

Contents

| | |
|---|----|
| 1 Overview | 1 |
| 1.1 Introduction to Vehicular Ad-hoc Network | 1 |
| 1.2 Representative Experimental Work Worldwide | 3 |
| 1.2.1 MIT CarTel | 3 |
| 1.2.2 UMass DieselNet | 5 |
| 1.2.3 GM DSRC Fleet | 8 |
| 1.2.4 Germany FleetNet Project | 10 |
| 1.2.5 Europe Network on Wheels (NOW) Project | 11 |
| 1.3 Empirical VANET Studies at SJTU | 12 |
| 2 Dealing with Vehicular Traces | 15 |
| 2.1 Introduction to the Shanghai Grid Project | 15 |
| 2.2 Collecting Vehicular GPS Traces | 15 |
| 2.3 Challenges and Issues in Data Analysis | 18 |
| 3 Realistic Vehicular Mobility Models | 23 |
| 3.1 Introduction to Mobility Models | 23 |
| 3.1.1 Theoretical Mobility Models | 23 |
| 3.1.2 Empirical Mobility Models | 24 |
| 3.2 Empirical Vehicular Mobility Analysis | 25 |
| 3.2.1 Extracting Inter-Contact Times | 25 |
| 3.2.2 Identifying Exponential ICT Tail | 27 |
| 3.2.3 Recognizing Traffic Influxes | 28 |
| 3.3 Modeling Urban Vehicular Mobility | 30 |
| 3.3.1 Definitions and Preliminaries | 30 |
| 3.3.2 RWM Without Traffic Influx | 30 |
| 3.3.3 Mobility Model with Traffic Influx | 31 |
| 3.3.4 Analysis on ICT Under Mobility Model with Traffic Influx | 31 |
| 3.3.5 Cross Over from Exponential to Power Law | 35 |

| | | |
|----------|--|-----------|
| 3.4 | Model Evaluation | 36 |
| 3.4.1 | Impact of Maximum Periodicity | 37 |
| 3.4.2 | Impact of Real Road Networks | 38 |
| 3.5 | Summary | 39 |
| 4 | Opportunistic Routing Protocols | 41 |
| 4.1 | Introduction | 41 |
| 4.2 | Contact-Based Routing Protocol Design | 44 |
| 4.2.1 | Statistics of ICTs | 44 |
| 4.2.2 | Analyzing ICT Temporal Patterns | 47 |
| 4.2.3 | Opportunistic Forwarding Algorithm Design | 51 |
| 4.2.4 | Performance Evaluation | 53 |
| 4.3 | Social-Based Routing Protocols | 59 |
| 4.3.1 | Macroscopic Mobility of Social Relationship | 60 |
| 4.3.2 | Impact of Mobility on Routing Algorithms | 63 |
| 4.3.3 | Design of ZOOM | 67 |
| 4.4 | Performance Evaluation | 69 |
| 4.4.1 | Methodology | 69 |
| 4.4.2 | Performance Comparison | 71 |
| 4.5 | Summary | 73 |
| 5 | Vehicle Tracking | 75 |
| 5.1 | Introduction | 75 |
| 5.2 | Related Tracking Approaches | 77 |
| 5.3 | System Description | 78 |
| 5.4 | Design of HERO | 79 |
| 5.4.1 | Overview | 79 |
| 5.4.2 | Hierarchy Initialization | 81 |
| 5.4.3 | Restricted Location Updating | 82 |
| 5.4.4 | Protocol Analysis and Parameter Optimization | 84 |
| 5.5 | Design Issues | 88 |
| 5.6 | Prototype Implementation | 89 |
| 5.7 | Performance Evaluation | 92 |
| 5.7.1 | Methodology | 92 |
| 5.7.2 | Effects of Protocol Parameters | 94 |
| 5.7.3 | Impact of Query Quantity | 95 |
| 5.7.4 | Impact of Vehicle Quantity | 96 |
| 5.7.5 | Impact of Network Scale | 97 |
| 5.7.6 | Effect of Real-Time Constraint | 99 |
| 5.8 | Summary | 100 |

| | | |
|----------|---|------------|
| 6 | Traffic Condition Sensing Application | 101 |
| 6.1 | Introduction | 101 |
| 6.2 | Characteristics of Taxi Sensory Data | 103 |
| 6.3 | Unveiling Spatio-Temporal Correlation | 105 |
| 6.3.1 | Problem Modeling. | 106 |
| 6.3.2 | Characterizing Temporal Traffic Correlations. | 106 |
| 6.3.3 | Characterizing Spatial Traffic Correlations. | 109 |
| 6.4 | MSSA Based Traffic Perception | 111 |
| 6.4.1 | Overview | 111 |
| 6.4.2 | MSSA Review | 111 |
| 6.4.3 | Dealing with Missing Data. | 113 |
| 6.4.4 | Optimal Parameter Configuration | 113 |
| 6.5 | Performance Evaluation | 114 |
| 6.5.1 | Methodology and Metric Design. | 114 |
| 6.5.2 | Impact of Window Width and MSSA Mode Quantity | 114 |
| 6.5.3 | Impact of Channel Quantity | 115 |
| 6.5.4 | Impact of Temporal Granularity | 116 |
| 6.6 | Discussion | 116 |
| 6.7 | Summary | 117 |
| | References | 119 |

Studies on Urban Vehicular Ad-hoc Networks

Zhu, H.; Li, M.

2013, IX, 124 p. 78 illus., Softcover

ISBN: 978-1-4614-8047-1
