Contents

1 General Description 1
- 1.1 Conduction and Electron Current Through a Single Molecule 1
- 1.2 Gating and Electric Potential on the Bridge 8
- 1.3 Electron–Electron Interactions: Coulomb Blockade 12
- 1.4 Dephasing 16
- 1.5 Electron–Phonon Interactions 18
- 1.6 Spin Transport 23
- 1.7 Building of Metal–Molecule–Metal Junctions 28
- 1.8 Characterization of Molecular Junctions 33

2 Transport Theory 39
- 2.1 Retarded and Advanced Green's Functions for Electrons Traveling Through a MMM Junction 39
- 2.2 The Green's Function for the Atomic Wire; an Analytical Example 47
- 2.3 Electron Transmission and Landauer Expression for the Current Through a MMM Junction 52
- 2.4 Electron Transport Through a Junction as a Multichannel Scattering Problem 56
- 2.5 Nonequilibrium Green's Functions Formalism 64
- 2.6 Rate Equations 73

3 Ballistic Transport 79
- 3.1 Charge Transfer and Electrostatic Potential Distribution in Unbiased Junctions 79
- 3.2 Electric Charge and Potential Distribution Over a Biased MMM Junction: Current Rectification 84
- 3.3 Fano Resonances 90
- 3.4 Simmons Model for Electron Transport Through Molecular Insulators 93
- 3.5 Conformational Gating of Molecular Bridges 99

3.6 Effect of the Electronic Structure of the Leads on the Electron Transport Through a Junction: Negative Differential Resistance 102
3.7 Coulomb Blockade and Charge Oscillations: NEGF Approach 105
3.8 Coulomb Blockade: Multielectron Master Equations Approach 110
3.9 Transport Through Magnetic Molecules 115
3.10 Kondo Effect 119
3.11 Kondo Effect in Nonequilibrium Quantum Dots 126

4 Inelastic Transport 133
4.1 Vibration-Induced Features in the Electron Conductance and Current Through MMM Junctions 133
4.2 Vibration-Induced Features in the Inelastic Electron Tunneling Spectra (IETS) 139
4.3 The Effect of Molecular Vibrations on the Coulomb Blockade and Kondo Anomaly 148
4.4 Dissipative Transport: Direct Coupling of the Molecular Bridge to the Phonon Bath 153
4.5 Dissipative Transport: Indirect Coupling of the Molecular Bridge to Thermal Phonons 158
4.6 Current Fluctuations 163
4.7 Heat Transfer, Thermal Conductance, and Thermopower 168
4.8 Polaron Effects: Hysteresis, Switching and Negative Differential Resistance 175
4.9 Molecular Junction Conductance and Long Range Electron Transfer Reactions 178

5 Electronic Structure Calculations in Molecules 183
5.1 Kohn–Sham Equations 183
5.2 Approximations for the Exchange-Correlation Energy Term 192
5.3 Long-Range Interactions in the DFT 196
5.4 Excitation Energies 200
5.5 Time-Dependent DFT 204
5.6 Dielectric Response of Fullerenes 207
5.7 Density-Functional-Based Investigations of Molecular Magnets 212
5.8 Photoexcitation of the Light-Harvesting Carotenoid-Porphyrin-C_{60} Molecular Triad 217
5.9 Specifics of the Electron Structure Calculations for MMM Junctions 221

6 Nanoelectronic Applications of Molecular Junctions 231
6.1 Field-Effect Transistors 231
6.2 Single-Molecule Diodes 239
6.3 Quantum Dots and Carbon Nanotubes as Switches and Memory Elements 242
6.4 Molecular Switches and Memories 248

6.5 Chemoselective Sensors 255
6.6 Thermoelectric Devices 262
6.7 Molecules on Silicon Surfaces 268

7 Conclusion 273
