
Contents

1 History and Development of Pacing	1
1.1 The Beginnings of Pacing Technology	1
1.2 Design History	2
1.3 Manufacturing History	4
1.4 History of Pacing Medical Care.....	5
2 Basic Principles of Cardiac Pacemaker Technology	7
2.1 Cardiac Pacemaker Classifications	7
2.2 Electric Cardiac Pacing.....	7
2.3 Energy Sources and Longevity of Implantable Devices.....	8
2.4 X-Ray Identifier	9
2.5 Programmer Usage.....	10
2.6 Magnet Usage	10
2.7 Implantable Systems Compatible with Magnetic Resonance Imaging.....	11
2.8 Device Construction and Materials.....	11
3 Heart Anatomy and Physiology	13
3.1 Heart Anatomy	13
3.2 Structure of the Heart Wall	14
3.3 The Conduction System.....	14
3.4 Heart Vessels	15
3.5 X-Ray Projections of the Heart.....	15
3.6 Cell Electrophysiology.....	15
3.7 Spread of Impulse	17
3.8 Origin of an Electrocardiogram	17
4 Pharmacological Treatment of Cardiac Rhythm Disorders	19
4.1 Cardiac Rhythm Disorders.....	19
4.1.1 Sinus Arrhythmias	20
4.1.2 Supraventricular Arrhythmias.....	21
4.1.3 Ventricular Arrhythmias.....	22
4.1.4 Disorders of Impulse Conduction.....	23
4.2 Pharmacological Treatment of Arrhythmias	25
4.2.1 Classification of Antiarrhythmic Drugs	25
4.2.2 Pharmacological Treatment	25
5 Pacing Modes	27
5.1 A00 Mode.....	27
5.2 AAI(R) Mode	27
5.3 AAT Mode.....	27
5.4 V00(R) Mode	27
5.5 VVI(R) Mode.....	29
5.6 VVT Mode	29

5.7	VDD Mode	29
5.8	VAT Mode.....	29
5.9	D00(R) Mode.....	29
5.10	DDI(R) Mode.....	31
5.11	DDD(R) Mode	31
6	Indications for Implantable System Treatment.....	33
6.1	Pacemaker Implantation Indications.....	33
6.1.1	Contraindications	35
6.2	Implantable Cardioverter-Defibrillator Implantation Indications.....	36
6.2.1	Significant Clinical Studies of ICDs.....	36
6.3	Indications for Cardiac Resynchronization Therapy	39
6.3.1	Significant Clinical Studies of CRT.....	40
7	Leads	43
7.1	Construction of Leads	43
7.1.1	Fixation Mechanisms.....	44
7.1.2	Construction of Pacing and Defibrillation Shock Electrodes	45
7.1.3	Construction of the Lead Conductor.....	45
7.1.4	Construction of Lead Connectors	46
7.2	Lead Materials	47
7.2.1	Materials for Pacing and Defibrillation Shock Electrodes	47
7.2.2	Lead Conductor Materials	48
7.2.3	Insulation Materials	48
7.2.4	Lead Connector Materials.....	48
7.3	Cardiac Pacing Leads.....	48
7.4	Defibrillation Leads	49
7.5	Left Ventricular Leads for Cardiac Resynchronization Therapy	49
7.6	Epimyocardial Leads	50
7.7	Subcutaneous Array Leads.....	51
7.8	Connectors and Adaptors	51
8	Pacing Systems	55
8.1	Pacing Configuration	55
8.2	Pacing Impedance	55
8.3	Basic Pacing Parameters.....	56
8.3.1	Sensing.....	57
8.3.2	Sensitivity	57
8.3.3	Pacing Pulse.....	57
8.4	Adaptive-Rate Pacing.....	58
8.4.1	Accelerometer	59
8.4.2	Minute Ventilation	60
8.4.3	QT Interval.....	60
8.4.4	Sensor Combination.....	60
8.5	Hysteresis	61
8.6	Diagnostic Features of Pacemakers	61
8.6.1	Arrhythmia Records.....	61
8.6.2	Counters	62
8.6.3	Histograms	62
8.7	Electrophysiologic Testing Using a Pacemaker.....	62
9	Pacemaker Timing	65
9.1	Timing in Single-Chamber Modes.....	65
9.1.1	Asynchronous Modes.....	66
9.1.2	Inhibited Modes	66
9.1.3	Triggered Modes.....	66

