

# Contents

<b>1</b>	<b>Introduction</b>	1
1.1	Background	1
1.2	Research Theme	6
1.3	Scope and Strategy	7
1.4	Contributions	9
<b>2</b>	<b>Related Work</b>	11
2.1	Recommendation Algorithm	11
2.1.1	Content-Based Recommendation	13
2.1.2	Collaborative Filtering	15
2.1.3	Hybrid Methods	15
2.2	Sentiment Analysis	16
2.3	Dynamic Network Mechanism	17
2.3.1	Statistic Characteristics	17
2.3.2	Evolution Law	19
2.3.3	Web Information Cascades	22
2.4	Trust Management	22
2.5	Summary	24
<b>3</b>	<b>Collaborative Filtering</b>	25
3.1	Neighborhood-Based Method	25
3.1.1	User-Based CF	26
3.1.2	Item-Based CF	28
3.1.3	Comprehensive Analysis of User-Based CF and Item-Based CF	29
3.2	Latent Factor Model	29
3.2.1	Singular Value Decomposition	30
3.2.2	Regularized Singular Value Decomposition	31
3.3	Graph-Based Collaborative Filtering	32
3.3.1	Bipartite Graph Model of Collaborative Filtering	32
3.3.2	Graph-Based algorithm of Collaborative Filtering	32

3.4	Socialization Collaborative Filtering . . . . .	33
3.4.1	Gathering Socialization Data . . . . .	34
3.4.2	Neighborhood-Based Socialization Recommendation Algorithm . . . . .	35
3.4.3	Graph-Based Socialization Recommendation Algorithm . . . . .	36
3.5	Dynamic Model in Collaborative Filtering . . . . .	38
3.5.1	Dynamic Neighborhood-Based Model . . . . .	38
3.5.2	Dynamic Latent Factor Model . . . . .	39
3.5.3	Case Study: Dynamic Graph-Based Collaborative Filtering . . . . .	42
3.6	Conclusion . . . . .	51
<b>4</b>	<b>Sentiment Analysis.</b> . . . .	<b>53</b>
4.1	Sentiment Identification . . . . .	55
4.1.1	Dictionary-Based Opinion Words Generation . . . . .	55
4.1.2	Corpus-Based Opinion Words Generation . . . . .	56
4.2	Sentiment Orientation Classification . . . . .	57
4.2.1	Counting Opinion Words . . . . .	57
4.2.2	Supervised Learning Approaches . . . . .	58
4.3	Case Study: Sentimental Analysis in Recommender Systems . . . . .	59
4.3.1	Introduction . . . . .	59
4.3.2	Related Work . . . . .	61
4.3.3	Preliminaries . . . . .	62
4.3.4	Sentiment Enhanced Approach for Tag-Based Recommendation . . . . .	63
4.3.5	Experimental Evaluation . . . . .	66
<b>5</b>	<b>Theoretical Foundations.</b> . . . .	<b>69</b>
5.1	Traditional Prediction Method. . . . .	70
5.2	Trust and Its Measurement . . . . .	72
5.2.1	Data Source . . . . .	74
5.2.2	Statistical and Transmission Characteristics . . . . .	76
5.3	Analysis of Trust and Collective View. . . . .	77
5.3.1	Dataset . . . . .	78
5.3.2	Measurement . . . . .	79
5.3.3	Indicator Systems . . . . .	84
5.3.4	Result Analysis. . . . .	85
5.4	Summary . . . . .	91
<b>6</b>	<b>Models, Methods and Algorithms</b> . . . . .	<b>93</b>
6.1	Theoretical Models . . . . .	93

6.2	Trust-Based Prediction Methods . . . . .	96
6.2.1	Dual Factor Trust Metric . . . . .	96
6.2.2	Single Factor Trust Metric . . . . .	97
6.2.3	User Similarity Weighted. . . . .	99
6.3	Prediction Algorithm Based on Second-Order Markov Model. . .	100
6.3.1	Random Walk Model . . . . .	102
6.3.2	Algorithm . . . . .	104
6.4	Bayesian Fitting Model . . . . .	106
6.5	Experiments . . . . .	107
6.5.1	Evaluation Measurement . . . . .	108
6.5.2	Trust-Based Algorithms. . . . .	108
6.5.3	Second-Order Markov Model . . . . .	110
6.5.4	Bayesian Fitting Model . . . . .	112
6.5.5	Complexity Analysis of Algorithm . . . . .	114
6.6	Summary . . . . .	115
<b>7</b>	<b>Framework for Robustness Analysis. . . . .</b>	<b>117</b>
7.1	Related Work . . . . .	118
7.2	Definitions . . . . .	118
7.3	Noisy Data Injection Strategy . . . . .	120
7.4	Attack Cost. . . . .	121
7.5	Feedback Effect . . . . .	121
7.6	Application Assessment . . . . .	121
7.7	Results Analysis . . . . .	125
<b>8</b>	<b>Conclusions . . . . .</b>	<b>127</b>
	<b>Appendix . . . . .</b>	<b>131</b>
	<b>References . . . . .</b>	<b>135</b>
	<b>Index . . . . .</b>	<b>145</b>

Trust-based Collective View Prediction

Luo, T.; Chen, S.; Xu, G.; Zhou, J.

2013, XI, 146 p. 41 illus., Hardcover

ISBN: 978-1-4614-7201-8
