

# Contents

<b>1</b>	<b>Stochastic Processes</b>	<b>1</b>
1	Filtered Probability Spaces and Stopping Times	1
2	Weak Compactness of Sets of Random Variables	4
3	Stochastic Processes	10
4	Special Classes of Stochastic Processes	21
5	Poisson Processes and Brownian Motion	26
6	Stochastic Integrals	31
7	The Indefinite Itô Integral	37
8	Itô's Formula and the Martingale Representation Theorem	40
9	Stochastic Differential Equations and Diffusions	43
10	The Infinitesimal Generator of Diffusion	54
11	Diffusions Defined by Nonautonomous Stochastic Differential Equations	57
12	The Feynman–Kac Formula	59
13	Harmonic Measure and the Mean Value Property of Diffusions	64
14	Notes and Remarks	65
<b>2</b>	<b>Set-Valued Stochastic Processes</b>	<b>67</b>
1	Spaces of Subsets of a Metric Space	67
2	Set-Valued Mappings	70
3	The Aumann Integral	84
4	Set-Valued Stochastic Processes	95
5	Notes and Remarks	102
<b>3</b>	<b>Set-Valued Stochastic Integrals</b>	<b>103</b>
1	Functional Set-Valued Stochastic Integrals	103
2	Set-Valued Stochastic Integrals	114
3	Conditional Expectation of Set-Valued Integrals Depending on Random Parameters	126
4	Selection Properties of Set-Valued Integrals Depending on Random Parameters	133
5	Notes and Remarks	144

<b>4</b>	<b>Stochastic Differential Inclusions</b>	147
1	Stochastic Functional Inclusions	147
2	Stochastic Differential Inclusions	163
3	Backward Stochastic Differential Inclusions	165
4	Weak Compactness of Solution Sets	170
5	Some Properties of Exit Times of Continuous Processes	172
6	Notes and Remarks	178
<b>5</b>	<b>Viability Theory</b>	181
1	Some Properties of Set-Valued Stochastic Functional Integrals Depending on Parameters	181
2	Viable Approximation Theorems	185
3	Existence of Viable Solutions	201
4	Weak Compactness of Viable Solution Sets	213
5	Notes and Remarks	214
<b>6</b>	<b>Partial Differential Inclusions</b>	217
1	Set-Valued Diffusion Generators	217
2	Continuous Selections of Set-Valued Diffusion Operators	222
3	Initial and Boundary Value Problems for Semielliptic Partial Differential Equations	228
4	Stochastic Representation of Solutions of Partial Differential Equations	230
5	Existence of Solutions of the Stochastic Dirichlet–Poisson Problem	235
6	Existence Theorems for Partial Differential Inclusions	241
7	Notes and Remarks	252
<b>7</b>	<b>Stochastic Optimal Control Problems</b>	253
1	Optimal Control Problems for Systems Described by Stochastic Differential Equations	253
2	Optimal Control Problems for Systems Described by Stochastic Functional Inclusions	260
3	Optimal Problems for Systems Described by Partial Differential Inclusions	267
4	Notes and Remarks	272
	<b>References</b>	275
	<b>Index</b>	279

Stochastic Differential Inclusions and Applications

Kisielewicz, M.

2013, XVI, 282 p., Hardcover

ISBN: 978-1-4614-6755-7
