

Contents

1	Case 1: Upper Gastrointestinal Endoscopy Under General Anesthesia	1
2	Case 2: Sudden Anesthesia System Failure	3
3	Case 3: Broviac Catheter Placement in a Neonatal Intensive Care Unit	7
4	Case 4: Occluded Reinforced (Armored) Endotracheal Tube	11
5	Case 5: The Too-Small Rigid Bronchoscope.....	13
6	Case 6: Anaphylaxis, Anaphylactoid Reaction, or What Was It?	15
7	Case 7: Generalized Convulsions After Regional Anesthesia	19
8	Case 8: Hypotension During Microdiscectomy	23
9	Case 9: Intraoperative Hypotension in a Patient Receiving Chronic Steroids	27
10	Case 10: Changing a Nasotracheal Tube for an Oral Tube in the Intensive Care Unit	31
11	Case 11: Blocked Intravenous Line During Rapid-Sequence Induction	33
12	Case 12: Postinduction Difficult Intubation	35
13	Case 13: Blunt Upper Airway Trauma in a Patient with Recent Polysubstance Abuse	37
14	Case 14: The Stuck Elevator	41
15	Case 15: Postoperative Upper Airway Obstruction.....	43

16	Case 16: Postoperative Respiratory Complications in a Neonate	47
17	Case 17: Pregnant Teenager with a Bad Outcome.....	49
18	Case 18: Tension Pneumoperitoneum	51
19	Case 19: A Patient with Status Asthmaticus	55
20	Case 20: Intraoperative Decrease in Electrocardiogram Amplitude: Cause for Concern?	59
21	Case 21: Potential Disaster: An Intravenous Line That Stops Working in the Perioperative Phase	63
22	Case 22: Ventilatory Management in Major Thoracic Incisional Injury	65
23	Case 23: Airway Leak in a Prone Patient	69
24	Case 24: Difficulty in Extubation.....	71
25	Case 25: Tonsillectomy	75
26	Case 26: An Unusual Cause of a Serious Cardiac Arrhythmia.....	77
27	Case 27: A Patient with Supraglottic Mass	81
28	Case 28: Pressurized Intravenous Hetastarch.....	83
29	Case 29: Intraoperative Hypotension.....	85
30	Case 30: Hematuria	89
31	Case 31: Congenital Complete Heart Block	91
32	Case 32: Neonatal Respiratory Distress.....	95
33	Case 33: Respiratory Distress in the Intensive Care Unit	97
34	Case 34: The Butterfly Needle (Abbott).....	101
35	Case 35: Hypotension on Induction of Anesthesia in a Trauma Patient	103
36	Case 36: Delayed Postoperative Respiratory Obstruction	107
37	Case 37: An Abnormal Capnogram.....	111
38	Case 38: Retropharyngeal Abscess.....	115
39	Case 39: Rising End-Tidal Carbon Dioxide	119
40	Case 40: Acute Abdomen	123
41	Case 41: Difficulty in Ventilation in the Postinduction Period.....	125
42	Case 42: Unexplained Low Oxygen Saturation.....	129

43	Case 43: Occlusion of an Endotracheal Tube in a Neonate.....	133
44	Case 44: Surgical Emphysema After a Motor Vehicle Accident	135
45	Case 45: Postoperative Respiratory Arrest	139
46	Case 46: Rapid Increase in Body Temperature After Induction of General Anesthesia	141
47	Case 47: Intraoperative “Oozing”.....	143
48	Case 48: A Tip for Nasotracheal Intubation	147
49	Case 49: A Case of Anisocoria Following General Anesthesia	151
50	Case 50: A Routine Tonsillectomy and Adenoidectomy.....	153
51	Case 51: Drug Overdose.....	155
52	Case 52: Cardiac Arrest in a Neonate.....	157
53	Case 53: Bilateral Tourniquets. Beware.....	161
54	Case 54: Neurofibromatosis. A Warning	163
55	Case 55: A Machine Failure.....	165
56	Case 56: A Severe Case of Bronchospasm	167
57	Case 57: A Peanut in the Airway.....	171
58	Case 58: A Sprinkler Spike Lodged in a Patient’s Head.....	175
59	Case 59: Infusion of Cold Blood. Should We Worry?	179
60	Case 60: Respiratory Arrest After Extubation	183
61	Case 61: Sudden Increase in End-Tidal CO₂.....	187
62	Case 62: A Case of Acute Lymphoblastic Leukemia (ALL)	191
63	Case 63: Intraoperative Airway Obstruction.....	195
64	Case 64: An Anterior Mediastinal Mass. What Will You Do?.....	197
65	Case 65: A “Routine” MRI Case.....	201
66	Case 66: A Serious Problem During Neurosurgery.....	205
67	Case 67: A Case of Severe Intra-abdominal Pressure	209
68	Case 68: A Case of Severe Laryngospasm	213
69	Case 69: An ETT Suction Problem	217
70	Case 70: A Child Refusing an Operation.....	219
71	Case 71: Why So Sleepy?	221

72	Case 72: Check Your Facts.....	225
73	Case 73: A Strange Capnogram	227
74	Case 74: Relying on Others.....	231
75	Case 75: Monitored Anesthesia Care. Watch Out	233
76	Case 76: An Intermittently Worrisome Capnography Trace	237
77	Case 77: Cardiac Arrest at the Conclusion of Neurosurgery	241
78	Case 78: Watch Out	243
79	Case 79: A Complication of Central Venous Cannulation?	245
80	Case 80: An Example of Murphy's Law	247
81	Case 81: A Tragic Case.....	249
82	Case 82: Hemoptysis from a 2-Month Tracheostomy.....	251
83	Case 83: A Potentially Serious Incident.....	255
84	Case 84: Rusty Material in an Oxygen Flowmeter	257
85	Case 85: A Surprising Solution to an Airway Emergency	259
86	Case 86: An Airway Leak in the ICU.....	261
87	Case 87: Pediatric Dental Anesthesia.....	263
	Index.....	265
