Preamble	xvii
1 Spherical Harmonics	1
1.1 Space of Spherical Harmonics and Orthogonal Bases.....	1
1.2 Projection Operators and Zonal Harmonics.....	7
1.3 Zonal Basis of Spherical Harmonics	11
1.4 Laplace–Beltrami Operator	14
1.5 Spherical Harmonics in Spherical Coordinates	17
1.6 Spherical Harmonics in Two and Three Variables	19
1.6.1 Spherical Harmonics in Two Variables	19
1.6.2 Spherical Harmonics in Three Variables	20
1.7 Representation of the Rotation Group	22
1.8 Angular Derivatives and the Laplace–Beltrami Operator	23
1.9 Notes	27
2 Convolution Operator and Spherical Harmonic Expansion	29
2.1 Convolution and Translation Operators on the Sphere	29
2.2 Fourier Orthogonal Expansions	33
2.3 The Hardy–Littlewood Maximal Function	37
2.4 Spherical Harmonic Series and Cesàro Means.....	40
2.5 Convergence of Cesàro Means: Further Results	43
2.6 Near-Best Approximation Operators and Highly Localized Kernels	44
2.7 Notes and Further Results.....	50
3 Littlewood–Paley Theory and the Multiplier Theorem	53
3.1 Analysis on Homogeneous Spaces	53
3.2 Littlewood–Paley Theory on the Sphere	56
3.3 The Marcinkiewicz Multiplier Theorem	64
3.4 The Littlewood–Paley Inequality	67
3.5 The Riesz Transform on the Sphere	71

3.5.1	Fractional Laplace–Beltrami Operator and Riesz Transform.....	71
3.5.2	Proof of Lemma 3.5.2	74
3.6	Notes and Further Results.....	78
4	Approximation on the Sphere	79
4.1	Approximation by Trigonometric Polynomials	80
4.2	Modulus of Smoothness on the Unit Sphere	85
4.3	A Key Lemma	89
4.4	Characterization of Best Approximation	93
4.5	K -Functionals and Approximation in Sobolev Space	95
4.6	Computational Examples	97
4.7	Other Moduli of Smoothness	99
4.8	Notes and Further Results.....	101
5	Weighted Polynomial Inequalities	105
5.1	Doubling Weights on the Sphere	105
5.2	A Maximal Function for Spherical Polynomials.....	111
5.3	The Marcinkiewicz–Zygmund Inequalities	114
5.4	Further Inequalities Between Sums and Integrals	118
5.5	Nikolskii and Bernstein Inequalities	124
5.6	Notes and Further Results.....	126
6	Cubature Formulas on Spheres	127
6.1	Cubature Formulas	127
6.2	Product-Type Cubature Formulas on the Sphere	132
6.3	Positive Cubature Formulas.....	135
6.4	Area-Regular Partitions of \mathbb{S}^{d-1}	140
6.5	Spherical Designs	144
6.6	Notes and Further Results.....	151
7	Harmonic Analysis Associated with Reflection Groups	155
7.1	Dunkl Operators and h -Spherical Harmonics	156
7.2	Projection Operator and Intertwining Operator	160
7.3	h -Harmonics for a General Finite Reflection Group.....	166
7.4	Convolution and h -Harmonic Series	168
7.5	Maximal Functions and the Multiplier Theorem	172
7.6	Maximal Function for \mathbb{Z}_2^d -Invariant Weight	179
7.7	Notes and Further Results.....	186
8	Boundedness of Projection Operators and Cesàro Means	189
8.1	Boundedness of Cesàro Means Above the Critical Index	189
8.2	A Multiple Beta Integral of the Jacobi Polynomials.....	191
8.3	Pointwise Estimation of the Kernel Functions	198
8.4	Proof of the Main Results	200
8.5	Lower Bound for Generalized Gegenbauer Expansion.....	204
8.6	Notes and Further Results.....	211

