

Contents

1	Introduction	1
2	Immune System and Atopic Disorders	3
2.1	Asthma and Allergy	3
2.2	Classification of the Allergic Reactions	4
2.3	Asthma Phenotypes	6
2.3.1	Atopic Asthma	6
2.3.2	Non-Atopic Asthma	7
2.4	Pathophysiology of Allergy and Asthma	7
2.4.1	Immunological Basis of Allergic Reactions	7
2.4.2	Allergic Sensitization	12
2.4.3	Effector Response in the Allergic Reaction	14
	References	16
3	Epigenetics	23
3.1	Overview	23
3.2	DNA Methylation	24
3.2.1	Genomic Distribution of the Methyl Mark	25
3.2.2	Enzymes and Mechanisms Involved in DNA Methylation	26
3.2.3	DNA Methylation and Disease	28
3.3	The RNA World	30
3.4	Protein Epigenetics	31
3.4.1	Unraveling a Potential ‘Histone Code’	31
3.4.2	Histone Modifications, Chromatin Remodeling, and Disease	32
3.5	How to Study the Epigenome	34
3.5.1	Chromatin Immunoprecipitation	34
3.5.2	DNA Methylation	35
3.5.3	New Technologies	40
	References	41

4	Epigenetics, Environment, and Allergic Diseases	51
4.1	<i>In Utero</i> and Early Life: Epigenetics and Environmental Aggressions	52
4.1.1	Origins of Health and Illness During Development (Developmental Origins of Health and Disease)	52
4.2	Epigenetics and Allergic Diseases	53
4.2.1	Diet	54
4.2.2	Exposure to Polycyclic Aromatic Hydrocarbons	55
4.2.3	Rural Environment	55
4.2.4	Smoking	56
4.3	Epigenetics and Th2-Cell Phenotype in Atopic Disorders.	57
	References	58
5	Conclusions and Future Perspectives	63
	Reference.	64

Epigenetic Approaches to Allergy Research

Pascual, M.; Roa Gómez, S.

2013, VIII, 64 p. 13 illus., Softcover

ISBN: 978-1-4614-6365-8