9.2	Timing in Dual-Chamber Modes	67
9.2.1	D00 and 0D0 Modes	67
9.2.2	DVI Mode	67
9.2.3	DDI Mode	67
9.2.4	VDD Mode	68
9.2.5	DDD Mode	68
9.3	Blanking Periods	68
9.4	Refractory Periods	69
9.5	DDD Timing Intervals	70
9.6	Tracking Atrial Rhythm to Ventricles	71
9.6.1	Dynamic AV Delay	71
9.6.2	Upper Rate Behavior	71
9.7	Automatically Switching Modes	72
9.7.1	Regulation of Ventricular Rhythm	73
9.8	Pacemaker-Mediated Tachycardia	73
9.9	Reducing Excessive Right Ventricular Pacing	74
9.10	Types of Timing	74
10	Implantable Cardioverter-Defibrillators	77
10.1	The Design of Implantable Cardioverter-Defibrillator Systems	77
10.2	Tachycardia Detection	78
10.2.1	Initial Detection	78
10.2.2	Redetection	79
10.2.3	Detection-Enhancing Functions	80
10.3	Tachycardia Therapies	81
10.3.1	Antitachycardia Pacing	81
10.3.2	Shock	82
10.4	ICD Diagnostic Features	83
10.5	Electrophysiologic Testing Using an ICD	84
10.5.1	Determining the Defibrillation Threshold	85
10.6	Concurrent Activity of an ICD and a Pacemaker	86
11	Cardiac Resynchronization Therapy	87
11.1	Securing Left Ventricular Pacing	87
11.2	CRT Pacing Configuration	88
11.3	CRT Timing	88
11.4	Diagnostic Features of CRT Systems	89
12	Implantation, Explantation, and Replacement of Devices and Leads	91
12.1	Implanting Endocardial Leads	91
12.1.1	Positioning the Lead in the Right Atrium	92
12.1.2	Positioning the Lead in the Right Ventricle	93
12.1.3	Fixating the Active Fixation Lead	93
12.1.4	Fixating the Passive Fixation Lead	94
12.1.5	Implanting the Defibrillation Lead	94
12.1.6	Implanting the Left Ventricular Lead	94
12.1.7	Securing the Lead at the Venous Entry Site	95
12.2	Evaluating Electrical Performance of Pacing Leads	95
12.2.1	Amplitude of Intracardial Signal Sensing	95
12.2.2	Pacing Circuit Impedance	96
12.2.3	Pacing Threshold (Voltage/Current)	96
12.2.4	Slew Rate	96
12.2.5	Retrograde Conduction Time	96
12.2.6	Diaphragm Pacing	96
12.2.7	Interrogation and Testing of Implanted Device	97

12.3	Connecting Leads to the Device	97
12.4	Device Replacements	98
12.4.1	Loosening Stuck Setscrews	99
12.4.2	Lubrication of Lead–Device Interface	99
12.4.3	Exposing the Lead Connector by Cutting Off the Header	99
12.5	Explantation	100
12.5.1	Explanting Leads	100
12.5.2	Explanting Devices	100
13	Patient Follow-Up	101
13.1	Measuring Lead Pacing Thresholds	102
13.1.1	Measuring the Threshold in the Right Atrium	103
13.1.2	Measuring the Threshold in the Right Ventricle	103
13.1.3	Measuring the Threshold in the Left Ventricle	103
13.2	Remote Patient Monitoring	105
13.2.1	Home Monitoring™ (Biotronik, Germany)	105
13.2.2	Latitude Patient Management System™ (Boston Scientific, USA)....	105
13.2.3	CareLink Network™ (Medtronic, USA)	106
13.2.4	Merlin.net™ (St. Jude Medical, USA)	106
14	Electromagnetic Compatibility and Technical Requirements	107
14.1	The Electromagnetic Field Effects on Pacing Technology	107
14.2	Technical Standardization and Pacing Technology Tests	108
14.2.1	Packaging, Leakage Currents, Dissipating Heat, and Power Source Requirements	108
14.2.2	Requirements for Implantable Leads	109
14.2.3	EMI Susceptibility Requirements	110
14.3	Ionizing Radiation Effects	110
