

Contents

Part I Energy Policy Modeling in Twenty-First Century: An Introduction

Energy Policy Modeling in the 21st Century: An Introduction	3
Hassan Qudrat-Ullah	

Part II Modeling Approaches and Energy Policy Decisions

Thinking About the Future	17
Erik R. Larsen and Santiago Arango	

Fuzzy System Dynamics: A Framework for Modeling Renewable Energy Policies	31
Michael Mutingi and Charles Mbohwa	

The Diffusion of Eco-Technologies: A Model-Based Theory	49
Matthias Otto Müller, Ruth Kaufmann-Hayoz, Markus Schwaninger and Silvia Ulli-Beer	

Managing the Energy Basket in the Face of Limits	69
Khalid Saeed	

Power Plant Relocation Policy versus Investments in Transmission Network Infrastructure: A Study on the Italian Energy Market	87
Silvano Cincotti and Giulia Gallo	

Simulation of Greenhouse Gas Cap-and-Trade Systems with ENERGY 2020	107
Jeffrey S. Amlin	

Part III System Dynamics and Agent-Based Models in Action

Energy Policy Planning for Climate-Resilient Low-Carbon Development	125
Andrea M. Bassi, Prakash (Sanju) Deenapanray and Pål Davidsen	

Understanding the Dynamics of Electricity Supply and Demand in Canada	157
Hassan Qudrat-Ullah	
Adoption of Renewable Energy Technologies: A Fuzzy System Dynamics Perspective	175
Michael Mutingi	
Resurrecting a Forgotten Model: Updating Mashayekhi’s Model of Iranian Economic Development	197
Saeed P. Langarudi and Michael J. Radzicki	
Making Progress Towards Emissions Mitigation: Modeling Low-Carbon Power Generation Policy	235
Isaac Dyner, Carlos J. Franco and Laura M. Cardenas	
Exploring Energy and Economic Futures Using Agent-Based Modeling and Scenario Discovery	251
P. Wang, M. D. Gerst and M. E. Borsuk	
Index	271

Energy Policy Modeling in the 21st Century

Qudrat-Ullah, H. (Ed.)

2013, XIII, 273 p. 107 illus., 77 illus. in color., Hardcover

ISBN: 978-1-4614-8605-3
