

Contents

Physical and Computational Issues in the Numerical Modeling of Ocean Circulation	1
Robert L. Higdon	
Modeling Hazardous, Free-Surface Geophysical Flows with Depth-Averaged Hyperbolic Systems and Adaptive Numerical Methods	25
D.L. George	
Real-Time Forecasting and Visualization of Hurricane Waves and Storm Surge Using SWAN+ADCIRC and FigureGen	49
J.C. Dietrich, C.N. Dawson, J.M. Proft, M.T. Howard, G. Wells, J.G. Fleming, R.A. Luettich Jr., J.J. Westerink, Z. Cobell, M. Vitse, H. Lander, B.O. Blanton, C.M. Szpilka, and J.H. Atkinson	
Methane in Subsurface: Mathematical Modeling and Computational Challenges	71
Malgorzata Peszynska	
Fast Algorithms for Bayesian Inversion	101
Sivaram Ambikasaran, Arvind K. Saibaba, Eric F. Darve, and Peter K. Kitanidis	
Modeling Spatial and Structural Uncertainty in the Subsurface	143
Margot Gerritsen and Jef Caers	

Computational Challenges in the Geosciences

Dawson, C.; Gerritsen, M. (Eds.)

2013, IX, 167 p. 57 illus., Hardcover

ISBN: 978-1-4614-7433-3
