

Contents

1	The Importance, Origin, and Evolution	1
	Surinder Kumar Gupta	
2	Molecular Cytogenetics	13
	Annaliese S. Mason	
3	Distant Hybridization Involving Different In Vitro Techniques.....	23
	Dan Liu, Ling Xu, Xinxin Geng, Yuanfei Zhou, Zhenchao Zhang, Bing Wang, and Weijun Zhou	
4	Microspore Culture and Doubled Haploid Technology.....	45
	Yoshihito Takahata, Yu Takahashi, and Ryo Tsuwamoto	
5	Biotechnological Strategies for Enhancing Phytoremediation	63
	Bhawana Pathak, Razia Khan, Jyoti Fulekar, and M.H. Fulekar	
6	Genome Analysis	91
	Graham J. King	
7	Genetic Engineering of Lipid Biosynthesis in Seeds.....	111
	Stacy D. Singer, Michael S. Greer, Elzbieta Mietkiewska, Xue Pan, and Randall J. Weselake	
8	Metabolism and Detoxification of Phytoalexins from Crucifers and Application to the Control of Fungal Plant Pathogens	151
	M. Soledade C. Pedras	
9	Molecular Basis of Cytoplasmic Male Sterility.....	173
	Jinghua Yang and Mingfang Zhang	
10	Self-Incompatibility	187
	Hiroyasu Kitasiba and Takeshi Nishio	

11 Hybrid Technology in Cruciferous Vegetables	209
Muhammad Awais Ghani, Langlang Zhang, Junxing Li, Bin Liu, and Liping Chen	
12 Genetic Modifications for Pest Resistance	221
Hongbo Liu, Bizeng Mao, Peng Cui, Tian Tian, Changrong Huang, Xi Xu, and Weijun Zhou	
Index.....	235

Biotechnology of Crucifers

Gupta, S.K. (Ed.)

2013, XI, 241 p., Hardcover

ISBN: 978-1-4614-7794-5
