

Contents

Preface	vii
Basic Notation	xi
1 Walks in Graphs	1
2 Cubes and the Radon Transform	11
3 Random Walks	21
4 The Sperner Property	31
5 Group Actions on Boolean Algebras	43
6 Young Diagrams and q-Binomial Coefficients	57
7 Enumeration Under Group Action	75
8 A Glimpse of Young Tableaux	103
9 The Matrix-Tree Theorem	135
10 Eulerian Digraphs and Oriented Trees	151
11 Cycles, Bonds, and Electrical Networks	163
11.1 The Cycle Space and Bond Space	163
11.2 Bases for the Cycle Space and Bond Space	168
11.3 Electrical Networks	172
11.4 Planar Graphs (Sketch)	178
11.5 Squaring the Square	180
12 Miscellaneous Gems of Algebraic Combinatorics	187
12.1 The 100 Prisoners	187
12.2 Oddtown	189
12.3 Complete Bipartite Partitions of K_n	190
12.4 The Nonuniform Fisher Inequality	191
12.5 Odd Neighborhood Covers	193

12.6	Circulant Hadamard Matrices	194
12.7	P -Recursive Functions.....	200
Hints for Some Exercises		209
Bibliography		213
Index		219
