

# Contents

<b>The Variance Conjecture on Some Polytopes .....</b>	<b>1</b>
David Alonso–Gutiérrez and Jesús Bastero	
<b>More Universal Minimal Flows of Groups of Automorphisms of Uncountable Structures .....</b>	<b>21</b>
Dana Bartošová	
<b>On the Lyapounov Exponents of Schrödinger Operators Associated with the Standard Map.....</b>	<b>39</b>
J. Bourgain	
<b>Overgroups of the Automorphism Group of the Rado Graph .....</b>	<b>45</b>
Peter Cameron, Claude Laflamme, Maurice Pouzet, Sam Tarzi, and Robert Woodrow	
<b>On a Stability Property of the Generalized Spherical Radon Transform..</b>	<b>55</b>
Dmitry Faifman	
<b>Banach Representations and Affine Compactifications of Dynamical Systems.....</b>	<b>75</b>
Eli Glasner and Michael Megrelishvili	
<b>Flag Measures for Convex Bodies .....</b>	<b>145</b>
Daniel Hug, Ines Türk, and Wolfgang Weil	
<b>Operator Functional Equations in Analysis.....</b>	<b>189</b>
Hermann König and Vitali Milman	
<b>A Remark on the Extremal Non-Central Sections of the Unit Cube .....</b>	<b>211</b>
James Moody, Corey Stone, David Zach, and Artem Zvavitch	
<b>Universal Flows of Closed Subgroups of <math>S_\infty</math> and Relative Extreme Amenability .....</b>	<b>229</b>
L. Nguyen Van Thé	

<b>Oscillation of Urysohn Type Spaces</b> .....	247
N.W. Sauer	
<b>Euclidean Sections of Convex Bodies</b> .....	271
Gideon Schechtman	
<b>Duality on Convex Sets in Generalized Regions</b> .....	289
Alexander Segal and Boaz A. Slomka	
<b>On Polygons and Injective Mappings of the Plane</b> .....	299
Boaz A. Slomka	
<b>Abstract Approach to Ramsey Theory and Ramsey Theorems for Finite Trees</b> .....	313
Sławomir Solecki	
<b>Some Affine Invariants Revisited</b> .....	341
Alina Stancu	
<b>On the Geometry of Log-Concave Probability Measures with Bounded Log-Sobolev Constant</b> .....	359
P. Stavrakakis and P. Valettas	
<b><math>f</math>-Divergence for Convex Bodies</b> .....	381
Elisabeth M. Werner	

Asymptotic Geometric Analysis

Proceedings of the Fall 2010 Fields Institute Thematic  
Program

Ludwig, M.; Milman, V.D.; Pestov, V.;

Tomczak-Jaegermann, N. (Eds.)

2013, X, 395 p., Hardcover

ISBN: 978-1-4614-6405-1
