

Contents

1	Unit Sphere Packings	1
1.1	The Contact Number Problem of Finite Sphere Packings	1
1.2	Lower Bounds for Voronoi Cells in Sphere Packings	5
1.3	Dense Sphere Packings in Euclidean 3-Space	9
1.4	On Sphere Packings in High Dimensions	12
1.5	Uniformly Stable and Periodic Extreme Lattices	14
2	Proofs on Unit Sphere Packings	17
2.1	Proof of Theorem 1.1.6	17
2.1.1	An Upper Bound for Sphere Packings: Proof of (i)	18
2.1.2	An Upper Bound for the fcc Lattice: Proof of (ii)	23
2.1.3	Octahedral Unit Sphere Packings: Proof of (iii)	25
2.2	Proof of Theorem 1.2.4	26
2.2.1	The Voronoi Star of Voronoi Cells	26
2.2.2	Estimating the Volume of a Voronoi Star from Below	27
2.3	Proof of Theorem 1.2.5	28
2.3.1	Metric Properties of Voronoi Cells	28
2.3.2	Wedges of Types I, II, and III, and Truncated Wedges	29
2.3.3	The Lemma of Comparison	32
2.3.4	Volume Formulas for (Truncated) Wedges	34
2.3.5	The Integral Representation of Surface Density	34
2.3.6	Truncation of Wedges Increases the Surface Density	37
2.3.7	Maximum Surface Density in Truncated Wedges of Type I	38
2.3.8	Surface Density in Truncated Wedges of Type II	41
2.3.9	The Overall Estimate of Surface Density in Voronoi Cells	42
2.4	Proof of Theorem 1.3.3	43
2.4.1	Average Surface Area of Cells in Normal Tilings of a Cube	43
2.4.2	Average Surface Area of Cells in Normal Tilings	45

2.5	Proof of Theorem 1.3.5	48
2.5.1	Average Edge Curvature of Cells in Normal Tilings	48
2.5.2	Average Edge Curvature of Voronoi Cells in Unit Ball Packings	49
2.6	Proof of Theorem 1.5.3	50
2.6.1	The Signed Volume of Convex Polytopes	50
2.6.2	The Volume Force of Convex Polytopes	51
2.6.3	Critical Volume Condition	52
2.6.4	Strictly Locally Volume Expanding Convex Polytopes	54
2.6.5	From Critical Volume Condition to Uniform Stability	56
3	Contractions of Sphere Arrangements	57
3.1	The Kneser–Poulsen Conjecture	57
3.2	The Kneser–Poulsen Conjecture for Continuous Contractions	58
3.3	On the Kneser–Poulsen Conjecture for General Contractions	60
3.4	Kneser–Poulsen-Type Theorems in Non-Euclidean Spaces	62
3.5	The Kneser–Poulsen Conjecture for Large Equal Radii	64
3.6	Alexander’s Conjecture Revisited	65
4	Proofs on Contractions of Sphere Arrangements	67
4.1	Proof of Theorem 3.3.2: Weighted Surface Volume	67
4.2	Proof of Theorem 3.3.3: Codimension Two Volume	71
4.3	Proof of Theorem 3.3.4: The Leapfrog Lemma	73
4.4	Proof of Theorem 3.4.1	74
4.4.1	The Spherical Leapfrog Lemma	74
4.4.2	Smooth Contractions via Schläfli’s Differential Formula ..	75
4.4.3	From Higher- to Lower-Dimensional Spherical Volume ...	75
4.4.4	Putting Pieces Together	76
4.5	Proof of Theorem 3.4.5	77
4.5.1	Monotonicity of the Volume of Hyperbolic Simplices	77
4.5.2	Smooth One-Parameter Family of Hyperbolic Polyhedra	81
5	Ball-Polyhedra and Spindle Convex Bodies	83
5.1	Intersections of Congruent Balls	83
5.2	Disk-Polygons Revisited	84
5.3	On a Steinitz-Type Problem for Ball-Polyhedra	88
5.4	On Global and Local Rigidity of Ball-Polyhedra	89
5.5	Separation and Support for Spindle Convex Bodies	93
5.6	A Carathéodory-Type Theorem for Spindle Convex Hulls	94
5.7	Illuminating Ball-Polyhedra and Spindle Convex Bodies	94
5.8	An Euler–Poincaré-Type Formula for Ball-Polyhedra	97
6	Proofs on Ball-Polyhedra and Spindle Convex Bodies	99
6.1	Proof of Theorem 5.2.1	99
6.1.1	On Translates of the Interior of a Convex Body	99
6.1.2	From Generalized Billiard Trajectories to Shortest Ones	101

