<b>Preface.....</b>	<b>xiii</b>
<b>Acknowledgements .....</b>	<b>xiv</b>
<b>Chapter 1 Statistics for Decision Making and Competitive Advantage .....</b>	<b>1</b>
1.1 Statistical Competences Translate into Competitive Advantages.....	1
1.2 The Path Toward Statistical Competence and Competitive Advantage .....	2
1.3 Use Excel for Competitive Advantage .....	2
1.4 Statistical Competence Is Powerful and Yours.....	3
<b>Chapter 2 Describing Your Data.....</b>	<b>5</b>
2.1 Describe Data with Summary Statistics and Histograms.....	5
2.2 Round Descriptive Statistics .....	9
2.3 Share the Story that Your Graphics Illustrate .....	9
2.4 Data Is Measured with Quantitative or Categorical Scales.....	9
2.5 Continuous Data Are Sometimes Normal.....	11
2.6 The Empirical Rule Simplifies Description .....	11
2.7 Outliers Can Distort the Picture.....	13
2.8 Central Tendency, Dispersion and Skewness Describe Data.....	14
2.9 Describe Categorical Variables Graphically: Column and PivotCharts .....	14
2.10 Descriptive Statistics Depend on the Data and Rely on Your Packaging.....	15
Excel 2.1 Produce Descriptive Statistics.....	17
Excel 2.2 Sort to Produce Descriptives Without Outliers.....	19
Excel 2.3 Make a Histogram.....	21
Excel 2.4 Use a PivotTable to Plot the Distribution .....	23
Excel 2.5 Plot a Cumulative Distribution .....	26
Excel 2.6 Produce a Column Chart of a Nominal Variable .....	28
Excel Shortcuts at Your Fingertips .....	31
Significant Digits Guidelines .....	34
Lab 2 Descriptive Statistics .....	35
Assignment 2-1 Procter & Gamble’s Global Advertising .....	37
Assignment 2-2 Best Practices Survey .....	37
Assignment 2-3 Shortcut Challenge .....	38
CASE 2-1 VW Backgrounds .....	38

<b>Chapter 3</b>	<b>Hypothesis Tests, Confidence Intervals to Infer Population Characteristics and Differences.....</b>	<b>39</b>
3.1	Sample Means Are Random Variables .....	39
3.2	Infer Whether a Population Mean Exceeds a Target .....	43
3.3	Critical $t$ Provides a Benchmark .....	45
3.4	Confidence Intervals Estimate the Population Mean .....	46
3.5	Calculate Approximate Confidence Intervals with Mental Math .....	48
3.6	Margin of Error Is Inversely Proportional to Sample Size .....	48
3.7	Determine Whether Two Segments Differ with Student $t$ .....	49
3.8	Estimate the Extent of Difference Between Two Segments .....	53
3.9	Estimate a Population Proportion from a Sample Proportion .....	54
3.10	Conditions for Assuming Approximate Normality .....	56
3.11	Conservative Confidence Intervals for a Proportion .....	56
3.12	Assess the Difference Between Alternate Scenarios or Pairs .....	58
3.13	Inference from Sample to Population .....	61
Excel 3.1	Test the Level of a Population Mean with a One Sample $t$ test .....	63
Excel 3.2	Make a Confidence Interval for a Population Mean .....	63
Excel 3.3	Illustrate Confidence Intervals with Column Charts .....	64
Excel 3.4	Test Difference Between Two Segment Means with a Two Sample $t$ test .....	67
Excel 3.5	Construct a Confidence Interval for the Difference Between Two Segments .....	67
Excel 3.6	Illustrate the Difference Between Two Segment Means with Column Chart .....	68
Excel 3.7	Construct a Pie Chart of Shares .....	69
Excel 3.8	Test the Difference in Between Alternate Scenarios or Pairs with a Paired $t$ test .....	72
Excel 3.9	Construct a Confidence Interval for the Difference Between Alternate Scenarios or Pairs .....	72
	Lab Practice 3 Inference .....	75
	<i>Cingular's Position in the Cell Phone Service Market.</i> .....	75
	<i>Value of a Nationals Uniform.</i> .....	75
	<i>Confidence in Chinese Imports.</i> .....	76
	Lab 3 Inference: Dell Smartphone Plans. ....	77
	Assignment 3-1 The Marriott Difference .....	79
	Assignment 3-2 Immigration in the U.S. ....	80
	Assignment 3-3 McLattes .....	80
	Assignment 3-4 A Barbie Duff in Stuff .....	80
	CASE 3-1 Yankees v Marlins: The Value of a Yankee Uniform .....	81
	CASE 3-2 Gender Pay .....	81
	CASE 3-3 Polaski Vodka: Can a Polish Vodka Stand Up to the Russians? .....	82
<b>Chapter 4</b>	<b>Simulation to Infer Future Performance Levels Given Assumptions .....</b>	<b>85</b>
4.1	Specify Assumptions Concerning Future Performance Drivers .....	85
4.2	Compare Best and Worst Case Performance Outcomes .....	88
4.3	Spread and Shape Assumptions Influence Possible Outcomes .....	89

