

Contents

1 Lifestyle as a Risk Factor for Metabolic Syndrome and Neurological Disorders	1
1.1 Introduction	1
1.2 Diet and Metabolic Syndrome	6
1.3 Pathogenesis of Metabolic Syndrome	7
1.4 Exercise and MetS	11
1.5 Effect of Exercise on Signaling in the Brain	13
1.6 Pathogenesis of Neurological Disorders	14
1.7 Effect of High-Fat Diet on Neurological Disorders	15
1.7.1 High-Fat Diet and Formation of Protein Aggregates	15
1.7.2 High-Fat Diet and Changes in BDNF Signaling	16
1.7.3 High-Fat Diet and Mitochondrial Abnormalities	16
1.7.4 High-Fat Diet and Induction of Oxidative Stress and Inflammation	16
1.8 Effect of Exercise on the Brain	19
1.9 Exercise-Mediated Neuroprotection in Neurological Disorders	21
1.9.1 Effect of Exercise on Alzheimer Disease	22
1.9.2 Effect of Exercise on Parkinson Disease	23
1.9.3 Effect of Exercise on Depression	23
1.10 Conclusion	24
References	25
2 Glucose- and Fructose-Induced Toxicity in the Liver and Brain	35
2.1 Introduction	35
2.2 Metabolism of Glucose and Fructose in the Liver	36
2.3 Metabolism of Glucose and Fructose in the Brain	44
2.4 Toxic Effects of Glucose and Fructose in the Visceral Organs and Brain	46
2.5 Conclusion	56
References	57

3 Essential Fatty Acid Metabolism in Metabolic Syndrome and Neurological Disorders	67
3.1 Introduction	67
3.2 Fatty Acids and Insulin Resistance	70
3.3 Metabolism of ARA in the Liver.....	70
3.4 Metabolism of ARA in Metabolic Syndrome	72
3.5 Metabolism of n-3 Fatty Acids in the Liver	76
3.6 Metabolism of n-3 Fatty Acids in Metabolic Syndrome	81
3.7 n-3 Fatty Acid-Mediated Reduction in Triacylglycerol Levels.....	83
3.8 Fatty Acids in the Brain.....	84
3.9 Role of Essential Fatty Acids in the Brain	85
3.10 Metabolism of ARA in Neurological Disorders.....	87
3.11 Metabolism of n-3 Fatty Acids in Neurological Disorders	90
3.12 Conclusion.....	92
References	93
 4 Lipid Mediators in Metabolic Syndrome and Neurological Disorders	 103
4.1 Introduction	103
4.2 Lipid Mediators in the Brain	104
4.3 Fatty Acids and Their Lipid Mediators in Metabolic Syndrome and Neurological Disorders.....	108
4.4 Diacylglycerol in Metabolic Syndrome and Neurological Disorders.....	117
4.5 Ceramide in Metabolic Syndrome and Neurological Disorders	118
4.6 Endocannabinoids in Metabolic Syndrome and Neurological Disorders.....	121
4.7 4-Hydroxynonenal in Metabolic Syndrome and Neurological Disorders.....	124
4.8 Oxy/Hydroxycholesterol in Metabolic Syndrome and Neurological Disorders.....	126
4.9 Biochemical Events Associated with Lipid Mediator-Mediated Insulin Resistance	128
4.10 Interactions Among Lipid Mediator in Metabolic Syndrome and Neurological Disorders	129
4.11 Modulation of Lipid Mediators by Diet	130
4.12 Conclusion.....	132
References	132
 5 Molecular Aspects of Obesity and Insulin Resistance in Metabolic Syndrome and Neurological Disorders	 143
5.1 Introduction	143
5.2 Obesity and Insulin Resistance.....	145
5.3 Obesity, Adipocytokines, and Development of Insulin Resistance	155
5.3.1 Involvement of Leptin in Obesity.....	159
5.3.2 Involvement of Adiponectin in Obesity	161

