

Contents

Preface	V
1 Introduction to Fourier Series	1
1. Introduction	1
2. A Famous Series	1
3. Trigonometric Polynomials	4
4. Constant Coefficient Differential Equations	9
5. The Wave Equation for a Vibrating String	15
6. Solving the Wave Equation via Exponentiation	17
7. Integrals	18
8. Approximate Identities	20
9. Definition of Fourier Series	25
10. Summability Methods	28
11. The Laplace Equation	33
12. Uniqueness of Fourier Coefficients for Continuous Functions	37
13. Inequalities	39
2 Hilbert Spaces	45
1. Introduction	45
2. Norms and Inner Products	45
3. Subspaces and Linear Maps	50
4. Orthogonality	52
5. Orthonormal Expansion	56
6. Polarization	58
7. Adjoints and Unitary Operators	60
8. A Return to Fourier Series	62
9. Bernstein's Theorem	65
10. Compact Hermitian Operators	66
11. Sturm–Liouville Theory	73
12. Generating Functions and Orthonormal Systems	83
13. Spherical Harmonics	87
3 Fourier Transform on \mathbb{R}	95
1. Introduction	95
2. The Fourier Transform on the Schwartz Space	96
3. The Dual Space	101
4. Convolutions	104

5. Plancherel Theorem	105
6. Heisenberg Uncertainty Principle	106
7. Differential Equations	107
8. Pseudo-Differential Operators	109
9. Hermite Polynomials	112
10. More on Sobolev Spaces	113
11. Inequalities	115
4 Geometric Considerations	121
1. The Isoperimetric Inequality	121
2. Elementary L^2 Inequalities	124
3. Unitary Groups	131
4. Proper Mappings	138
5. Vector Fields and Differential Forms	145
6. Differential Forms of Higher Degree	149
7. Volumes of Parametrized Sets	155
8. Volume Computations	159
9. Inequalities	164
10. CR Geometry	171
11. Positivity Conditions for Hermitian Polynomials	175
5 Appendix	179
1. The Real and Complex Number Systems	179
2. Metric Spaces	182
3. Integrals	185
4. Exponentials and Trig Functions	188
5. Complex Analytic Functions	189
6. Probability	190
Notation Used in This Book	193
Basic Notation	193
Notations with Similar or Several Uses	194
Fourier Series and Fourier Transforms	194
Hilbert Spaces and Linear Algebra	195
Functions of Several Variables	195
References	197
Index	201

Hermitian Analysis

From Fourier Series to Cauchy-Riemann Geometry

D'Angelo, J.

2013, X, 203 p. 27 illus., 19 illus. in color., Hardcover

ISBN: 978-1-4614-8525-4

A product of Birkhäuser Basel