4.4	Monte Carlo Simulation of the Distribution of Performance Outcomes .....	90
4.5	Monte Carlo Simulation Reveals Possible Outcomes Given Assumptions .....	93
Excel 4.1	Set Up a Spreadsheet to Link Simulated Performance Components .....	95
Excel 4.2	View a Simulated Sample with a Histogram .....	97
	Lab 4 Inference: Dell Smartphone Plans. ....	109
	CASE 4-1 American Girl in Starbucks. ....	111
	CASE 4-2 Can Whole Foods Hold On? .....	112
<b>Chapter 5</b>	<b>Quantifying the Influence of Performance Drivers and Forecasting: Regression .....</b>	<b>113</b>
5.1	The Simple Linear Regression Equation Describes the Line Relating a Decision Variable to Performance .....	113
5.2	Test and Infer the Slope .....	115
5.3	The Regression Standard Error Reflects Model Precision.....	118
5.4	Prediction Intervals Estimate Average Population Response .....	120
5.5	<i>Rsquare</i> Summarizes Strength of the Hypothesized Linear Relationship and <i>F</i> Tests its Significance .....	121
5.6	Analyze Residuals to Learn Whether Assumptions are Met .....	124
5.7	Explanation and Prediction Create a Complete Picture .....	125
5.8	Present Regression Results in Concise Format.....	127
5.9	Assumptions We Make When We Use Linear Regression.....	127
5.10	Correlation Reflects Linear Association .....	128
5.11	Correlation Coefficients Are Key Components of Regression Slopes .....	130
5.12	Correlation Complements Regression .....	133
5.13	Linear Regression Is Doubly Useful.....	134
Excel 5.1	Build a Simple Linear Regression Model.....	135
Excel 5.2	Construct Prediction Intervals.....	137
Excel 5.3	Find Correlations Between Variable Pairs.....	146
	Lab Practice 5 Oil Price Forecast.....	147
	Lab 5 Simple Regression Dell Slimmer PDA.....	149
	CASE 5-1 GenderPay (B).....	151
	CASE 5-2 GM Revenue Forecast .....	152
	Assignment 5-1 Impact of Defense Spending on Economic Growth .....	153
<b>Chapter 6</b>	<b>Naïve Forecasting with Regression .....</b>	<b>155</b>
6.1	Use Naïve Forecasts Estimate Trend .....	155
6.2	Use Naïve Forecasts to Set Assumptions with Monte Carlo .....	161
6.3	Naïve Forecasts Offer Quick and Simple Forecasts of Trend.....	163
Excel 6.1	Estimate Trend with a Naïve Model .....	165
Excel 6.2	Produce Naïve Forecasts.....	169
Excel 6.3	Plot Naïve Model Fits and Forecasts .....	173
	Lab 6 Forecast Concha y Toro Sales in Developing Export Markets.....	177
	Case 6-1 Can Arcos Dorados Hold On? .....	179

