

Contents

1	Introduction	1
1.1	Change as a Precept Rather than a Fear	1
1.2	The Historical Significance of Change	2
1.2.1	The Stirrup	3
1.2.2	The Luddite	3
1.3	The Modern Design Folly: Engineering Processes and Metrics	4
1.4	The Modern Design Folly: Embracing Modern Capabilities	6
1.5	Layout of the Book	7
2	The Psychology of Change	9
2.1	Why Do We Resist Change?	9
2.2	How Do We Embrace Change?	11
2.3	Components of Change	13
2.4	The Encouragers of Change	13
3	The Modern Design Philosophy: Avoiding Change is Perilous	15
3.1	Organizations that Suppress the Agile Systems Design Methodology	15
3.2	The Push for Continual Change: Agile Design Patterns	16
3.2.1	The Lack of Ability to Change is the New Risk	16
3.2.2	The Velocity of Change is Increasing	17
4	Modern Design Philosophy: Organizational Considerations for Agile Systems Design	19
4.1	Three Developmental Domains to Master	20
5	A New Organization is Needed: Beyond Integrated Product Teams	23
5.1	Organizing for Productive Behavior in the Presence of Change	23
5.1.1	The Approach	23
5.1.2	Likert's Systems	23

5.1.3	Beyond System 4: Theory Z	25
5.1.4	Theory Z Engineering Organizations	26
5.1.5	Theory Z Product Team Composition	30
5.2	The Nature of Consensus Engineering	32
5.2.1	What Does It Mean to have a Common Vision	32
5.2.2	Examples of Theory Z Vision	33
5.2.3	Shifting Paradigms for Agile System Design	34
5.3	Quality Functional Deployment for Theory Z	35
5.3.1	The Role of QFD in Theory Z	35
5.3.2	Cost Comparison	36
5.3.3	QFD Matrix Method Outline	37
5.4	Summary: Organizational Transition	40
6	Modern Design Methodologies: Information and Knowledge Management	43
6.1	The Knowledge Paradigm.	43
6.1.1	The Information Jam	43
6.1.2	The Horizontal Integration of Knowledge	44
6.2	Engineering Tools for Functionbases	45
6.2.1	A Simple Functionbase Approach	45
6.2.2	Engineering Tools: The Engineer's Sandbox	46
6.2.3	Cost-Effective Process Documentation.	48
6.3	Engineering Design Reuse	50
6.3.1	The Reuse Problem Solution	50
6.3.2	Provably Correct Code	51
6.4	Groupware Utilizing Knowledge Management	53
6.4.1	The Electronic Engineering Notebook	53
6.4.2	Required Engineering and Knowledge Management Functions	55
6.4.3	Groupware Lessons Using Knowledge Management	57
6.5	Summary of Knowledge Management	58
7	Agile, Robust Designs: Increasing Quality and Efficiency.	59
7.1	Increasing Quality: Robust Designs	59
7.1.1	Defining Quality	59
7.1.2	Defining Performance Variance	61
7.1.3	Statistical Process Control	63
7.2	The Software Cleanroom	63
7.2.1	The Cleanroom Concept	63
7.2.2	VRP Requires the Discipline of a Cleanroom.	64
7.2.3	Stable Specifications and Certification.	65
7.3	Modern Systems/Software Development Tools	65
