

Contents

1 The Deep Past: A Story of Ceaseless Change	1
Evolution Before Life	4
Formation of Matter	4
Formation of Atoms and Molecules from Elementary Particles	6
Formation of Galaxies and Stars from Molecules	7
Eventual Demise of Galaxies, Stars and Matter	8
Formation of the Earth and Moon	10
Evolution of the Pre-life Earth	11
Evolution of Life and the Ecosphere	24
Just Another Global Cycle?	25
Coevolution of the Earth and Its Ecosystems	28
Archean Eon (3.8–2.5 Ga) Emergence of Life and Genes	30
Proterozoic Eon (2500–542 Mya) Eukaryotes, Colonies, Sex, Multicellularity	32
Paleozoic Era (542–251 Mya) Cambrian Explosion to Permian Extinction	42
Mesozoic Era (251–206–65.5 Mya) Dinosaurs, Mammals, Birds, Flowers	49
Ideas for a World View	53
Humans Are Primates	53
Evolution and Ecology Are Inseparable	54
Symbiosis and Competition Are Both Important	55
The Ecosphere Is Vulnerable But Resilient	56
The History of the Ecosphere Is Grasable	57
Appendix: More on Self-Organising Systems	61
A Mathematical Analogue	61
Maximum Entropy Production	64

2	Stages in the Evolution of Modern Humans	69
	From Placental Mammals and Primates to the First Humans.....	69
	Down on the Ground.....	71
	Australopithecines and Their Brains.....	71
	Habilines and Erectines.....	73
	Cultural and Genetic Evolution in the Pleistocene.....	78
	Memory and Learning.....	80
	Feelings and Emotions.....	82
	The Further Evolution of Non-verbal Communication.....	87
	The Transition to Spoken Language.....	92
	Selecting for Language Skills.....	103
	Humans of the Late Glacial to Early Post-glacial Period.....	109
	After the Mt Toba Eruption.....	109
	New Behaviours.....	111
	New Minds.....	117
	Reflections on Hominid Evolution.....	124
	When Is a Species Vulnerable to Extinction?.....	125
	Constraints and Trajectories in Phylogenesis.....	131
	The Hominid Experience.....	136
3	Emergence and Evolution of Complex Societies	149
	The Idea of a Universal Evolutionary Process.....	149
	Evolution Has a History.....	150
	The Biological Eon.....	151
	The Cultural Eon.....	153
	The Neolithic and Urban Revolutions.....	153
	The Neolithic Revolution (12,000–6,000 BP).....	153
	The Urban Revolution (6000–3000 BP).....	155
	The Cognition-Consciousness Revolution.....	158
	The Problem of Consciousness.....	158
	New Religions, New Thinking, New Societies (3000–2000 BP).....	169
	Coevolution of Food Production, Society and Ecosphere (12000–2000 BP).....	194
	Holocene Survival Strategies.....	198
	Explaining Change in Human Ecosystems.....	203
	Patterns of Technological Change.....	205
4	The Road to High Complexity	219
	The Last Two Thousand Years.....	220
	Trading Networks.....	220
	Northern Invaders.....	221
	Rise of Islam.....	222
	Europe Reorganises.....	223
	Wind-Powered Trade.....	224
	The Islamic Empire.....	225
	The Mongols.....	225

Islam's 'Post-Mongol' Empires	226
Early Renaissance	226
Printing	228
The Rise and Decline of Spain and Portugal	229
European Imperialism and Mercantilism	231
Fossil Fuels and Industrial Capitalism	233
Changing Perceptions of Nature, People and Society	237
World Wars.....	242
A New Order.....	246
The Postmodern Era	248
Understanding and Reflecting on the Common Era	268
Globalisation.....	269
An Ongoing Accumulation of Ideas	273
Progress, the God That Failed.....	277
Continuities and Discontinuities	287
The Deep Processes of Eco-Cultural History	291
Evolutionary Ecology	292
The Uses of History	295
5 Confronting Global Overshoot	297
The Warm Glow of Understanding	297
Wonder Is Not Admiration.....	299
Some Ineluctable Realities	300
Three Ways of Reacting to an Overshoot Scenario	313
Don't Panic	314
Two Ways of Being Tender-Minded	319
Stop Fiddling	320
Rise Like a Phoenix	325
Discussion	339
A Broader Context	341
6 Ecohumanism and Other Stories.....	349
Stories Then and Now.....	349
This Book Is a Story	351
Descriptive and Prescriptive Philosophies	351
Ecohumanism: My Suggested Response to Global Overshoot	353
Benefits of Being Eco-Aware.....	353
Practical Ecohumanism	358
Some Guidelines for Coping with Complexity.....	359
Some Guidelines for Coping with the Virtual-Species Problem	365
But Is It Emotionally Satisfying?	369
Tamam Shud: It Is Finished	372
Bibliography	377
Index.....	391

Global Overshoot

Contemplating the World's Converging Problems

cocks, d.

2013, XVII, 401 p.,

ISBN: 978-1-4614-6265-1