<b>Chapter 7</b>	<b>Marketing Segmentation with Descriptive Statistics, Inference, Hypothesis Tests and Regression .....</b>	<b>181</b>
	CASE 7-1 Segmentation of the Market for Preemie Diapers .....	181
7.1	Use PowerPoints to Present Statistical Results for Competitive Advantage .....	188
7.2	Write Memos that Encourage Your Audience to Read and Use Results .....	195
	MEMO Re: Importance of Fit Drives Trial Intention.....	197
<b>Chapter 8</b>	<b>Finance Application: Portfolio Analysis with a Market Index as a Leading Indicator in Simple Linear Regression .....</b>	<b>199</b>
8.1	Rates of Return Reflect Expected Growth of Stock Prices.....	199
8.2	Investors Trade Off Risk and Return .....	201
8.3	Beta Measures Risk .....	201
8.4	A Portfolio Expected Return, Risk and Beta Are Weighted Averages of Individual Stocks .....	204
8.5	Better Portfolios Define the Efficient Frontier .....	206
	MEMO Re: Recommended Portfolio is Diversified.....	208
8.6	Portfolio Risk Depends on Correlations with the Market and Stock Variability.....	209
Excel 8.1	Estimate Portfolio Expected Rate of Return and Risk .....	210
Excel 8.2	Plot Return by Risk to Identify Dominant Portfolios and the Efficient Frontier .....	211
	Lab 8 Portfolio Risk and Return .....	215
<b>Chapter 9</b>	<b>Association Between Two Categorical Variables: Contingency Analysis with Chi Square.....</b>	<b>217</b>
9.1	When Conditional Probabilities Differ from Joint Probabilities, There Is Evidence of Association .....	217
9.2	Chi Square Tests Association Between Two Categorical Variables .....	220
9.3	Chi Square Is Unreliable if Cell Counts Are Sparse.....	221
9.4	Simpson's Paradox Can Mislead .....	223
	MEMO Re.: Country of Assembly Does Not Affect Older Buyers' Choices .....	228
9.5	Contingency Analysis Is Demanding.....	229
9.6	Contingency Analysis Is Quick, Easy, and Readily Understood.....	229
Excel 9.1	Construct Crosstabulations and Assess Association Between Categorical Variables with PivotTables and PivotCharts .....	230
Excel 9.2	Use Chi Square to Test Association.....	232
Excel 9.3	Conduct Contingency Analysis with Summary Data .....	234
	Lab 9 Skype Appeal.....	239
	Assignment 9-1 747s and Jets.....	241
	Assignment 9-2 Fit Matters .....	241
	Assignment 9-3 Allied Airlines .....	241
	Assignment 9-4 Netbooks in Color.....	242
	CASE 9-1 Hybrids for American Car.....	242
	CASE 9-2 Tony's GREAT Advertising.....	243
	CASE 9-3 Hybrid Motivations .....	244

<b>Chapter 10</b>	<b>Building Multiple Regression Models.....</b>	<b>245</b>
10.1	Multiple Regression Models Identify Drivers and Forecast .....	245
10.2	Use Your Logic to Choose Model Components .....	246
10.3	Multicollinear Variables Are Likely When Few Variable Combinations Are Popular in a Sample .....	249
10.4	<i>F</i> Tests the Joint Significance of the Set of Independent Variables .....	249
10.5	Insignificant Parameter Estimates Signal Multicollinearity .....	251
10.6	Combine or Eliminate Collinear Predictors .....	254
10.7	<i>Partial F</i> Tests the Significance of Changes in Model Power.....	256
10.8	Decide Whether Insignificant Drivers Matter.....	258
10.9	Sensitivity Analysis Quantifies the Marginal Impact of Drivers.....	260
	MEMO Re: Light, Responsive, Fuel Efficient Cars with Smaller Engines Cleanest .....	263
10.10	Model Building Begins with Logic and Considers Multicollinearity .....	264
Excel 10.1	Build and Fit a Multiple Linear Regression Model .....	265
Excel 10.2	Use Correlation and Simple Regression to Decide Whether Potential Drivers Removed Matter.....	269
Excel 10.3	Use Sensitivity Analysis to Compare the Marginal Impacts of Drivers .....	269
	Lab 10 Model Building with Multiple Regression: Pricing Dell's Navigreat .....	275
	Assignment 10-1 Sakura Motor's Quest for Fuel Efficiency.....	279
	Assignment 10-2 Identifying Promising Global Markets .....	280
	Case 10-1 Chasing Whole Foods' Success .....	281
	Case 10-2 Fast Food Nations .....	282
<b>Chapter 11</b>	<b>Model Building and Forecasting with Multicollinear Time Series .....</b>	<b>283</b>
11.1	Time Series Models Include Decision Variables, External Forces, Leading Indicators, and Inertia .....	285
11.2	Indicators of Economic Prosperity Lead Business Performance .....	286
11.3	Hide the Two Most Recent Datapoints to Validate a Time Series Model .....	286
11.4	Compare Scatterplots to Choose Driver Lags: Visual Inspection.....	287
11.5	The Durbin Watson Statistic Identifies Positive Autocorrelation.....	290
11.6	Assess Residuals to Identify Unaccounted for Trend or Cycles .....	292
11.7	Forecast the Recent, Hidden Points to Assess Predictive Validity .....	296
11.8	Add the Most Recent Datapoints to Recalibrate .....	297
	MEMO Re: Revenue Recovery Forecast for 2012 Through 2013 .....	299
11.9	Inertia and Leading Indicator Components Are Powerful Drivers and Often Multicollinear.....	300
Excel 11.1	Build and Fit a Multiple Regression Model with Time Series.....	301
Excel 11.2	Create Driver Lags.....	302
Excel 11.3	Examine Patterns in More Recent Time Periods .....	307
Excel 11.4	Plot Residuals to Identify Unaccounted for Trend, Cycles, or Seasonality and Assess Autocorrelation.....	310
Excel 11.5	Test the Model's Forecasting Validity.....	316
Excel 11.6	Recalibrate to Forecast.....	318

