

Contents

1	Overview	1
1.1	Wireless IMDs	1
1.2	Security Issues in IMDs	1
1.3	Challenges and Research Issues	4
2	Related Work	5
2.1	Introduction	5
2.2	Related Work on IMD Security	5
2.3	Related Work on Biometrics	6
2.4	Summary	8
3	The Resource Depletion Attack and Defense Scheme	9
3.1	Introduction	9
3.2	Attack Model	10
3.3	The Patient-Access-Pattern-Based Defense Scheme	10
3.3.1	Modeling Patient IMD Access Pattern	11
3.3.2	The SVM-Based Security Scheme	12
3.3.3	IMD Access During Emergency	14
3.4	Performance Evaluation	14
3.4.1	Experiment Design	14
3.4.2	Test Results	15
3.5	Discussions and Extensions	16
3.5.1	Updating SVM Parameters	16
3.5.2	Distance-Bounding Authentication Protocol Between IMD and Cell Phone	17
3.5.3	Sleep Time	17
3.5.4	How to Detect Emergency Situations	17
3.5.5	Jamming Attacks Between IMD and Cell Phone	17
3.5.6	Applications	18
3.6	Summary	18

4	IMD Access Control During Emergencies	19
4.1	Introduction	19
4.2	The Biometric-Based Two-Level Access Control Scheme	21
4.3	Level-One Access Control Using Basic Biometrics	21
4.3.1	An Overview of Biometric	21
4.3.2	Suitable Biometric	23
4.3.3	Detailed Design	23
4.4	Level-Two Access Control Using Iris Verification.	24
4.4.1	Challenges and Issues	24
4.4.2	Discriminative Bit Set	26
4.4.3	Matching Scheme for Iris Codes	27
4.5	Performance Evaluation	29
4.5.1	Experimental Data Sets	29
4.5.2	Experimental Parameters	30
4.5.3	Experimental Results	30
4.6	Performance Analysis	32
4.6.1	Security Analysis	32
4.6.2	Computation Overhead	34
4.6.3	Storage Requirement	34
4.6.4	Energy Consumption	34
4.7	Summary	34
5	Conclusion and Future Directions.	37
5.1	New Attacks	37
5.1.1	Paradigm Real Time Insulin Pump System.	37
5.2	Attack Analysis and Attack Model	38
5.3	Defending Scheme Set	39
5.3.1	Methods to Reduce Radio Range	39
5.3.2	Clock Skew Scheme	39
5.3.3	Radio Transmitter Fingerprinting Method	40
5.3.4	Closed-Loop Method	40
5.3.5	Uploading Behavior Pattern	40
5.3.6	Monitoring Command Setting Changes	40
5.4	Summary	41
