

# Contents

<b>Toy Models for D. H. Lehmer’s Conjecture II</b> .....	1
Eiichi Bannai and Tsuyoshi Mieazaki	
<b>On Representation of an Integer by <math>X^2 + Y^2 + Z^2</math> and the Modular Equations of Degree 3 and 5</b> .....	29
Alexander Berkovich	
<b>Almost Universal Ternary Sums of Squares and Triangular Numbers</b> ....	51
Wai Kiu Chan and Anna Haensch	
<b>Weighted Generating Functions for Type II Lattices and Codes</b> .....	63
Noam D. Elkies and Scott Duke Kominers	
<b>Quadratic Forms and Automorphic Forms</b> .....	109
Jonathan Hanke	
<b>Integral Positive Ternary Quadratic Forms</b> .....	169
William C. Jagy	
<b>Some Aspects of the Algebraic Theory of Quadratic Forms</b> .....	181
R. Parimala	
<b>On the Length of Binary Forms</b> .....	207
Bruce Reznick	
<b>Representation of Quadratic Forms by Integral Quadratic Forms</b> .....	233
Rainer Schulze-Pillot	
<b>Identifying the Matrix Ring: Algorithms for Quaternion Algebras and Quadratic Forms</b> .....	255
John Voight	

Quadratic and Higher Degree Forms

Alladi, K.; Bhargava, M.; Savitt, D.; Tiep, P.H. (Eds.)

2013, IX, 298 p., Hardcover

ISBN: 978-1-4614-7487-6
