of Game Theory) . . . . .	403
11.5.1	Yield and Control in a Supplier–Customer Relationship . . . . .	404
11.6	Financial Regulation and Controls . . . . .	412
11.6.1	Financial Regulation in a Post Crisis World . . . . .	412

11.6.2	Statistical Controls and Regulation . . . . .	414
11.6.3	Private Information, Type I and II Risks and Externality Risks . . . . .	428
<b>12</b>	<b>Games, Risk and Uncertainty . . . . .</b>	<b>437</b>
12.1	Introduction . . . . .	437
12.1.1	Games, Risk and Uncertainty . . . . .	439
12.2	Concepts of Games and Risk . . . . .	439
12.3	Two-Persons Zero-Sum and Non-zero Sum Games . . . . .	443
12.3.1	Terms and Solution Concepts . . . . .	443
12.3.2	The Nash Conjecture . . . . .	444
12.3.3	The Numerical Solution of Two Persons-Games: The Lemke-Howson Algorithm . . .	449
12.3.4	Negotiated Solution and the Nash Equilibrium . . .	450
12.4	The Stackelberg Strategy . . . . .	451
12.5	Random Payoff and Strategic Risk Games . . . . .	452
12.5.1	A Risk Constrained Random Payoff Games: A Heuristic Interior Solution . . . . .	454
12.6	Bayesian Theory and Bayesian Games . . . . .	456
12.6.1	Bayes Decision Making . . . . .	458
12.6.2	Examples: Bayesian Calculus . . . . .	458
12.7	Mean Field Games and Finance . . . . .	461
	<b>References . . . . .</b>	<b>465</b>
