

Contents

Part I Preliminaries

1 Preliminaries	3
1.1 Introduction and Literature Review	3
1.2 Some Results from Matrix Algebra	4
1.3 A Functional Equation	11

Part II Definition and Distributional Properties

2 Basic Properties	15
2.1 Definition	15
2.2 Probability Density Function	20
2.3 Marginal Distributions	23
2.4 Expected Value and Covariance	24
2.5 Stochastic Representation	26
2.6 Conditional Distributions	34
2.7 Examples	49
2.7.1 One-Dimensional Case	49
2.7.2 Vector Variate Case	50
2.7.3 General Matrix Variate Case	53
2.7.4 Generating Elliptically Contoured Distributions	56
3 Probability Density Function and Expected Values	59
3.1 Probability Density Function	59
3.2 More on Expected Values	66
4 Mixtures of Normal Distributions	103
4.1 Mixture by Distribution Function	103
4.2 Mixture by Weighting Function	116

5	Quadratic Forms and Other Functions of Elliptically Contoured Matrices	125
5.1	Extension of Cochran's Theorem to Multivariate Elliptically Contoured Distributions.....	125
5.2	Rank of Quadratic Forms	137
5.3	Distributions of Invariant Matrix Variate Functions	139
6	Characterization Results	145
6.1	Characterization Based on Invariance	145
6.2	Characterization of Normality	148

Part III Estimation and Hypothesis Testing

7	Estimation	173
7.1	Maximum Likelihood Estimators of the Parameters	173
7.2	Properties of Estimators.....	183
8	Hypothesis Testing	193
8.1	General Results	193
8.2	Two Models.....	198
8.2.1	Model I.....	198
8.2.2	Model II.....	199
8.3	Testing Criteria	201
8.3.1	Testing That a Mean Vector Is Equal to a Given Vector	201
8.3.2	Testing That a Covariance Matrix Is Equal to a Given Matrix	202
8.3.3	Testing That a Covariance Matrix Is Proportional to a Given Matrix	203
8.3.4	Testing That a Mean Vector and Covariance Matrix Are Equal to a Given Vector and Matrix	204
8.3.5	Testing That a Mean Vector Is Equal to a Given Vector and a Covariance Matrix Is Proportional to a Given Matrix	206
8.3.6	Testing Lack of Correlation Between Sets of Variates....	208
8.3.7	Testing That a Correlation Coefficient Is Equal to a Given Number	209
8.3.8	Testing That a Partial Correlation Coefficient Is Equal to a Given Number.....	211
8.3.9	Testing That a Multiple Correlation Coefficient Is Equal to a Given Number.....	212
8.3.10	Testing Equality of Means	213
8.3.11	Testing Equality of Covariance Matrices	214
8.3.12	Testing Equality of Means and Covariance Matrices	215

Part IV Applications

9	Linear Models	219
9.1	Estimation of the Parameters in the Multivariate Linear Regression Model	219
9.2	Hypothesis Testing in the Multivariate Linear Regression Model	228
9.3	Inference in the Random Effects Model.....	231
10	Application in Portfolio Theory	237
10.1	Elliptically Contoured Distributions in Portfolio Theory	237
10.2	Estimation of the Global Minimum Variance	239
10.2.1	Distribution of the Global Minimum Variance	240
10.2.2	Examples	243
10.2.3	Determination of the Elliptical Model	245
10.2.4	Tests for the Global Minimum Variance.....	247
10.3	Test for the Weights of the Global Minimum Variance Portfolio ..	249
10.3.1	Distribution of the Estimated Weights of the Global Minimum Variance Portfolio	250
10.3.2	The General Linear Hypothesis for the Global Minimum Variance Portfolio Weights	251
10.3.3	The General Linear Hypothesis for the Global Minimum Variance Portfolio Weights in an Elliptical Model.....	256
10.3.4	International Global Minimum Variance Portfolio.....	258
10.4	Inference for the Markowitz Efficient Frontier	258
10.4.1	Derivation of the Efficient Frontier	259
10.4.2	Sample Efficient Frontier in Elliptical Models	261
10.4.3	Confidence Region for the Efficient Frontier	262
10.4.4	Unbiased Estimator of the Efficient Frontier	266
10.4.5	Overall F-Test	268
10.4.6	Empirical Illustration	269
11	Skew Elliptically Contoured Distributions	273
11.1	Skew Normal Distribution	273
11.2	Matrix Variate Skew Normal Distribution	277
11.2.1	Basic Properties	279
11.3	Quadratic Forms of the Matrix Variate Skew Normal Distributions	281
11.4	A Multivariate Stochastic Frontier Model	282
11.5	Global Minimum Variance Portfolio Under the Skew Normality ..	284
11.5.1	Model Estimation	287
11.5.2	Goodness-of-Fit Test	290
11.5.3	Application to Some Stocks in the Dow Jones Index	294

11.6	General Class of the Skew Elliptically Contoured Distributions...	297
11.6.1	Multivariate Skew t-Distribution	298
11.6.2	Multivariate Skew Cauchy Distribution	301