Excel 11.7 Illustrate the Fit and Forecast.....	319
Excel 11.8 Assess the Impact of Drivers. ....	320
Lab Practice 11 Starbucks in China.. ....	321
Lab 11-1 What Is Driving WFM Revenues. . . and What Revenues Can WFM Expect Next Year? .....	323
Case 11-1 McDonalds Revenue Drivers and Future Prospects .....	325
CASE 11-2 Starbucks in China.....	328
<b>Chapter 12 Indicator Variables.....</b>	<b>331</b>
12.1 Indicators Modify the Intercept to Account for Segment Differences.....	331
12.2 Indicators Estimate the Value of Product Attributes .....	334
12.3 Indicators Estimate Segment Mean Differences .....	338
12.4 Analysis of Variance Offers an Alternative to Regression with Indicators .....	342
12.5 ANOVA and Regression with Indicators are Complementary Substitutes .....	345
12.6 ANOVA and Regression in Excel .....	346
12.7 Indicators Quantify Shocks in Time Series.....	346
MEMO Re: Supply of Self Employed Workers Stable Following 09 Contraction .....	352
12.8 Indicators Allow Comparison of Segments and Scenarios, Quantify Shocks, and Offer an Alternative to Analysis of Variance.....	353
Excel 12.1 Use Indicators to Find Part Worth Utilities and Attribute Importances from Conjoint Analysis Data .....	354
Excel 12.2 Add Indicator Variables to Account for Segment Differences or Structural Shifts.....	360
Lab 12 Power PowerPoints .....	369
Lab 12 ANOVA and Regression with Indicators: Powerful PowerPoints .....	371
Lab 12 The H-D Buell Blast .....	373
Assignment 12-1 Conjoint Analysis of PDA Preferences .....	375
Assignment 12-2: Indicators with Time Series: Impact of the Commodity Price Bubble on World Oil Prices.....	376
CASE 12-1 Modeling Growth: Procter & Gamble Quarterly Revenues .....	378
CASE 12-2 Store24 (A): Managing Employee Retention* and Store24 (B): Service Quality and Employee Skills**.....	381
<b>Chapter 13 Nonlinear Multiple Regression Models .....</b>	<b>383</b>
13.1 Consider a Nonlinear Model When Response Is Not Constant.....	383
13.2 Skewness Signals Nonlinear Response.....	383
13.3 Rescaling y Builds in Interactions .....	387
13.4 The Margin of Error Is Not Constant with a Nonlinear Model.....	392
13.5 Sensitivity Analysis Enables Scenario Comparisons.....	392
13.6 Nonlinear Models Inform Monte Carlo Simulation.....	397
13.7 Gains from Nonlinear Rescaling Are Significant .....	398
13.8 Nonlinear Models Offer the Promise of Better Fit and Better Behavior .....	399
Excel 13.1 Rescale to Build and Fit Nonlinear Regression Models with Linear Regression .....	400
Excel 13.2 Compare Scenarios with Sensitivity Analysis .....	413

Excel 13.3 Use Nonlinear Regression Estimates with Monte Carlo Simulation .....	417
Lab 13 Mattel's Acquisition of Oasys .....	423
Lab 13 Nonlinear Forecasting with Naïve Models: LAN Airlines Passenger Revenues .....	425
Lab 13 Forecasting with Uncertain Drivers: LAN Passenger Revenues .....	427
CASE 13-1 Nonlinear Hybrid Sales .....	429
CASE 13-2 Fuel Cost Shock and Shift at LAN Airlines.....	431
<b>Chapter 14 Sensitivity Analysis with Nonlinear Multiple Regression Models.....</b>	<b>433</b>
14.1 Sensitivity Analysis Reveals the Relative Strength of Drivers.....	435
14.2 Gains from Nonlinear Rescaling Are Significant .....	437
14.3 Sensitivity Analysis with Nonlinear Models Reveals Interactions .....	438
Excel 14.1 Sensitivity Analysis with Hypothetical Scenarios for Nonlinear Models .....	439
Case 14-1 Promising Global Markets for EVs .....	445
<b>Erratum.....</b>	<b>E1</b>
<b>Index.....</b>	<b>447</b>

Business Statistics for Competitive Advantage with  
Excel 2013

Basics, Model Building, Simulation and Cases

Fraser, C.

2013, XIV, 449 p. 406 illus. in color., Softcover

ISBN: 978-1-4614-7380-0
