

# Contents

<b>1</b>	<b>Introduction</b>	1
1.1	Markov Chains	1
1.1.1	Examples of Markov Chains	2
1.1.2	The $n$ th-Step Transition Matrix	5
1.1.3	Irreducible Markov Chain and Classifications of States	7
1.1.4	An Analysis of the Random Walk	8
1.1.5	Simulation of Markov Chains with EXCEL	10
1.1.6	Building a Markov Chain Model	11
1.1.7	Stationary Distribution of a Finite Markov Chain	13
1.1.8	Applications of the Stationary Distribution	18
1.2	Continuous Time Markov Chain Process	19
1.2.1	A Continuous Two-State Markov Chain	21
1.3	Iterative Methods for Solving Linear Systems	22
1.3.1	Some Results on Matrix Theory	23
1.3.2	Splitting of a Matrix	24
1.3.3	Classical Iterative Methods	26
1.3.4	Spectral Radius	28
1.3.5	Successive Over-Relaxation (SOR) Method	29
1.3.6	Conjugate Gradient Method	30
1.3.7	Toeplitz Matrices	34
1.4	Hidden Markov Models	35
1.5	Markov Decision Process	37
1.5.1	Stationary Policy	41
1.6	Exercises	42
<b>2</b>	<b>Queueing Systems and the Web</b>	47
2.1	Markovian Queueing Systems	47
2.1.1	An $M/M/1/n - 2$ Queueing System	48
2.1.2	An $M/M/s/n - s - 1$ Queueing System	49
2.1.3	Allocation of the Arrivals in a System of $M/M/1/\infty$ Queues	51

2.1.4	Two M/M/1 Queues or One M/M/2 Queue? .....	53
2.1.5	The Two-Queue Free System .....	54
2.1.6	The Two-Queue Overflow System .....	55
2.1.7	The Preconditioning of Complex Queueing Systems .....	56
2.2	Search Engines .....	60
2.2.1	The PageRank Algorithm .....	62
2.2.2	The Power Method .....	63
2.2.3	An Example .....	65
2.2.4	The SOR/JOR Method and the Hybrid Method .....	66
2.2.5	Convergence Analysis .....	68
2.3	Summary .....	72
2.4	Exercise .....	73
<b>3</b>	<b>Manufacturing and Re-manufacturing Systems .....</b>	<b>77</b>
3.1	Introduction .....	77
3.2	Manufacturing Systems .....	79
3.2.1	Reliable Machine Manufacturing Systems .....	79
3.3	An Inventory Model for Returns .....	83
3.4	The Lateral Transshipment Model .....	87
3.5	The Hybrid Re-manufacturing System .....	89
3.5.1	The Hybrid System .....	89
3.5.2	The Generator Matrix of the System .....	90
3.5.3	The Direct Method .....	92
3.5.4	The Computational Cost .....	95
3.5.5	Special Case Analysis .....	95
3.6	Summary .....	96
3.7	Exercises .....	96
<b>4</b>	<b>A Hidden Markov Model for Customer Classification .....</b>	<b>97</b>
4.1	Introduction .....	97
4.1.1	A Simple Example .....	97
4.2	Parameter Estimation .....	98
4.3	An Extension of the Method .....	99
4.4	A Special Case Analysis .....	101
4.5	Applying HMM to the Classification of Customers .....	103
4.6	Summary .....	105
4.7	Exercises .....	105
<b>5</b>	<b>Markov Decision Processes for Customer Lifetime Value .....</b>	<b>107</b>
5.1	Introduction .....	107
5.2	Markov Chain Models for Customer Behavior .....	109
5.2.1	Estimation of the Transition Probabilities .....	110
5.2.2	Retention Probability and CLV .....	111
5.3	Stochastic Dynamic Programming Models .....	112
5.3.1	Infinite Horizon Without Constraints .....	113
5.3.2	Finite Horizon with Hard Constraints .....	115
5.3.3	Infinite Horizon with Constraints .....	116

5.4	An Extension to Multi-period Promotions .....	121
5.4.1	Stochastic Dynamic Programming Models .....	123
5.4.2	The Infinite Horizon Without Constraints .....	123
5.4.3	Finite Horizon with Hard Constraints .....	125
5.5	Higher-Order Markov Decision Process .....	131
5.5.1	Stationary Policy .....	132
5.5.2	Application to the Calculation of CLV .....	134
5.6	Summary .....	135
5.7	Exercises .....	137
<b>6</b>	<b>Higher-Order Markov Chains</b> .....	<b>141</b>
6.1	Introduction .....	141
6.2	Higher-Order Markov Chains .....	142
6.2.1	The New Model .....	143
6.2.2	Parameter Estimation .....	146
6.2.3	An Example .....	150
6.3	Some Applications .....	152
6.3.1	The Sales Demand Data .....	153
6.3.2	Webpage Prediction .....	155
6.4	Extension of the Model .....	158
6.5	The Newsboy Problem .....	162
6.5.1	A Markov Chain Model for the Newsboy Problem .....	163
6.5.2	A Numerical Example .....	167
6.6	Higher-Order Markov Regime-Switching Model for Risk Measurement .....	167
6.6.1	A Snapshot for Markov Regime-Switching Models .....	168
6.6.2	A Risk Measurement Framework Based on a HMRS Model .....	170
6.6.3	Value at Risk Forecasts .....	174
6.7	Summary .....	175
6.8	Exercise .....	176
<b>7</b>	<b>Multivariate Markov Chains</b> .....	<b>177</b>
7.1	Introduction .....	177
7.2	Construction of Multivariate Markov Chain Models .....	177
7.2.1	Estimations of Model Parameters .....	181
7.2.2	An Example .....	183
7.3	Applications to Multi-product Demand Estimation .....	184
7.4	Applications to Credit Ratings Models .....	187
7.4.1	The Credit Transition Matrix .....	188
7.5	Extension to a Higher-Order Multivariate Markov Chain .....	190
7.6	An Improved Multivariate Markov Chain and Its Application to Credit Ratings .....	192
7.6.1	Convergence Property of the Model .....	193
7.6.2	Estimation of Model Parameters .....	195

7.6.3	Practical Implementation, Accuracy and Computational Efficiency .....	197
7.7	Summary .....	199
7.8	Exercise .....	200
<b>8</b>	<b>Hidden Markov Chains .....</b>	<b>201</b>
8.1	Introduction .....	201
8.2	Higher-Order HMMs .....	201
8.2.1	Problem 1 .....	203
8.2.2	Problem 2 .....	205
8.2.3	Problem 3 .....	207
8.2.4	The EM Algorithm .....	208
8.2.5	Heuristic Method for Higher-Order HMMs .....	210
8.3	The Double Higher-Order Hidden Markov Model .....	212
8.4	The Interactive Hidden Markov Model .....	214
8.4.1	An Example .....	214
8.4.2	Estimation of Parameters .....	215
8.4.3	Extension to the General Case .....	217
8.5	The Binomial Expansion Model for Portfolio Credit Risk Modulated by the IHMM .....	218
8.5.1	Examples .....	221
8.5.2	Estimation of the Binomial Expansion Model Modulated by the IHMM .....	222
8.5.3	Numerical Examples and Comparison .....	224
8.6	Summary .....	230
8.7	Exercises .....	230

Markov Chains

Models, Algorithms and Applications

Ching, W.-K.; Huang, X.; Ng, M.K.; Siu, T.K.

2013, XVI, 243 p., Hardcover

ISBN: 978-1-4614-6311-5