5.4	Obesity and Insulin Resistance.....	165
5.5	Contribution of Oxidative Stress and Inflammation in Obesity	167
5.6	Obesity and Metabolic Syndrome	168
5.7	Obesity and Neurological Disorders	169
5.8	Conclusion.....	173
	References	174
6	Effect of Dietary Phytochemicals on Metabolic Syndrome and Neurological Disorders	191
6.1	Introduction	191
6.2	Effect of Diet on Metabolic Syndrome and Neurological Disorders.....	193
6.2.1	Effect of Curcumin on Metabolic Syndrome	199
6.2.2	Effect of Green Tea on Metabolic Syndrome.....	202
6.2.3	Effect of Resveratrol on Metabolic Syndrome	203
6.2.4	Effect of n-3 Fatty Acids on Metabolic Syndrome	205
6.2.5	Effect of Cinnamon on Metabolic Syndrome.....	208
6.2.6	Effect of Garlic on Metabolic Syndrome	210
6.3	Effect of Phytochemicals on Neurological Disorders	211
6.3.1	Effect of Curcumin on Neurological Disorders.....	213
6.3.2	Effect of Green Tea on Neurological Disorders	214
6.3.3	Effect of Resveratrol on Neurological Disorders	217
6.3.4	Effect of n-3 Fatty Acids on Neurological Disorders.....	218
6.3.5	Effect of Cinnamon on Neurological Disorders.....	220
6.3.6	Effect of Garlic on Neurological Disorders.....	221
6.4	Conclusion.....	222
	References	223
7	Metabolic Syndrome as a Risk Factor for Stroke	235
7.1	Introduction	235
7.2	Adipocytokines and Their Contribution in the Pathogenesis of MetS	238
7.2.1	Adiponectin and AMP Kinase in the Metabolic Syndrome	240
7.2.2	Resistin in Metabolic Syndrome	244
7.2.3	Visfatin in Metabolic Syndrome.....	244
7.2.4	Leptin in Metabolic Syndrome	245
7.2.5	TNF- α in Metabolic Syndrome	248
7.2.6	IL-6 in Metabolic Syndrome	250
7.2.7	IL-1 β in Metabolic Syndrome	251
7.3	Stroke and its Neurochemical Consequences in the Brain	251
7.4	Stroke and Induction of Cytokines and Chemokines	256
7.5	Neuroprotective Role of Leptin in the Ischemic Injury.....	259
7.6	Metabolic Link Between MetS and Stroke	260
7.7	Neuroprotective Role of Adiponectin in Stroke	263

7.8	Molecular Mechanism Associated with Metabolic Link Between MetS and Stroke	263
7.9	Conclusion.....	265
	References	267
8	Metabolic Syndrome as a Risk Factor for Alzheimer Disease	281
8.1	Introduction	281
8.2	APP Processing, Endoplasmic Reticulum Stress in Alzheimer Disease	287
8.3	High-Fat Diet and Neurochemical Alterations in AD and Metabolic Syndrome	292
8.4	Insulin Receptor and Insulin Signaling in Alzheimer Disease and Metabolic Syndrome	294
8.5	Ceramide-Mediated Insulin Resistance in the Brain and Visceral Tissues	300
8.6	Cognitive Dysfunction in Metabolic Syndrome and Alzheimer Disease.....	304
8.7	Link Between Metabolic Syndrome and Alzheimer Disease.....	307
8.8	Leptin in Diabetes	315
8.9	Leptin in Alzheimer Disease	316
8.10	Metal Ions in Alzheimer Disease and Metabolic Syndrome.....	319
8.11	Conclusion.....	320
	References	322
9	Metabolic Syndrome as a Risk Factor for Depression.....	343
9.1	Introduction	343
9.2	Pathogenesis of Depression.....	347
9.3	Neurocircuit Alterations in Depression.....	354
9.4	Association Between Depression and Metabolic Syndrome.....	357
9.5	Impaired Glucose Metabolism in Depression and Metabolic Syndrome	358
9.6	Upregulation of Oxidative Stress in Depression and Metabolic Syndrome	359
9.7	Induction of Neuroinflammation in Depression and Metabolic Syndrome	361
9.8	Possible Mechanisms Linking Depression with Metabolic Syndrome	363
9.9	Conclusion.....	367
	References	368
10	Perspective and Direction for Future Research	379
10.1	Introduction	379
10.2	Links Between Metabolic Syndrome and Neurological Disorders.....	382
10.3	Effect of Diet on Metabolic Syndrome and Neurological Disorders.....	388

10.4 Can Exercise Delay the Onset of Metabolic Syndrome and Neurological Disorders?	389
10.5 Directions for Future Research.....	391
10.6 Conclusion.....	392
References	392

Index	401

Metabolic Syndrome

An Important Risk Factor for Stroke, Alzheimer Disease,
and Depression

Farooqui, A.A.

2013, XX, 412 p., Hardcover

ISBN: 978-1-4614-7317-6