6.2	Proof of Theorem 5.4.1	103
6.3	Proof of Theorem 5.4.2	104
6.4	Underlying Truncated Delaunay Complex of a Ball-Polyhedron ...	106
6.5	Proof of Theorem 5.4.6	109
6.6	Infinitesimally Rigid Polyhedron and Dual Ball-Polyhedron	110
6.7	Proof of Theorem 5.4.10	111
6.8	Proofs of Theorems 5.5.1–5.5.3	114
6.8.1	Strict Separation by Spheres of Radii at Most One	114
6.8.2	Characterizing Spindle Convex Sets	115
6.8.3	Separating Spindle Convex Sets	115
6.9	Proof of Theorem 5.6.1	116
6.9.1	Spindle Convex Hulls and Supporting Spheres	116
6.9.2	Carathéodory's Theorem for Spindle Convex Hulls	117
6.10	Proof of Theorem 5.7.3	118
6.10.1	On the Boundary of Spindle Convex Hulls	118
6.10.2	On the Euclidean Diameter of Spindle Convex Hulls	120
6.10.3	An Upper Bound Based on a Probabilistic Approach	121
6.10.4	Schramm's Lower Bound	122
6.10.5	On Sets of Given Diameter to Cover Spherical Space	124
6.10.6	The Final Upper Bound for the Illumination Number	125
6.11	Proof of Theorem 5.7.5	126
6.12	Proof of Theorem 5.8.1	126
6.12.1	The CW-Decomposition of a Standard Ball-Polyhedron ..	127
6.12.2	On the Number of Generating Balls	127
6.12.3	On the Face Lattices of Standard Ball-Polyhedra	128
7	Coverings by Cylinders	131
7.1	Plank Theorems: Old and New	131
7.2	Covering Convex Bodies by Cylinders	136
7.3	Kadets–Ohmann-Type Theorems	137
7.4	On Partial Coverings of Balls by Planks	139
8	Proofs on Coverings by Cylinders	143
8.1	Proof of Theorem 7.1.8	143
8.1.1	On Coverings of Convex Bodies by Two Planks	143
8.1.2	Minimizing the Greatest m th Successive \mathbf{C} -Inradius	144
8.2	Proof of Theorem 7.1.12	145
8.2.1	On an Extension of a Helly-Type Result of Klee	146
8.2.2	On Some Concave Functions of Successive Inradii	147
8.2.3	Estimating Sums of Successive Inradii	148
8.3	Proof of Theorem 7.2.2	149
8.3.1	Covering Ellipsoids by 1-Codimensional Cylinders	149
8.3.2	Covering Convex Bodies by Cylinders	150
8.4	Proof of Theorem 7.3.4: Volume Maximizing Lunes	151

8.5	Proof of Theorem 7.4.2: Partial Coverings in Euclidean 3-Space ...	155
8.6	Proof of Theorem 7.4.6: Lower Bounds for Ball-Polyhedra.....	155
9	Research Problems: An Overview	157
9.1	Unit Sphere Packings	157
9.1.1	The Contact Number Problem of Finite Sphere Packings	157
9.1.2	Dense Sphere Packings in Euclidean 3-Space	157
9.1.3	On Sphere Packings in High Dimensions.....	158
9.1.4	Uniformly Stable and Periodic Extreme Lattices.....	158
9.2	Contractions of Sphere Arrangements	159
9.2.1	The Kneser–Poulsen Conjecture	159
9.2.2	Kneser–Poulsen-Type Theorems in Non-Euclidean Spaces	159
9.2.3	Alexander’s Conjecture Revisited	160
9.3	Ball-Polyhedra and Spindle Convex Bodies.....	160
9.3.1	Disk-Polygons Revisited	160
9.3.2	On a Steinitz-Type Problem for Ball-Polyhedra.....	161
9.3.3	On Global and Local Rigidity of Ball-Polyhedra.....	162
9.3.4	Illuminating Ball-Polyhedra and Spindle Convex Bodies	162
9.4	Coverings by Cylinders.....	163
9.4.1	Plank Theorems: Old and New	163
9.4.2	Covering Convex Bodies by Cylinders	163
9.4.3	Kadets–Ohmann-Type Theorems	164
9.4.4	On Partial Coverings of Balls by Planks	164
	Glossary	165
	References.....	169

Lectures on Sphere Arrangements – the Discrete
Geometric Side

Bezdek, K.

2013, XII, 175 p., Hardcover

ISBN: 978-1-4614-8117-1