9	Projection Operators and Cesàro Means in L^p Spaces	213
9.1	Boundedness of Projection Operators	213
9.2	Boundedness of Cesàro Means in L^p Spaces	217
9.2.1	Proof of Theorem 9.2.1	218
9.2.2	Proof of Theorem 9.2.2	222
9.3	Local Estimates of the Projection Operators	225
9.3.1	Proof of Theorem 9.1.2, Case I: $\gamma < \sigma_K - \frac{d-2}{2}$	226
9.3.2	Proof of Theorem 9.1.2, Case II: $\gamma = \sigma_K - \frac{d-2}{2}$	234
9.4	Notes and Further Results	239
10	Weighted Best Approximation by Polynomials	241
10.1	Moduli of Smoothness and Best Approximation	241
10.2	Fractional Powers of the Spherical h -Laplacian	245
10.3	K -Functionals and Best Approximation	248
10.4	Equivalence of the First Modulus and the K -Functional	250
10.5	Equivalence of the Second Modulus and the K -Functional	254
10.6	Further Properties of Moduli of Smoothness	261
10.7	Notes and Further Results	262
11	Harmonic Analysis on the Unit Ball	265
11.1	Orthogonal Structure on the Unit Ball	265
11.2	Convolution and Orthogonal Expansions	272
11.3	Maximal Functions and a Multiplier Theorem	276
11.4	Projection Operators and Cesàro Means on the Ball	281
11.5	Near-Best-Approximation Operators and Highly Localized Kernels	283
11.6	Cubature Formulas on the Unit Ball	287
11.6.1	Cubature Formulas on the Ball and on the Sphere	287
11.6.2	Positive Cubature Formulas and the MZ Inequality	289
11.6.3	Product-Type Cubature Formulas	291
11.7	Orthogonal Structure on Spheres and on Balls	293
11.8	Notes and Further Results	294
12	Polynomial Approximation on the Unit Ball	297
12.1	Algebraic Polynomial Approximation on an Interval	298
12.2	The First Modulus of Smoothness and K -Functional	303
12.2.1	Projection from Sphere to Ball	303
12.2.2	Modulus of Smoothness	305
12.2.3	Weighted K -Functional and Equivalence	307
12.2.4	Main Theorems	309
12.2.5	The Moduli of Smoothness on $[-1, 1]$	311
12.2.6	Computational Examples	312
12.3	The Second Modulus of Smoothness and K -Functional	313
12.3.1	Analogue of the Ditzian–Totik K -Functional	314
12.3.2	Direct and Inverse Theorems Using the K -Functional	319

12.3.3	Analogue of the Ditzian–Totik Modulus of Smoothness on \mathbb{B}^d	320
12.3.4	Equivalence of $\omega_\varphi^r(f, t)_p$ and $K_{r, \varphi}(f, t)_p$	323
12.4	The Third Modulus of Smoothness and K -Functional	326
12.5	Comparisons of Three Moduli of Smoothness	328
12.6	Notes and Further Results	329
13	Harmonic Analysis on the Simplex	333
13.1	Orthogonal Structure on the Simplex	333
13.2	Convolution and Orthogonal Expansions	337
13.3	Maximal Functions and a Multiplier Theorem	340
13.4	Projection Operator and Cesàro Means	344
13.5	Near-Best-Approximation Operators and Highly Localized Kernels	351
13.6	Weighted Best Approximation on the Simplex	354
13.7	Cubature Formulas on the Simplex	357
13.7.1	Cubature Formulas on the Simplex and on the Ball	357
13.7.2	Positive Cubature Formulas and MZ Inequality	358
13.7.3	Product-Type Cubature Formulas	359
13.8	Notes and Further Results	360
14	Applications	363
14.1	Highly Localized Tight Polynomial Frames on the Sphere	364
14.2	Node Distribution of Positive Cubature Formulas	371
14.3	Positive Definite Functions on the Sphere	375
14.4	Asymptotics for Minimal Discrete Energy on the Sphere	383
14.5	Computerized Tomography	390
14.6	Notes and Further Results	398
A	Distance, Difference and Integral Formulas	403
A.1	Distance on Spheres, Balls and Simplexes	403
A.2	Euler Angles and Rotations	405
A.3	Basic Properties of Difference Operators	406
A.4	Cesàro Means and Difference Operators	408
A.5	Integrals over Spheres and Balls	411
B	Jacobi and Related Orthogonal Polynomials	415
B.1	Jacobi Polynomials	415
B.2	Gegenbauer Polynomials	418
B.3	Generalized Gegenbauer Polynomials	420
B.4	Associated Legendre Polynomials	421
B.5	Estimates of Normalized Jacobi Polynomials	421

Approximation Theory and Harmonic Analysis on
Spheres and Balls

Dai, F.; Xu, Y.

2013, XVIII, 440 p., Hardcover

ISBN: 978-1-4614-6659-8
